2006 COMMODITY INSURANCE FACT SHEET

Stonefruit

Idaho, Oregon, Washington

Crop Insured

The crop insured will be all of each **stonefruit** crop (for example, fresh apricots, fresh freestone peaches, and fresh nectarines) you have a share and elect to insure that is grown in the county and for which premium rates are provided in the actuarial documents. The stonefruit shall be grown on trees that were commercially available when the trees were set out; are adapted to the area and are grown on a root stock that is adapted to the area; that are irrigated; have produced at least 200 lugs of fresh market produce per acre in a least one of the three most recent actual production history crop years (unless an inspection is done and approval is granted in writing); and that have reached at least the fifth growing season after set out.

Counties Available

Idaho: Canyon, Gem, Idaho, and Payette

Oregon: Jackson, Marion, Wasco, Washington, and Yamhill

Washington: Benton, Chelan, Douglas, Franklin, Grant, Okanogan, and Yakima

Causes of Loss

Causes of Loss: Adverse weather conditions; fire (unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the orchard); wildlife; eEarthquake; volcanic eruption; **or** failure of irrigation water supply, if due to an insured cause of loss.

In addition, the insurance provider will **not** insure against damage or loss of production due to: Disease or insect infestation, unless adverse weather prevents the proper application of control measures or causes properly applied control measure to be ineffective or causes disease or insect infestation for which no effective control mechanism is available; split pits

regardless of cause; or inability to market the insured crop for any reason other than actual physical damage from an insurable cause listed above (for example, an indemnity will not be paid if you are unable to market due to quarantine, boycott or refusal of any person to accept production).

Insurance Period

Coverage begins November 21, each crop year for Idaho, Oregon and Washington policies, except for the year of application (if your application is received after November 11, but prior to November 21, insurance will begin on the 10th day after your properly completed application is received).

The calendar date for the end of insurance is July 31, for all apricots; and September 30, for all nectarines and peaches. **Note:** For each subsequent crop year the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year.

Reporting Requirements

Acreage Report: You must report to your insurance agent all the acreage (insurable and non-insurable) of stonefruit in the county in which you have a share (your share at the time insurance attaches), reporting the crop by type and varietal grouping.

Important Dates

Sales Closing November 20
Production Reporting Date January 15
Acreage Report Date..... January 15

The dates shown above will apply to all Idaho, Oregon, and Washington counties where stonefruit insurance is available.

Administrative Fees

Catastrophic (CAT) Coverage: \$100 per crop per county.
Additional Coverage: \$30 per crop per county.
Waivers of administrative fees for **all** coverage levels (CAT and additional) are available for limited resource farmers.

Production Guarantees

Yields are based on actual production records reported to your insurance agent and/or company. Contact your insurance agent for specific details.

Coverage Levels & Price Election

Coverage Levels are a choice of **50 to 75 percent** of your approved average yield (5 percent increments). **Price Elections** are the price of compensation paid per lug in the event of a loss. Catastrophic (CAT) coverage is available at the 50 percent coverage level and 55 percent of maximum price election. For current prices, please contact your insurance agent.

Definitions

Direct Marketing: Sale of the insured crop directly to consumers without the intervention of an intermediary such as wholesaler, retailer, packer, processor, shipper, or buyer.

Harvest: The picking of mature stonefruit either by hand or machine.

Interplanted: Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Lug: A container of fresh stonefruit of specified weight. Lugs of varying sizes will be converted to standard lug equivalents on the basis of the following average net pounds of packed fruit: fresh apricots – 24 pounds per lug; fresh nectarines – 25 pounds per lug; and fresh freestone peaches – 22 pounds per lug.

Stonefruit: Any of the following crops grown for fresh market or processing: fresh apricots, fresh freestone peaches, fresh nectarines, processing apricots, processing cling peaches and processing freestone peaches (only fresh market crops are insurable in Idaho, Oregon and Washington).

Type: Class of stonefruit crop with similar characteristics that are grouped for insurance purposes.

Varietal group: A subclass of type.

Loss Example

Fresh Freestone Peaches: Assume 100-percent share; 70-percent coverage level; a 100-percent price election of \$4.50 per lug; and an average yield of 700 lugs pre acre actual production history (APH).

700	Lugs
<u>x .70</u>	Coverage level
490	Lugs per acre guarantee
<u>x 50.0</u>	Acres
24,500	Lugs per unit guarantee (or \$110,250 liability)
<u>-2,500</u>	Lugs of Actual Harvested Production
22,000	Lug per Unit Loss
<u>x \$4.50</u>	Price Election
\$ 99,000	Indemnity due policyholder (less insurance premium due)

Where to Purchase

All MPCl, including CAT coverage insurance policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers or at the RMA website: <http://www3.rma.usda.gov/tools/agents/companies/>
