Grapes Rhode Island

Crop Insured

Grape varieties grown for wine or juice are insurable if the vines have:

- Reached the fourth growing season after being set out, for all native and hybrid varieties;
- Reached the fifth growing season after being set out, for all Vinifera varieties; and
- Produced an average of 2 tons per acre in at least 1 of the 3 most recent crop years.

Counties Available

Grapes are insurable in Newport County. Grapes in other counties, including Vinifera grapes, may be insurable by written agreement if specific criteria are met. Contact an insurance agent for more details.

Causes of Loss

You are protected against the following:

- Adverse weather conditions, including hail, frost, freeze, wind, drought, and excess precipitation;
- Failure of irrigation water supply if caused by an insured peril during the insurance period;
- Fire caused by an insured peril during the insurance period;
- Insect damage and plant disease except for insufficient or improper application of control measures; or
- Wildlife.

Insurance Period

Coverage begins on November 21 and ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest of the crop;
- Final adjustment of a claim;
- Abandonment of the crop; or
- November 20.

Important Dates

Duties in the Event of Damage or Loss

Notice of Loss - If a loss occurs notify your crop insurance agent:

- Within 72 hours of initial discovery of damage;
- If you previously gave notice of crop damage, you must also provide notice at least 15 days before the beginning of harvest to claim an indemnity; or
- At least 3 days before the date harvest should have started if the crop will not be harvested.

Coverage Levels and Premium Subsidies

Coverage level options range from 50 to 85 percent of your average yield (5-percent increments) and are subsidized as shown in the table below.

Item				Per	cent			
Coverage Level	50	55	60	65	70	75	80	85
Premium Subsidy	67	64	64	59	59	55	48	38
Your Premium Share	33	36	36	41	41	45	52	62

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300.

Price Elections

Coverage levels and price election percentages vary by grape type. The prices shown on page 2 are used to calculate premium and indemnity. The price used to determine your indemnity on unharvested acreage is the price election minus the harvest cost (\$35/ton).
