

## Raleigh Regional Office — Raleigh, NC

Revised March 2016

# Processing Beans

## New Jersey

### Crop Insured

Processing beans (snap and lima) are insurable if:

- They are grown under, and in accordance with, a processor contract;
- They are executed by the acreage reporting date; and
- They are not excluded from the contract at any time during the year.

Lima beans following snap beans harvested in the same crop year are not insurable.

### Counties Available

Processing beans are insurable in Cape May, Cumberland, and Salem counties. Processing beans may be insurable in other counties if specific criteria are met. Contact a crop insurance agent for more details.

### Causes of Loss

You are protected against the following:

- Adverse weather conditions, including natural perils such as hail, frost, freeze, wind, drought, and excess precipitation;
- Failure of irrigation water supply, if caused by an insured peril during the insurance period;
- Fire, if caused by an insured peril during the insurance period;
- Insect damage and plant disease, except for insufficient or improper application of control measures; or
- Wildlife.

This policy does not cover insect or disease damage on any snap bean acreage that follows a crop of snap beans, lima beans, or green peas harvested within the same crop year.

### Insurance Period

Coverage begins at planting unless:

- Snap bean acreage is planted before April 20; or
- Lima bean acreage is planted before May 10.

Coverage ends with the earliest occurrence of one of the following:

- The date the processing beans are destroyed, abandoned, harvested, or should have been harvested but were not harvested;

- The date you harvest sufficient production to fulfill your processor contract (if the contract stipulates a specific amount of production to be delivered);
- Final adjustment of a loss; or
- October 15.

### Important Dates

#### Snap Beans

Sales Closing Date ..... March 15, 2016  
Acreage Reporting Date ..... August 15, 2016

#### Lima Beans

Sales Closing Date ..... March 15, 2016  
Acreage Reporting Date ..... August 15, 2016

### Reporting Requirements

An acreage report is a report of all insured acreage of processing beans. A report and a copy of all your processor contracts must be submitted to your crop insurance agent on or before the appropriate acreage reporting date.

### Duties in the Event of Damage or Loss

**Notice of Loss** - If a loss occurs you should:

- Protect the crop from further damage by providing sufficient care;
- Notify your crop insurance agent within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period); and
- Leave representative samples intact for each field of the damaged unit.

### Definitions

**Base Contract Price** - The price stipulated in the processor contract for the grade factor or sieve size that is designated in the special provisions, if applicable, without regard to discounts or incentives that may apply.

**Bypassed Acreage** - Land on which production is ready for harvest but the processor chooses not to accept such production so it is not harvested.

**Good Farming Practices** - The cultural practices generally in use in the county for the crop to make normal progress toward maturity and produce at least the yield used to determine the production guarantee and are those required by the bean processor contract with the processing

company, and recognized by USDA's National Institute for Food and Agriculture as compatible with agronomic and weather conditions in the county.

**Production Guarantee** - Number of tons guaranteed per acre determined by multiplying your average yield per acre (based on your records) by the coverage level you choose.

### Coverage Levels

Coverage levels range from 50 to 75 percent of your average yield and are subsidized as shown in the following table. For example, an average snap bean yield of 2 tons per acre would result in a guarantee of 1.5 tons per acre at the 75-percent coverage level. If you selected the 75-percent coverage level, your premium share would be 45 percent of the base premium.

Item	Percent					
	50	55	60	65	70	75
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Premium Share	33	36	36	41	41	45

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300.

### Price Elections

Price used to calculate your premium or indemnity.

Lima .....	\$450 per ton
Italian .....	\$250 per ton
Petite .....	\$250 per ton
Wax .....	\$250 per ton
Green and Other Unlisted Types .....	\$250 per ton

### Supplemental Coverage Option (SCO)

SCO is available for processing beans in some counties. If elected, SCO provides additional coverage for a portion of your underlying crop insurance policy deductible.

### Loss Example

Assume snap and lima beans with actual production history (APH) yields of 2.5 tons and 1.2 tons respectively, 65-percent coverage level, 100-percent share, and one basic unit.

Snap Beans		Lima Beans	
2.5	APH Yield Per Acre (Tons)	1.2	
x 0.65	Coverage Level	x 0.65	
1.6	Acre Guarantee	0.8	
- 0.5	Production-to-Count	- 0.3	
1.1	Loss Per Acre	0.5	
x \$250	Price Election	x \$450	
\$275	<b>Indemnity Per Acre</b>	\$225	

### Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at [www.rma.usda.gov/tools/agent.html](http://www.rma.usda.gov/tools/agent.html).
