## 2007 COMMODITY INSURANCE FACT SHEET

# Processing Beans

## Texas

### Crop Insured

The policy covers processing beans (**snap**) grown under the requirements of a processor contract executed by the acreage reporting date and that are not excluded from the contract at any time during the year.

### Counties Available

Bailey	Frio	Lamb
Parmer	Uvalde	

### Causes of Loss

Adverse weather conditions<sup>1</sup>  
 Failure of irrigation water supply<sup>2</sup>  
 Fire  
 Insects<sup>3</sup>  
 Plant disease<sup>3</sup>  
 Wildlife

<sup>1</sup>Includes excessive moisture that prevents timely harvesting and abnormal temperatures that result in bypassed acreage because too much acreage was ready for harvest than could be feasibly harvested, or the processing of such production was beyond the capacity of the processor. <sup>2</sup>If due to insurable causes. <sup>3</sup>Does not cover damage resulting from an insufficient or improper application of pest or disease control measures.

Note: We do not insure any acreage of canning or processing beans where snap or limas were planted in 2 successive crop years of the previous 4 or where sunflowers were planted the previous crop year.

### Insurance Period

Insurance will end at the earliest of: (1) the date the processing beans were destroyed, abandoned, harvested or should have been harvested but were not harvested; (2) the date you harvest sufficient production to fulfill your processor contract (if the contract stipulates a specific amount of production to be delivered); (3) final adjustment of a loss; or (4) September 20.

### Reporting Requirements

**Acreage Report**—By the acreage reporting date, you must report to your agent all acres of processing

beans in which you have a share, and provide a copy of all your processor contracts.

### Important Dates

Sales Closing .....	March 15
Final Planting Date—Frio, Uvalde.....	May 10
Bailey, Lamb, Parmer.....	July 20
Acreage Report—Frio, Uvalde.....	May 20
Bailey, Lamb, Parmer.....	July 31
Premium Billing .....	October 1

### Definitions

**Base Contract Price**—The price stipulated in the processor contract for the grade factor or sieve size that is designated in the special provisions, if applicable, without regard to discounts or incentives that may apply.

**Bypassed Acreage**—Land on which production is ready for harvest but the processor elects not to accept such production so it is not harvested.

**Good Farming Practices**—The cultural practices generally in use in the county for the crop to make normal progress toward maturity and produce at least the yield used to determine the production guarantee and are those required by the bean processor contract with the processing company, and recognized by the Cooperative State Research, Education, and Extension Service as compatible with agronomic and weather conditions in the county.

**Production Guarantee** — Number of tons guaranteed per acre determined by multiplying your average yield per acre (based on your records) times the coverage level you elect.

### Duties in the Event of Damage or Loss

(1) Protect the crop from further damage by providing sufficient care; (2) notify your agent within 72 hours

of your initial discovery of damage; and (3) leave representative samples intact for each field of the damaged unit.

### Price Elections

Price elections will be posted on the RMA Web site at: <http://www3.rma.usda.gov/apps/pricesinquiry/>

### Coverage Levels and Premium Subsidies Amount of Insurance

Insurance is provided against a decline in your average APH yield due to the perils named in the Causes of Loss section.

Coverage levels range from 50 to 75 percent of your average yield (for example, an average snap bean yield of 2 tons per acre would result in a 1.5 tons per acre guarantee at the 75-percent coverage level) and are subsidized as shown in the following table.

Item	Percent					
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Premium Share	33	36	36	41	41	45

For example, if you selected the 75-percent coverage level, your premium share would be 45 percent of the base premium:

Catastrophic (CAT) coverage is fixed at 50 percent of your average yield and 55 percent of the price election. CAT is 100-percent subsidized with no premium cost to you except for an administrative fee of \$100, regardless of the acreage.

### Loss Example

2.5	Average yield per acre (tons)
<u>x .65</u>	Coverage level
1.6	Tons per acre guarantee
<u>- .5</u>	Tons per acre produced
1.1	Tons per acre loss
<u>x \$150</u>	Price election
\$165	Gross indemnity per acre
<u>- 9</u>	Estimated premium (varies)
<b>\$156</b>	<b>Net indemnity per acre</b>
