

2018 Reference Year Adjustment Factors for Contract Seed Dry Beans

The quadruple asterisk (****) in the table below designates which year's RYAF is to be used in adjusting the current year's T-Yield (2018) for standard T-Yield variable percentages or yield floor computations.

For low actual yields in years 2017 and 2016 that are eligible for YA, remember the T-Yields contained within the actuarial documents for 2017 and 2016 are expressed in 2015 dollar equivalents. Use the RYAF designation within the triple asterisk (***) to derive the corresponding year's T-Yield in its 2018 equivalent value for YA substitution purposes.

For low actual yields in years 2003 - 2015 that are eligible for YA, remember the T-yields contained within the actuarial documents for these years are expressed in 2002-dollar equivalents. Use the RYAF designated with the double asterisk (**) to derive the corresponding years' T-yield in its 2018 equivalent value for YA substitution purposes.

For low actual yields in years 2002 and prior that are eligible for YA, remember the T-yields contained within the actuarial documents for these years are expressed in 1987-dollar equivalents. Use the RYAF designated with the single asterisk (*) to derive the corresponding years' T-yield in its 2018 equivalent value for YA substitution purposes.

2018 REFERENCE YEAR ADJUSTMENT FACTORS					
Contract Seed Dry Beans (CSB)					
Crop Year	Columbia Basin	Palouse	Blue Mt WA/OR	Treasure Valley	Magic Valley/SE Idaho
1984	2.05			1.95	2.04
