

2017 Reference Year Adjustment Factors for Contract Seed Dry Beans

The double asterisk (**) in the table below designates which year's RYAF is to be used in adjusting the current year's T-yield (2017) for standard T-yield variable percentages or yield floor computations. The double asterisk RYAF is also used in determining YA yield substitution values for qualifying low yields occurring in 2016 and subsequent years.

For low actual yields in years 2015 and prior that are eligible for YA, remember the T-yields contained within the actuarial documents for 2015 and prior years are expressed in 2002-dollar equivalents. Use the RYAF designated with the single asterisk (*) to derive the corresponding years' T-yield in its 2017 equivalent value for YA substitution purposes.
