</table>

Note: The table includes various species and cultivars of Thuja and Platycladus, with respective factors, SK ratings, and minimum HZ values. The table is organized by botanical name and includes columns for crop type, factor, SK, insurable HZ, not required, caliper, field grown factors, high/wide, and minimum HZ. Specific annotations for each entry are provided, indicating the type of Arborvitae and whether they are container or field grown. AL, AR, FL, GA, KY, LA, MS, SC, TN.

</table>
Woody plants (plant types): BE, BS, CE, CS, DS, DT, FN, GC, PC, RO, SF
(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

Hardiness Zones 1-6
Storage, such as:
1. Poly covered walk-in Quonset House with functional irrigation and
   a. Supplemental heat or
   b. Poly liners or
   c. Thermo blankets.
2. Storage barns or buildings proven satisfactory in previous seasons.

Hardiness Zones 7-8
Storage, such as:
1. Poly covered walk-in Quonset Houses or
2. Low Hoop Houses or
3. Pit frames covered with poly or
4. Outside beds covered with thermo blankets or poly.

Hardiness Zones 9-10
Storage, such as:
1. Overhead irrigation with sprinklers capable of providing complete coverage of
   the crop throughout the duration of cold temperatures or
2. Plastic film covered structures without heat or overhead irrigation or
3. Plants covered with thermo blankets or poly during periods of cold temperature.
   Over-sized containerized plants (plants that are too large) should be laid on their
   side prior to covering.

NOTE: If wind conditions prevent effective use of overhead irrigation, either strategy
#2 or #3 must be followed.

NOTE: The storage temperature must be established to prevent above freezing low
temperature damage to the species being produced, including protection from
dry, desiccating winds, either by covering the plants, use of overhead
irrigation, or wind blocks.

Plants to be stored in a greenhouse or a shadehouse covered with plastic film during
the cold season and equipped with irrigation and a heating system, or a below bench
and/or aisle irrigation system capable of maintaining the air temperature around the
plants above critical minimums for the crops grown (minimum water temperature for
heating purposes: 70º F).

Hardiness Zone 11
Storage, such as:
1. Overhead irrigation with sprinklers capable of providing complete
2. coverage of the crop throughout the duration of cold temperatures or
3. Plants covered with thermo blankets or poly during periods of cold temperature.
   Over-sized containerized plants (plants that are too large) should be laid on their
   side prior to covering.
STORAGE KEY G2

Woody plants (plant types): BE, BS, CE, CS, DS, DT, FN, GC, PC, RO, SF
(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

NOTE: If other than white or clear poly is used to cover plants for cold protection, it must be removed prior to sun exposure the following day.

Hardiness Zones 1-6
Storage, such as:
1. Poly covered walk-in Quonset Houses or
2. Low Hoop Houses or
3. Pit frames covered with poly or
4. Outside beds covered with thermo blankets or poly.

Hardiness Zones 7-8
Storage, such as:
1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures or
2. Plastic film covered structures without heat or overhead irrigation or
3. Plants covered with thermo blankets or poly during periods of cold temperature.
   Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

Hardiness Zones 9-10
Storage, such as:
Plants covered with thermo blankets or poly during periods of cold temperature.
Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

Plants to be stored in a greenhouse or a shadehouse covered with plastic film during the cold season and equipped with irrigation and a heating system, or a below bench and/or aisle irrigation system capable of maintaining the air temperature around the plants above critical minimums for the crops grown (minimum water temperature for heating purposes: 70º F).

Hardiness Zone 11
No cold protection required.
STORAGE KEY G3

Foliage (plant types): FO, PC
(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

Hardiness Zones 1-9A
Plants to be stored in a greenhouse, covered with glass or plastic film, equipped with irrigation and a heating system.

Hardiness Zones 9B-10A
Plants to be stored in a greenhouse or a shadehouse covered with plastic film during the cold season and equipped with irrigation and a heating system, or a below bench and/or aisle irrigation system capable of maintaining the air temperature around the plants above critical minimums for the crops grown (minimum water temperature for heating purposes: 70º F).

Hardiness Zones 10B-11
Plants to be stored in a shadehouse covered with plastic film during the cold season and equipped with irrigation system.
STORAGE KEY G4

Herbaceous (plant types): AN, GC, HP, SF
(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

Hardiness Zones 1-6
Storage, such as:
1. Glass, fiberglass, polycarbonate or poly covered greenhouse with supplemental heat and irrigation or
2. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist or
3. Poly covered structures with irrigation.

Hardiness Zones 7-8
Storage, such as:
1. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist or
2. Poly covered structures with irrigation.

Hardiness Zones 9-10A
Storage, such as:
1. Poly covered structures with supplemental heat and irrigation or
2. Poly covered structures with irrigation or
3. Outside beds covered with thermal blankets during periods of cold weather.

Hardiness Zones 10B-11
Overhead irrigation from sprinklers.

Plants to be stored in a greenhouse or a shadehouse covered with plastic film during the cold season and equipped with irrigation and a heating system, or a below bench and/or aisle irrigation system capable of maintaining the air temperature around the plants above critical minimums for the crops grown (minimum water temperature for heating purposes: 70° F).
STORAGE KEY R1

Hardiness Zones 1-8
Storage, such as:
1. Glass or poly greenhouses with supplemental heat and irrigation or
2. Pot-in-Pot with adequate drainage to prevent water-logging and excess salt accumulation.

STORAGE KEY R2

Hardiness Zones 1-8
Storage structures, such as glass or poly greenhouses with supplemental heat and irrigation.
Alaska Hardiness Zones 2-3
Containers standing or laid on their side; containers mulched with 6-10 inches of straw, hay, leaves, evergreen boughs, or wood chips from the top of the container, mulch material covered with netting or floating row cover to hold mulch in place, if necessary, or

Containers/B&B set in trench and backfilled with soil, straw, hay or leaves.

NOTE: Rodent proofing required.

Hardiness Zones 1-6
Mandatory cold protection level 1 (Winter Long Protection)

Storage, such as:
1. Co-poly (white preferred) covered walk-in Quonset House and poly liners or
2. Thermal blankets covered with poly or

Hardiness Zones 7-8
Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:
1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

Mandatory cold protection level 1 (Winter Long Protection)

Storage, such as:
1. Co-poly (white preferred) covered walk-in Quonset House and poly liners or
2. Thermal blankets covered with poly or
STORAGE KEY S3

Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:
1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

STORAGE KEY S4

Hardiness Zones 1-6
Mandatory cold protection level 1 (Winter Long Protection)

Storage structures, such as controlled environment greenhouses.

Hardiness Zones 7-8
Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:
1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

STORAGE KEY S5

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures, such as controlled environment greenhouses.
STORAGE KEY NR

No cold protection required.

STORAGE KEY XX

The “XX” code does not communicate any information regarding storage requirements. Rather, it is used in situations where it is necessary to communicate that field grown material is insurable and container material is not insurable.
INSURANCE PRICE CALCULATION WORKSHEET

SAMPLE FOR REPRODUCTION

Plant Name:

Plant Type:
(from Eligible Plant List)

Size:

Measurement Method: Container/Liner Caliper High/Wide

Factor:
(from Eligible Plant List)

Base Price:
(from Base Price Table for Plant Type)

Calculation of Max. Price:

\[
\text{Base Price} \times \text{Factor} = \text{Max. Price}
\]

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

Max. Price Grower Lowest Wholesale Price
CONTAINER VOLUME CALCULATION WORKSHEET

Round container volume calculation:

Calculate radius R₁ and R₂ in inches using diameter D₁ and D₂ in inches:

\[ R₁ \text{ (inches)} = \frac{D₁}{2} \]

\[ R₂ \text{ (inches)} = \frac{D₂}{2} \]

Calculate volume in gallons using R₁, R₂ and H in inches:

\[
\text{Volume (gallons)} = \frac{3.1416 \times (H÷3) \times [(R₁ \times R₁) + (R₁ \times R₂) + (R₂ \times R₂)]}{231}
\]

Note: Measurements for D₁, D₂ and H should be taken inside the container.
Square/rectangular container volume calculation:

Calculate top (Y) and bottom (Z) area in square inches using \( T_1 \), \( T_2 \), \( B_1 \), and \( B_2 \) in inches:

\[
Y \text{ (square inches)} = T_1 \times T_2
\]

\[
Z \text{ (square inches)} = B_1 \times B_2
\]

Calculate volume in gallons using \( Y \) and \( Z \) in square inches and \( H \) in inches:

\[
(\frac{H}{3}) \left( \frac{Y + Z + \sqrt{Y \times Z}}{231} \right)
\]

Volume (gallons) = \[
\frac{(H/3) (Y + Z + \sqrt{Y \times Z})}{231}
\]

Note: Measurements for \( T_1 \), \( T_2 \), \( B_1 \), \( B_2 \) and \( H \) should be taken inside the container.
