

Raleigh Regional Office — Raleigh, NC

Revised October 2015

Peaches

Maryland

Crop Insured

All peaches (including nectarines) in a county are insurable if:

- A premium rate is provided by the actuarial document;
- They are any variety grown for the production of fresh or processing peaches;
- They are from tree varieties that have a chilling hour requirement appropriate for the area;
- They are from a rootstock adapted to the area;
- They are in an orchard that is considered acceptable; and
- They are on trees that have reached at least the fourth growing season after being set out.

Counties Available

Peaches are insurable in Calvert, Carroll, Cecil, Frederick, Harford, and Washington counties. Peaches may be insurable in other counties by written agreement if specific criteria are met. Contact a crop insurance agent for more details.

Causes of Loss

You are protected against the following:

- Adverse weather conditions, including hail, frost, freeze, wind, drought, and excess precipitation;
- Failure of irrigation water supply if caused by an insured peril during the insurance period;
- Fire caused by an insured peril in the insurance period;
- Insect damage and plant disease, except for insufficient or improper application of control measures;
- Insufficient chilling hour to break dormancy; or
- Wildlife.

Insurance Period

Coverage begins on November 21 and ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest of the crop;
- Final adjustment of a claim;
- Abandonment of the crop; or
- September 30.

Important Dates

Sales Closing Date November 20, 2015
 Production Report Date January 15, 2016
 Acreage Report Date January 15, 2016
 Premium Billing Date August 15, 2016

Duties in the Event of Damage or Loss

Notice of Loss - If a loss occurs notify your crop insurance agent:

- Within 72 hours of initial discovery of damage;
- If you previously gave notice of crop damage, you must also provide notice at least 15 days before the beginning of harvest to claim an indemnity; or
- At least 3 days before the date harvest should have started if the crop will not be harvested.

Coverage Levels and Premium Subsidies

Coverage levels range from 50 to 75 percent of your average yield and are subsidized as shown on page 2. For example, an average actual production history (APH) yield of 300 bushels per acre would result in a guarantee of 150 bushels per acre at the 50-percent coverage level. You may choose different coverage levels for fresh and processing peaches.

Item	Percent					
	50	55	60	65	70	75
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Premium Share	33	36	36	41	41	45

300	Approved yield per acre
x 0.65	Coverage level
195	Acre guarantee
- 95	Production-to-count
100	Loss per acre
x \$21.25	Price election (fresh)
\$2,125	Indemnity/acre

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300.

Price Elections

Fresh Price	\$21.25
Processing Price	\$7.25

Insurance Units

Basic Unit - A basic insurance unit includes all your insurable peach acreage in the county in which you have 100-percent share or that is owned by one person and operated by another person on shares.

Optional Units - Optional units may be established if you can provide separate records for each unit, and the acreage is not insured under a CAT policy. Optional units may be established by:

- Non-contiguous land;
- Farm Service Agency Farm Serial Numbers; or
- By type; fresh or processing.

Supplemental Coverage Option (SCO)

SCO is available for peaches in some counties. If elected, SCO provides additional coverage for a portion of your underlying crop insurance policy deductible. For further information visit the SCO fact sheet at www.rma.usda.gov/pubs/rmc/2016sco.pdf.

Yield Exclusion (YE)

APH Yield Exclusion is available in some peach counties. YE allows you to exclude yields in exceptionally bad years from your production history when calculating yields used to establish your crop insurance coverage.

Loss Example

Assume fresh peaches with an approved yield of 300 bushels per acre, 65-percent coverage level, 100-percent share, and a one-acre basic unit.

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
