

Spokane Regional Office — Spokane, WA

Revised December 2017

Cabbage

Alaska, Oregon, and Washington

Crop Insured

All green and red cabbage types in the county are insurable if:

- A premium rate is provided by the actuarial document;
- You have a share;
- They are planted with inspected transplants;
- If direct seeded, planted with hybrid seed unless otherwise permitted by the Special Provisions;
- They are planted within the planting periods designated in the special provisions;
- They are planted for harvest as marketable cabbage for fresh-market;
- They are planted for processing and grown under a processor contract executed before the acreage reporting date; and
- They are not excluded from the processor contract at any time during the crop year.

Cabbage is not insurable if:

- It is planted to savoy cabbage and Chinese cabbage, including other Oriental greens;
- It does not meet the rotation requirements contained in the special provisions; or
- Any acreage of the insured crop is damaged before the end of the planting period, so that a majority of producers in the area would normally not care for the crop further. The crop must be replanted unless the insurance provider agrees that it is not practical to replant.

Acreage Limitation - If your acreage of insurable cabbage types in the county for the current crop year exceeds 125 percent of the greatest number of acres of insurable cabbage types that you produced in the county for any 1 of the 3 previous crop years, your production guarantee (per acre) for the current crop year is reduced. Please refer to the special provisions of insurance, which include specifics regarding acreage limitations and the conditions when an insurance provider will approve a request.

Counties Available

Alaska - Matanuska-Susitna Valley County.

Oregon - Clackamas, Multnomah, and Marion counties.

Washington - Pierce and King counties.

Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- Earthquake;
- Failure of the irrigation water supply, if caused by an insured cause of loss during the insurance period;
- Fire;
- Insects or plant disease, but not damage due to insufficient or improper application of control measures;
- Volcanic eruption; or
- Wildlife.

We do not insure against damage or loss of production due to:

- Failure to market cabbage for any reason other than actual physical damage from an insured cause of loss that occurs during the insurance period (for example, the insurance provider will not pay an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production); or
- Damage that occurs or becomes evident after the end of the insurance period, including, but not limited to, damage that occurs or becomes evident after the cabbage has been placed in storage.

Insurance Period

Coverage begins on each unit or part of a unit the date the cabbage is planted in each planting period as listed above.

Insurance coverage ends with the earliest occurrence of one of the following:

- The date the crop should have been harvested;
- March 1 for fall-planted fresh types in Oregon;
- October 1 in Alaska; or
- December 31 in Oregon and Washington.

Important Dates

Alaska

Sales Closing March 15, 2018
 Initial Plant Date May 1, 2018
 Final Plant Date June 1, 2018
 Acreage Report Date July 15, 2018

Oregon and Washington

Sales ClosingFebruary 1, 2018
 Initial Plant Date ...March 1, April 21, June 11, 2018
 Final Plant DateApril 20, June 10, Aug 10, 2018
 Acreage Report Date .May 15, July 15, Aug 15, 2018

Dates are shown by planting periods respectively (spring, summer, and fall) and apply to all Alaska, Oregon, and Washington counties where cabbage insurance is available.

Guarantee Choices

Coverage is based on your actual production history (APH) with choices of variable percentages. Catastrophic Risk Protection (CAT) is available at the 50-percent coverage level of your approved average yield and 55 percent of the maximum price election. Limited and additional buy-up coverage is available from a 50- to a 75-percent coverage level of your approved average yield. You may choose only one price election for all the cabbage in the county insured under this policy, unless the special provisions provide different price elections by type.

Unit Structure

The cabbage policy also recognizes basic units by planting period, and allows further separation into optional units by type. For example, green type or red type.

Late and Prevented Planting

The late and prevented planting provisions of the basic provisions do not apply.

Replant Payments

Replanting payments are allowed if the crop is damaged by an insurable cause of loss so the remaining stand does not produce at least 90 percent of the production guarantee for the acreage and it is

practical to replant.

Administrative Fees

CAT coverage is \$300 per crop per county. Additional coverage is \$30 per crop per county.

Loss Example

Assume 75-percent coverage level and a 100-percent price election at \$7.70 per hundredweight (cwt); 250 cwt per acre yield for fresh market cabbage APH.

	250	cwt. per acre (APH)
x	0.75	Coverage level
	188	cwt. per acre guarantee
x	100	Acres
	18,800	cwt. unit guarantee
x	\$7.70	Price coverage
	\$144,760	Guarantee value
	6,200	cwt. harvested production
x	\$ 7.70	Price coverage
	\$47,740	Harvested value
	\$144,760	Guarantee value
-	\$47,740	Harvested value
	\$97,020	Indemnity due policyholder

Where to Buy Crop Insurance

All insurance policies, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at any USDA service center or on the RMA website at www.rma.usda.gov/tools/agent.html.
