Projected and Harvest Price
Commodity Exchange Price Provisions (CEPP) - Contains information necessary to set the projected price and the harvest price for the insured crop. Information includes the price discovery period, release dates, boards of trade used, and additional pricing information. Available at your crop insurance agent’s office and on the RMA website at www.rma.usda.gov.

Projected price - Used to calculate the premium, replant payment, and any prevented planting payment.
Harvest price - Used to value production to count under the Revenue Protection and the Revenue Protection with Harvest Price Exclusion plans.

Production Guarantees
Yield Protection Guarantee - Determined by multiplying the production guarantee by the projected price. The harvest price is not used.
Revenue Protection Guarantee - Determined by multiplying the production guarantee (per acre) by the greater of the projected price or the harvest price.
Revenue Protection with Harvest Price Exclusion Guarantee - Determined by multiplying the production guarantee (per acre) by the projected price.

Coverage Level and Premium Subsidy
You can choose to insure 50 to 85 percent of your approved average yield, in 5-percent increments. For example, at the 75-percent coverage level, your premium would be 45 percent of the total premium.
