

Raleigh Regional Office — Raleigh, NC

Revised January 2017

Peanuts

Virginia

Crop Insured

All of your peanuts are insurable in the county if:

- The actuarial documents provide premium rates;
- They are a type designated in the special provisions;
- They are planted for marketing as farmers' stock peanuts; and
- You have a share in the crop.

Unless allowed by the special provisions or by written agreement, the policy does not cover peanuts that are:

- Planted to harvest as green peanuts;
- Interplanted with another crop; or
- Planted into an established grass or legume.

Available Coverage

See your state's actuarial documents at webapp.rma.usda.gov/apps/actuarialinformation/browser2017/CropCriteria.aspx for insurable counties. Peanuts may be insurable in other counties if specific criteria are met. Contact a crop insurance agent for details.

Causes of Loss

You are protected against the following:

- Adverse weather conditions, including natural perils such as hail, frost, freeze, wind, drought, and excess precipitation;
- Earthquake;
- Failure of irrigation water supply, if caused by an insured peril during the insurance year;
- Fire;
- Insects or plant disease, but not damage due to insufficient or improper application of control measures;
- Price change (for revenue protection);
- Volcanic eruption; or
- Wildlife.

Insurance Period

Coverage begins when the crop is planted and ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest;
- Final adjustment of a loss;
- Abandonment of the crop; or
- November 30, 2017.

Important Dates

Sales Closing Date March 15, 2017
Initial Planting Date April 11, 2017
Final Planting Date June 10, 2017
Acreage Report Date July 15, 2017

Reporting Requirements

Acreage Report - You must report all acres of the crop in which you have a share in the county, and provide a copy of your sheller contract to your crop insurance agent by the acreage reporting date if you elect to use the weighted average projected price under the yield protection insurance plan.

Duties in the Event of Damage or Loss

Notice of Loss - If a loss occurs you must:

- Protect the crop from further damage by providing sufficient care;
- Notify your crop insurance agent within 72 hours of your initial discovery of damage or loss of production (but not later than 15 days after the end of the insurance period); and
- Leave representative samples intact for each field of the damaged unit.

Coverage Options

You may buy crop insurance coverage under one of three insurance plans offered: Revenue Protection, Revenue Protection with Harvest Price Exclusion, or Yield Protection. Additional Options available are

Supplemental Coverage Option and Yield Exclusion Option.

Prevented Planting and Replanting

Prevented planting coverage is 50 percent of your production guarantee for timely planted acreage. For an additional premium, you may increase your prevented planting coverage.

You may receive a replanting payment if your peanuts are damaged by an insurable cause of loss so the remaining stand does not produce at least 90 percent of the production guarantee and it is practical to replant. The replanting payment per acre is \$95 multiplied by your share. Replanting payments are not available with CAT coverage.

Coverage Levels and Premium Subsidies

Coverage levels range from 50 to 85 percent of your approved yield. Your share of the premium is 100 percent minus the subsidy amount. An administrative fee of \$30 per crop per county applies, regardless of the acreage.

Item	Percent							
	50	55	60	65	70	75	80	85
Coverage Level	50	55	60	65	70	75	80	85
Premium Subsidy	67	64	64	59	59	55	48	38
Your Premium Share	33	36	36	41	41	45	52	62

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300.

Loss Example

A yield protection loss occurs when peanut production for the unit falls below the production guarantee because of damage from a covered cause of loss.

A revenue protection loss occurs when the value of production-to-count is less than the revenue protection guarantee due to a production loss and/or revenue loss.

Assume non-irrigated peanuts insured with an approved yield of 3,000 pounds per acre, 75-percent coverage level, a 100-percent share, and one basic unit. The projected election price is \$0.205 and the harvest price is \$0.211. Due to an insurable cause of loss, the production-to-count is 950 pounds.

Yield Protection

3,000	Pounds/Acre APH yield
x 0.75	Coverage Level
2,250	Pounds/Acre Guarantee
x \$0.205	Projected Price
\$461	Insurance Guarantee
950	Pounds Produced
x \$0.205	Projected or Harvest Price
\$195	Production-to-Count Value
\$461	Insurance Guarantee
- \$195	Production-to-Count Value
\$266	Indemnity/Acre

Revenue Protection

3,000	Pounds/Acre APH yield
x 0.75	Coverage Level
2,250	Pounds/Acre Guarantee
x \$0.205	Projected Price
\$461	Insurance Guarantee
950	Pounds Produced
x \$0.211	Projected or Harvest Price
\$200	Production-to-Count Value
\$461	Insurance Guarantee
- \$200	Production-to-Count Value
\$261	Indemnity/Acre

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
