2008 and Succeeding Crop Years

Eligible Plant List and Plant Price Schedule

Nursery Crop Insurance Program

- Alabama
- Arkansas
- Florida
- Georgia
- Kentucky
- Louisiana
- Mississippi
- South Carolina
- Tennessee

The price for each plant and size listed in the Eligible Plant List and Plant Price Schedule is your lowest wholesale price, as determined from your wholesale catalogs or price lists submitted in accordance with the Special Provisions, not to exceed the maximum price limits included in this Schedule. Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

The Eligible Plant List and Plant Price Schedule are parts of the nursery crop insurance program provided by the Federal Crop Insurance Corporation (FCIC), an agency of the United States Department of Agriculture (USDA).

The Eligible Plant List and Plant Price Schedule are used to:

1. Determine the eligibility of nursery plants for insurance.
2. Assist in estimating nursery plant inventory value.
3. Determine the cold protection requirements in accordance with the Nursery Crop Insurance Provisions.
4. Assist in establishing Field market value A and Field market value B for claim settlement in accordance with the Nursery Crop Insurance Provisions.

The following provides important information regarding the use of the Eligible Plant List.

NURSERY GROWER’S PRICE ENDORSEMENT – PILOT PROGRAM

Growers in eligible states who elect the Pilot Nursery Grower’s Price Endorsement may insure for a price that is higher than the Eligible Plant List maximum insurance price but less than or equal to their catalog/price list price. This pilot program is only available to growers in the following states at the current time:

<table>
<thead>
<tr>
<th>Alabama</th>
<th>Maryland</th>
<th>Pennsylvania</th>
</tr>
</thead>
<tbody>
<tr>

<td>New York</td>
<td>Washington</td>
</tr>
<tr>
<td>Kentucky</td>
<td>North Carolina</td>
<td></td>
</tr>
<tr>
<td>Louisiana</td>
<td>Oregon</td>
<td></td>
</tr>
</tbody>
</table>

CROP INSURANCE NOMENCLATURE FORMAT

Consistent use of plant names is key to the administration of the nursery crop insurance program. The Eligible Plant List and Plant Price Schedule use researched plant names taken from the DataScape Guide to Commercial Nomenclature and contain four forms of plant names defined as follows:

Botanical Name       The Latin, scientific, or legal form of a plant name. Parts of the name may be genus, specific epithet (species), subspecies, variety, and cultivar.
Commercial Botanical Name  The botanical form of a plant name (often including trademarked and/or registered cultivar names) used in commerce.

Common Name  The name by which a plant may be known in everyday commerce.

Invalid Botanical Name  A Latinized form of a plant name, which is incorrectly used to identify a plant.

Plants are sometimes sold commercially by a different name from the botanical name. In some cases, that name is one that taxonomists consider outdated or incorrect. In other cases, the name is one that is more often used in commercial trade. If such conditions are present, these invalid botanical names and commercial botanical names are listed with a “see” notation that points to the correct botanical name (e.g. *Acer x freemanii* ‘Autumn Blaze’ is followed by the statement, “See – *Acer x freemanii* ‘Jeffersred’” which is the correct botanical name).

**DETERMINING ELIGIBLE PLANT LIST PRICE OF UNLISTED CULTIVARS**

The Eligible Plant List (EPL) provides, for applicable plant genera, a stair-step approach for establishing insurable prices of *cultivars* not listed on the EPL at the genus, species, hybrid, subspecies, and variety taxonomic levels.

- A genus level name (e.g., *Rhododendron*) is always listed on the EPL if any cultivars are listed under the genus (e.g., *Rhododendron* ‘1000 Butterflies’). The genus level name may be used to price a new cultivar that is marketed as a genus/cultivar name without listing a species name.

- A genus/species name (e.g., *Acer rubrum*) is always listed on the EPL if any cultivars are listed under the species (e.g., *Acer rubrum* ‘Autumn Flame’). The genus/species name may be used to price a new cultivar that is marketed with the genus/species name.

- A genus/hybrid name (e.g., *Acer x freemanii*) is always listed if any cultivars are listed under the genus/hybrid name (e.g., *Acer x freemanii* ‘Armstrong’). The genus/hybrid name may be used to price a new cultivar that is marketed with the genus/hybrid name.

- A genus/species/subspecies (e.g., *Cedrus libani* ssp. *atlantica*) or variety name (e.g., *Acer palmatum* var. *dissectum*) is always listed if any cultivars are listed under the subspecies (e.g., *Cedrus libani* ssp. *atlantica* ‘Aurea’) or variety name (e.g., *Acer palmatum* var. *dissectum* ‘Garnet’). The genus/species/subspecies or variety name may be used to price a new cultivar that is marketed with the genus/species/subspecies or variety name.
The example below illustrates how a new, unlisted cultivar (‘XX’) should be priced on the EPL:

<table>
<thead>
<tr>
<th>Name not found on the EPL</th>
<th>Name to use on EPL for pricing</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>Rhododendron</em> ‘XX’</td>
<td><em>Rhododendron</em></td>
</tr>
<tr>
<td><em>Acer rubrum</em> ‘XX’</td>
<td><em>Acer rubrum</em></td>
</tr>
<tr>
<td><em>Acer x freemanii</em> ‘XX’</td>
<td><em>Acer x freemanii</em></td>
</tr>
<tr>
<td><em>Cedrus libani</em> ssp. <em>atlantica</em> ‘XX’</td>
<td><em>Cedrus libani</em> ssp. <em>atlantica</em></td>
</tr>
<tr>
<td><em>Acer palmatum</em> var. <em>dissectum</em> ‘XX’</td>
<td><em>Acer palmatum</em> var. <em>dissectum</em></td>
</tr>
</tbody>
</table>

This pricing order must be followed for unlisted cultivars. For example, a genus level price should not be used if the botanical name of the unlisted plant includes a species name that is listed on the EPL, nor should the species level price be used if the botanical name includes a subspecies or variety name that is listed on the EPL. Likewise, if the cultivar name of a plant is listed on the EPL, the price for that plant should always be determined at the correct taxonomic level based on the plant name.

PLANTTYPES

All plant material is classified in one of the plant types shown below. For administering the nursery crop insurance program, plants will carry a designation contained in this list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AN</td>
<td>Annuals</td>
</tr>
<tr>
<td>BE</td>
<td>Broadleaf Evergreen Trees</td>
</tr>
<tr>

<td>Broadleaf Evergreen Shrubs</td>
</tr>
<tr>
<td>CE</td>
<td>Coniferous Evergreen Trees</td>
</tr>
<tr>
<td>CS</td>
<td>Coniferous Evergreen Shrubs</td>
</tr>
<tr>
<td>DS</td>
<td>Deciduous Shrubs</td>
</tr>
<tr>
<td>DT</td>
<td>Deciduous Trees (Shade and Flower)*</td>
</tr>
<tr>
<td>FN</td>
<td>Fruit and Nut Trees</td>
</tr>
<tr>
<td>FO</td>
<td>Foliage</td>
</tr>
<tr>
<td>GC</td>
<td>Ground Cover and Vines</td>
</tr>
<tr>
<td>HP</td>
<td>Herbaceous Perennials</td>
</tr>
<tr>
<td>PC</td>
<td>Palms and Cycads</td>
</tr>
<tr>
<td>RO</td>
<td>Roses</td>
</tr>
<tr>
<td>SF</td>
<td>Small Fruits</td>
</tr>
<tr>
<td>LI</td>
<td>Liners**</td>
</tr>
</tbody>
</table>

*The Deciduous Trees plant type includes deciduous conifer trees.

**See the definition of “Liners” in the Plant Size section of this document. Liners are reported as a separate plant type, inclusive of all other plant types.
STORAGE KEYS

Some container plants require cold protection to retain insurance coverage against cold damage. The cold protection requirements are listed on the Eligible Plant List for each insurable container plant through the use of the storage key (SK) code. Storage key code specifications are detailed in Appendix B.

HARDINESS ZONE DESIGNATIONS

All counties are assigned a single hardiness zone (HZ) designation for insurance purposes. These assignments are listed in Appendix A and affect the insurability for both container and field grown material.

CONTAINER INSURABLE HARDINESS ZONES

Container plant insurability is limited to the hardiness zone (HZ) or range of hardiness zones specified. These zones are listed under “Req” (requiring cold protection) and “Not Req” (not requiring cold protection).

Hardiness zone (HZ) insurability, container example:

<table>
<thead>
<tr>
<th>Insurable HZ</th>
</tr>
</thead>
<tbody>
<tr>
<td>Req</td>
</tr>
<tr>
<td>2 – 6</td>
</tr>
</tbody>
</table>

The plant is insurable in zones 2-8 and is not insurable in hardiness zones 1 and 9-11.

FIELD GROWN MINIMUM HARDINESS ZONES

The Eligible Plant List designates the minimum hardiness zone for each insurable field grown plant. Field grown plant material is not insurable below the minimum hardiness zone specified for each plant.

Hardiness zone (HZ) insurability, field grown example:

<table>
<thead>
<tr>
<th>Minimum Field HZ</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
</tr>
</tbody>
</table>

The plant is insurable in zones 5-11 and is not insurable in hardiness zones 1-4.
PLANT SIZE

All eligible plants are considered either field grown or container grown material with sizes listed for each category (practice).

Field grown plants are listed by plant size for height, width, or caliper. Caliper is determined by measuring tree diameter 6 inches above the soil line up to and including a caliper of 4 inches and 12 inches above the soil line for larger sizes. Plant sizes below the smallest listed in the Base Price Table are not insurable.

A seedling size is available for two plant types: deciduous tree (DT) and coniferous evergreen tree (CE). A seedling is a DT or CE that is at least 6 inches high and less than 18 inches high. Rounding is not permitted.

Plants in containers where the diameter is 3 inches or greater at the widest point of the container interior are listed by the container size with volume units of measure (e.g. quart, gallon). No plant sizes (height, width, or caliper) are listed for plant material in containers. Each cell of insurable multiple-cell nursery containers (cellpacks, jumbo packs, six packs, pony packs, etc.) will be valued as a separate plant. Container size is measured by actual volume in gallons as specified in the Special Provisions. Use the worksheet shown in Appendix D to calculate container gallon size if the plant inventory container size is unknown. The worksheet includes formulas for both round and square (rectangular) containers.

Liners in containers (trays with individual cells) are insurable. Liners are defined as plants produced in standard nursery containers that are equal to or greater than 1 inch in diameter (including trays containing 200 or fewer individual cells, unless specifically provided by the Special Provisions) but less than 3 inches in diameter at the widest point of the container or cell interior, have an established root system, and meet all other conditions specified in the Special Provisions. Liners are listed by the number of cells per tray. Each cell will be valued as a separate plant.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured’s wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement will take precedence. An equivalency table for the two measurement methods is included in each Base Price Table.

Container or liner sizes below the smallest size listed in the Base Price Table are not insurable.
SOFTWARE AVAILABILITY

The Eligible Plant List and Plant Price Schedule are available on compact disk (CD) for use on personal computers. The software is a Windows application and allows:

1. Searching for a plant by botanical name, commercial botanical name, common name, or key word. The multiple search function is designed to assist those who may not be familiar with scientific plant nomenclature.

2. Compiling a plant inventory list for estimating nursery inventory value. The program allows the plant inventory list to be printed as shown in the following example.

Please note that the CD containing the application program is intended to provide convenient access to eligible plant information and help estimate the nursery plant inventory value. The CD is not required for processing insurance coverage.

SYSTEM REQUIREMENTS

Minimum:
- Pentium 233 CPU or better
- 64 MB RAM or more
- Windows 95, Windows 98, Windows 2000, Windows NT or Windows XP
- 32 MB available disk space or more
- Video resolution of 800 x 600
- 256 color display

Recommended:
- Pentium 500 CPU or better
- 128 MB RAM or more
- Windows 2000, Windows NT or Windows XP
- 32 MB available disk space or more
- Video resolution of 800 x 600
- True Color (24-bit) color display

Note: Windows Vista was not finalized at the time of this software release.

SAMPLE CROP INVENTORY VALUATION ESTIMATE

A sample of the Crop Inventory Valuation Estimate that is produced by the software is shown on the following three pages.

**Crop Inventory Valuation Estimate**  
2008 and Succeeding Crop Years Pricing

| Common Name | Commercial Botanical Name or Botanical Name/ \n| Size Practice Qty Ins. Value Ins. Price |
|-------------|------------------------------------------|
| <3"-36/tray Container | 1.00 * 300 300.00 |
| <3"-36/tray Container | 1.06 300 318.00 |
| Liners (LI) Subtotal | 4250 $2,959.50 |
| Container Total | 5450 $13,403.50 |

For this estimate to be accurate, you must enter your lowest wholesale price for each plant size, except for plants with prior damage. For plants with prior damage, enter the reduced plant value. If you have elected the NGPE and the plant price has no prior damage, you may enter a price less than or equal to your lowest wholesale catalog price.

The plant prices that will be used in settling any claims will be the lower of the FCIC maximum price limit or your lowest wholesale price as calculated from your wholesale catalog or price list submitted in accordance with the Special Provisions, unless the NGPE is selected in which case the upgraded plant price will be used (provided you have submitted sales records in accordance with the Nursery Grower’s Price Endorsement and the upgraded plant price is less than or equal to the price on the sales records). Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

* denotes price from grower wholesale catalog, price list, or a reduced plant value for plants with prior damage
*E denotes Nursery Grower's Price Endorsement upgraded plant price from the grower wholesale catalog or price list that is 50% or more over the EPL maximum insurance price.
*e denotes Nursery Grower's Price Endorsement upgraded plant price from the grower wholesale catalog or price list that is less than 50% over the EPL maximum insurance price.
### Deciduous Shrubs

*Berberis thunbergii* var. *atropurpurea* 'Crimson Pygmy'

- **Crimson Pygmy Red Barberry**
  - 12 in. Field-H/W: 10.36
  - 15 in. Field-H/W: 12.54

*Rhododendron* 'Northern Lights'

- **Northern Lights Azalea**
  - 18 in. Field-H/W: 15.00
  - 24 in. Field-H/W: 20.77

*Viburnum x burkwoodii*

- **Burkwood Viburnum**
  - 4 ft. Field-H/W: 40.00
  - 5 ft. Field-H/W: 57.78

#### Deciduous Shrubs (DS) Subtotal
- 600
- $15,645.00

### Deciduous Trees

*Fraxinus pennsylvanica* 'Marshall Seedless'

- **Marshall Seedless Green Ash**
  - 3 1/2 in. Field-Cal: 225.00
  - 4 in. Field-Cal: 275.00

#### Deciduous Trees (DT) Subtotal
- 200
- $50,000.00

### Field Grown Total
- 800
- $65,645.00

For this estimate to be accurate, you must enter your lowest wholesale price for each plant size, except for plants with prior damage. For plants with prior damage, enter the reduced plant value. If you have elected the NGPE and the plant price has no prior damage, you may enter a price less than or equal to your lowest wholesale catalog price.

The plant prices that will be used in settling any claims will be the lower of the FCIC maximum price limit or your lowest wholesale price as calculated from your wholesale catalog or price list submitted in accordance with the Special Provisions, unless the NGPE is selected in which case the upgraded plant price will be used (provided you have submitted sales records in accordance with the Nursery Grower's Price Endorsement and the upgraded plant price is less than or equal to the price on the sales records). Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

* denotes price from grower wholesale catalog, price list, or a reduced plant value for plants with prior damage

*E* denotes Nursery Grower's Price Endorsement upgraded plant price from the grower wholesale catalog or price list that is 50% or more over the EPL maximum insurance price.

*e* denotes Nursery Grower's Price Endorsement upgraded plant price from the grower wholesale catalog or price list that is less than 50% over the EPL maximum insurance price.
Eligible plant insurance prices are based on:

- **Plant Type**
  - Practice (container/field grown)
  - Measurement Method

The two growing practices involve four different plant size measurement methods:

- **Container**
  - Volume (gal.) - 3” diameter or more
  - Cells/tray - 1” to <3” diameter (liners)

- **Field Grown**
  - Caliper (in.)
  - High/Wide (in. or ft.)

Included in this section are the Base Price Tables for each of the plant types showing a base price for each eligible size and practice (container and field).

The main body of this document, titled “Eligible Plant List and Plant Price Schedule” (EPLPPS), shows a factor for each eligible plant name and valid measurement method. The container factor will be used for liners as well as for containers that measure 3 inches in diameter or more at the widest point.

The insurance price for each plant size is the grower’s lowest wholesale catalog price (from catalogs or price lists submitted in accordance with the Special Provisions) not to exceed the maximum price calculated by multiplying the plant factor on the EPLPPS for the plant by the base price on the Base Price Table for that plant type and measurement method. Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.
**EXAMPLES OF INSURANCE PRICE CALCULATION:**

A grower wants to insure his Autumn Blaze maples (*Acer x freemanii* ‘Jeffersred’). Examples of price calculations for each measurement method follow.

### PRICE CALCULATION EXAMPLE – CONTAINER

<table>
<thead>
<tr>
<th>Plant Name:</th>
<th><em>Acer x freemanii</em> ‘Jeffersred’</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plant Type:</td>
<td>DT</td>
</tr>
<tr>
<td>Size:</td>
<td>5 gal.</td>
</tr>
<tr>
<td>Measurement Method:</td>
<td>Container/Liner X Caliper High/Wide</td>
</tr>
<tr>
<td>Factor:</td>
<td>1.13</td>
</tr>
</tbody>
</table>

**Base Price:** $19.00

**Calculation of Max. Price:**

\[
\text{Max. Price} = \text{Base Price} \times \text{Factor} = 19.00 \times 1.13 = 21.47
\]

**Insurance Price:** Lesser of Max. Price or Grower Lowest Wholesale Price

\[
\begin{align*}
\text{Max. Price} & = 21.47 \\
\text{Grower Lowest Wholesale Price} & = 23.50 \\
\text{Insurance Price} & = 21.47
\end{align*}
\]

Insurance price is $21.47 in this example.

### PRICE CALCULATION EXAMPLE – LINER

<table>
<thead>
<tr>
<th>Plant Name:</th>
<th><em>Acer x freemanii</em> ‘Jeffersred’</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plant Type:</td>
<td>DT</td>
</tr>
<tr>
<td>Size:</td>
<td>37–71/Tray</td>
</tr>
<tr>
<td>Measurement Method:</td>
<td>Container/Liner X Caliper High/Wide</td>
</tr>
<tr>
<td>Factor:</td>
<td>1.13</td>
</tr>
</tbody>
</table>

**Base Price:** $.72

**Calculation of Max. Price:**

\[
\text{Max. Price} = \text{Base Price} \times \text{Factor} = .72 \times 1.13 = .81
\]

**Insurance Price:** Lesser of Max. Price or Grower Lowest Wholesale Price

\[
\begin{align*}
\text{Max. Price} & = .81 \\
\text{Grower Lowest Wholesale Price} & = .85 \\
\text{Insurance Price} & = .81
\end{align*}
\]

Insurance price is $.81 in this example.
PRICE CALCULATION EXAMPLE – CALIPER

Plant Name:    Acer x freemanii ‘Jeffersred’

Plant Type:   DT
(from Eligible Plant List)

Size:        3”

Measurement Method: Container/Liner___ Caliper___ High/Wide___

Factor:      1.12
(from Eligible Plant List)

Base Price:  $ 181.00

Calculation of Max. Price:

\[
\frac{181.00}{\text{Base Price}} \times 1.12 = \frac{202.72}{\text{Max. Price}}
\]

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

\[
\frac{202.72}{\text{Max. Price}} \quad \frac{165.00}{\text{Grower Lowest Wholesale Price}}
\]

Insurance price is $165.00 in this example.

PRICE CALCULATION EXAMPLE – HIGH/WIDE

Plant Name:    Acer x freemanii ‘Jeffersred’

Plant Type:   DT
(from Eligible Plant List)

Size:        5 ft.

Measurement Method: Container/Liner___ Caliper___ High/Wide___

Factor:      1.22
(from Eligible Plant List)

Base Price:  $ 48.00

Calculation of Max. Price:

\[
\frac{48.00}{\text{Base Price}} \times 1.22 = \frac{58.56}{\text{Max. Price}}
\]

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

\[
\frac{58.56}{\text{Max. Price}} \quad \frac{52.00}{\text{Grower Lowest Wholesale Price}}
\]

Insurance price is $52.00 in this example.
The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

<table>
<thead>
<tr>
<th>Size</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>72-200/tray</td>
<td>0.38</td>
</tr>
<tr>
<td>37-71/tray</td>
<td>0.48</td>
</tr>
<tr>
<td>&lt;3&quot;-36/tray</td>
<td>0.67</td>
</tr>
<tr>
<td>Pot</td>
<td>0.80</td>
</tr>
<tr>
<td>1 Qt.</td>
<td>1.20</td>
</tr>
<tr>
<td>2 Qt.</td>
<td>1.90</td>
</tr>
<tr>
<td>1 Gal.</td>
<td>3.20</td>
</tr>
<tr>
<td>2 Gal.</td>
<td>5.60</td>
</tr>
<tr>
<td>3 Gal.</td>
<td>7.90</td>
</tr>
<tr>
<td>5 Gal. &amp; up</td>
<td>12.00</td>
</tr>
</tbody>
</table>

* Equivalence:
- 72-200/tray qualified liners < 2" diameter, square side, or longest rectangular side
- 37-71/tray 2" to < 2-3/8" diameter, square side, or longest rectangular side
- <3"-36/tray 2-3/8" to < 3" diameter, square side, or longest rectangular side
**Base Price Table - Broadleaf Evergreen Trees (BE)**

The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

## Base Price Table - Coniferous Evergreen Shrubs (CS)

The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

* Equivalence: 72-200/tray qualified liners < 2" diameter, square side, or longest rectangular side
   37-71/tray 2" to < 2-3/8" diameter, square side, or longest rectangular side
   <3"-36/tray 2-3/8" to < 3" diameter, square side, or longest rectangular side
The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured’s wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

* Equivalence 72-200/tray qualified liners < 2" diameter, square side, or longest rectangular side
* Equivalence 37-71/tray 2" to < 2-3/8" diameter, square side, or longest rectangular side
* Equivalence <3"-36/tray 2-3/8" to < 3" diameter, square side, or longest rectangular side
The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.
