Insurance Plans

Yield Protection - Insurance coverage only providing protection against a production loss.

Revenue Protection - Insurance coverage providing protection against revenue loss due to a production loss, price decline or increase, or a combination of both.

Revenue Protection with Harvest Price Exclusion - Insurance coverage providing protection only against revenue loss due to a production loss, price decline, or a combination of both.

Late and Prevented Planting

These provisions provide protection on eligible acreage that is planted late or that cannot be planted by the final planting date. Please talk to your agent for more details.

Loss Example

Assume an approved yield of 1,652 pounds per acre, 75-percent coverage level, 100 percent share, and a one-acre basic unit. The projected price is \$0.281 and the harvest price is \$0.268. Due to insurable cause of loss, the production-to-count is 500 pounds.

For Revenue Protection, the insurance guarantee is equal to the production guarantee multiplied by the greater of the projected price or the harvest price.
