MACHINE HARVESTED PICKLING CUCUMBER INSURANCE STANDARDS HANDBOOK

**2014 and Succeeding Crop
Years**

**RISK MANAGEMENT AGENCY
KANSAS CITY, MO 64133**

TITLE: MACHINE HARVESTED PICKLING CUCUMBER INSURANCE STANDARDS HANDBOOK	NUMBER: 20230U
EFFECTIVE DATE: 2014 and succeeding crop years	ISSUE DATE: December 19, 2013
SUBJECT: Provides the underwriting procedures and instructions for administering the Pickling Cucumber crop insurance program.	OPI: Actuarial and Product Design Division
	APPROVED: /s/ Tim B. Witt Deputy Administrator for Product Management

REASON FOR ISSUANCE

This handbook is being issued to provide underwriting standards for administering the Pickling Cucumber Crop Insurance Program beginning with the 2014 crop year.

MACHINE HARVESTED PICKLING CUCUMBER INSURANCE STANDARDS HANDBOOK

PART 1 GENERAL INFORMATION AND RESPONSIBILITIES

1 General Information

A. Purpose

The purpose of the handbook is to provide instructions for establishing crop insurance coverage and to adjust losses in accordance with the Pickling Cucumber Crop Provisions (14-0132) and as a supplement to the Crop Insurance Handbook - FCIC 18010 (CIH), the Loss Adjustment Manual - FCIC 25010 (LAM), the Machine Harvested Pickling Cucumber Loss Adjustment Standards Handbook - FCIC 20230L (LASH), and any other issuance that may be referenced herein.

B. Authority

The Pickling Cucumber Crop Insurance Program is approved by the FCIC Board of Directors under Section 508(h) of the Federal Crop Insurance Act.

C. Program Duration

The Pickling Cucumber Crop Insurance Program is available beginning with the 2014 crop year and is authorized until cancelled or extended by the FCIC Board of Directors.

2 Responsibilities

A. AIP Responsibilities

AIPs will utilize this handbook and other standards, procedures, and instructions as authorized by RMA for the purpose of selling and servicing the Machine Harvested Pickling Cucumber Crop Insurance Program. AIPs should report program issues or concerns to RMA.

B. Insured's Responsibilities

To be eligible for the Pickling Cucumber Crop Insurance Program, insureds must comply with all terms and conditions of the Basic Provisions and the Machine Harvested Pickling Cucumber Crop Provisions.

3-10 (Reserved)

PART 2 STANDARDS AND INSTRUCTIONS

11 Operational References

In general, the CIH, LAM, and LASH apply to the Machine Harvested Pickling Cucumber Crop Insurance Program. Exceptions, changes, and additions necessary for and unique to pickling cucumbers are referenced in this handbook. All procedures, rules, and requirements for Category B APH crops apply except as noted herein, and are supplemented with additional instructions in this handbook.

12 Overview of Changes

The Machine Harvested Pickling Cucumber Crop Insurance Program is new for the 2014 crop year. Any changes to policy documents, underwriting rules, etc. for succeeding crop years will be issued prior to the contract change date.

13-20 (Reserved)

PART 3 CROP INSURANCE HANDBOOK

21 General Changes and Additions

Changes and additions to the CIH for machine harvested pickling cucumbers are described in this part. Sections of the CIH not listed below, but that are applicable to category B crops also apply to machine harvested pickling cucumbers.

22 CIH Part 2, Section 1, Subparagraph 201B - Written Agreements

The program requirements in section 1 apply, except for subparagraph 201B which indicates insureds may request coverage by written agreement if authorized by the policy. Written agreements are not available for pickling cucumbers.

23 CIH Part 2, Section 2, Paragraph 237 - Price

A. Price Election Determination

- (1) The price election for each unit is calculated using the base contract prices contained in the producer's production contract and is calculated as follows:
 - (a) Multiply each base contract price by the applicable average factor;
 - (b) Total the results of section (1)(a); and
 - (c) Multiply the result of section (1)(b) by the price election percentage.
- (2) The average grade factors are determined as follows:
 - (a) Total the number of bushels produced, by grade and crop year, for each year of production history in the APH database (include only those grades with a base contract price for the current crop year);
 - (b) Divide each result of section 2(a) by the total number of bushels for all grades included in section 2(a) and produced in the applicable crop year (e.g., 7,755 bushels of grade 2B produced in crop year 2011 ÷ 52,169 total bushels produced in crop year 2011 = 14.9 percent grade 2B);
 - (c) Total the results of section 2(b), by grade; and
 - (d) Divide each result of section 2(b) by the number of years of production history. Include any year for which grade factors specified in the Special Provisions are used in the price election computation. Grade factors in the Special Provisions are used in the computation when there are less than four years of production history. For example, if only three years of production are included in the APH database, the grade factors in the Special Provisions will be used for the one year needed to complete four years of grade factors.

23 CIH Part 2, Section 2, Paragraph 237 - Price (Continued)

A. Price Election Determination (continued)

For example, assuming the following base contract prices, average grade factors and elected price election percentage, the price election is determined as follows:

- Base contract price for grade 2A is \$6.00;
- Base contract price for grade 2B is \$6.50;
- Base contract price for grade 3A is \$6.50;
- Base contract price for grade 3B is \$4.70;

The grade factors (results of paragraph (b) above or the grade factors specified in the Special Provisions, as applicable) are:

Year	Grade 2A	Grade 2B	Grade 3A	Grade 3B
2010	5.0%	20.0%	40.0%	35.0%
2011	6.9%	14.9%	39.1%	39.1%
2012	8.0%	13.9%	40.4%	37.7%
2013	10.9%	12.9%	39.8%	36.4%
Average Grade Factor	7.7%	15.4%	39.8%	37.1%

The elected price election percentage is 100.0%

Grade	Base Contract Price		Average Grade Factor	=	
2A	\$6.00	x	7.7%	=	\$0.46
2B	\$6.50	x	15.4%	=	\$1.00
3A	\$6.50	x	39.8%	=	\$2.59
3B	\$4.70	x	37.1%	=	\$1.74
			Total		\$5.79

\$5.79 total x 100.0% price election percentage
= \$5.79 price election

The following Grade factor and Average Yield Worksheet illustrates the example above:

Machine Harvested Cucumber Grade Factor and Average Yield Worksheet

Policy Holder: _____ Policy Number: _____ Crop Year _____
 State: _____ County: _____ Unit Number _____

Year #1		Percent at grade				Total (Bu)	Bushels per Acre (8)/(3)	Bushels at Grade

	2A	2B	3A	3B	Unit Price
Grade Values*	\$ 0.46	\$ 1.00	\$ 2.59	\$ 1.74	\$5.79

* Grade Value = Average Grade Factor x Base Contract Price

23 CIH Part 2, Section 2, Paragraph 237 - Price (Continued)

B. Multiple Production Contracts

When the producer has two or more production contracts in effect, the price election will be the weighted average of the price elections determined in section 3A. For example, if 7,000 bushels are contracted under one production contract with a price election of \$5.92, and 5,000 bushels are contracted under another production contract with a price election of \$5.03, the price election will be \$5.55 $((7,000 \times \$5.92) + (5,000 \times \$5.03) = \$66,590.00$ and $\$66,590.00 \div 12,000$ bushels = \$5.55).

24 CIH Part 6, Sections 1, 2 and 3 - Replanting, Late Planting and Prevented Planting

A. Replant Payment

Provisions in paragraph 603, which indicate no more than one replant payment may be made in a crop year, are not applicable. In counties for which the Special Provisions designate both spring and summer final planting dates, one replanting payment may be made for spring planted acreage and one replanting payment may be made for summer planted acreage.

B. Replant Payment Requirements

Machine Harvested Pickling cucumbers are added to the list of crops in paragraph 604 containing buckwheat, cabbage, canola/rapeseed, etc.

C. Late Planting

The late planting provisions in section 2 are not applicable. There is no coverage for acreage planted after the final planting date.

D. Prevented Planting

The prevented planting provisions in section 3 are not applicable. Prevented planting coverage is not provided.

25 CIH Part 7 - Units

In addition to the provisions in section 2, separate optional units may be established if each optional unit contains only spring planted acreage or only summer planted acreage. Separate optional units for such acreage may be established only in counties for which the Special Provisions designate both spring and summer final planting dates.

26 CIH Part 9, Section 1, Paragraph 915 - Uninsurable Acreage

Paragraph 915 is applicable, except for subparagraph 12 which indicates a second planting of the same crop is not insurable after a first planting of the same crop has been harvested. The

26 CIH Part 9, Section 1, Paragraph 915 - Uninsurable Acreage (Continued)

Machine Harvested Pickling Cucumber Crop Provisions specifically allow insurance for the second planting provided it is summer planted and is grown in a county for which the Special Provisions designate both spring and summer final planting dates.

27 CIH Part 11 - Production Evidence

Pickling Cucumbers is added to the list of crops in section 2, paragraph 1115 for which verifiable production evidence is required.

28 CIH Part 12, Section 5, Paragraph 1263 - Tolerances

Pickling cucumbers are added to the list of crops in subparagraph 1263B(2).

29 CIH Part 16, Section 1 - Category B Crops

The following is added to section 1:

Machine Harvested Pickling Cucumbers

A. Production Contract Requirements

The insured must provide a copy of all production contracts to the AIP on or before the ARD.

B. Determining APH Production

Harvested production from processor or green shipper settlement sheets is counted as production for APH yield purposes. If production is shown in pounds, it must be converted to 50 pound bushels (e.g. 1,000 pounds ÷ 50 pounds/bushel = 20 bushels). Include only production of the cucumber type being insured. For example, if machine harvested cucumbers are insured, only actual yields for machine harvested cucumbers will be used when calculating your approved yield (actual yields from hand harvested acreage will not be used). Do not include any off-grade or cull production that may be shown on settlement sheets. If there is a claim, the amount of production used to settle the claim is used.

Example:

Processor settlement sheets show production for size 2A, 2B, 3A and 3B cucumbers. The settlement sheets also show production for size 1B cucumbers and nubs; however, in this example, the size 1B and nub production is not included when calculating the approved yield because both are defined in the Cucumber Crop Provisions as "off-grade." A zero is shown for any off-grade production when completing the APH production worksheet.

B. Determining APH Production (continued)

In this example, processor settlement sheets are available for the 2011 - 2013 crop years. Production information from the settlement sheets is entered into an APH production worksheet to determine the amount of production to be included in APH database. If production on a settlement sheet is shown in pounds, it must be converted to 50 pound bushels):

Example APH Production Worksheet

Year	1B (bu.)	2A (bu.)	2B (bu.)	3A (bu.)	3B (bu.)	Total bu. (APH Database Entry)
2004						
2005						
2006						
2007						
2008						
2009						
2010	0					
2011	0	3,610	7,755	20,410	20,394	52,169

2013	50,169	271.0	A 185
			771 ÷ 4
T-Yield 200	Approved APH		193

30 CIH Exhibit 2A - Definitions

The definitions in Exhibit 2A for the terms listed below are amended as follows:

Good farming practices - In addition to the definition of "good farming practices" contained in Exhibit 2A, good farming practices include the cultural practices required by the production contract.

Practical to replant - In addition to the definition of "practical to replant" contained in Exhibit 2A, it will be considered practical to replant only if the green shipper or processor agrees in writing that it will accept the production from the replanted acreage.

31 CIH Exhibit 2B. Crop Policy Information

The following is added to Exhibit 2B:

2014 CROP POLICY INFORMATION								
APH Crops	FCIC		Crop Category, APH Yield Tolerance	Late Planting (L) Prev. Planting (P)	Replant	Unit of Measure	Units by: Basic (B) Optional (O) Enterprise (E) ⁴	¹ High-Risk Land Exclusion Option
	Policy	CP						
Machine Harvested Pickling Cucumbers	11-BR	14-0132	B, 5% ²		Yes ¹	Bu.	B/O	Yes ³

1 Applies to additional coverage only

2 Tolerance for APH field reviews

3 Requires insured's signature, refer to the Actuarial Documents

4 EU(s) if provided for in the Special Provisions

32-40 (Reserved)

PART 4 OTHER HANDBOOKS

41 Prevented Planting Loss Adjustment Standards Handbook

Prevented planting coverage is not available for pickling cucumbers. The Prevented Planting Loss Adjustment Standards Handbook is not applicable.

42 Loss Adjustment Manual (LAM) Standards Handbook

The provisions set forth in the LAM apply to pickling cucumbers, except as noted in the Picking Cucumber LASH or if in conflict with the policy provisions or this handbook.

43 Machine Harvested Pickling Cucumber LASH

The provisions set forth in the Machine Harvested Pickling Cucumber LASH are applicable.

44-50 (Reserved)

PART 5 POLICY DOCUMENTS, INSURABILITY, AVAILABLE COVERAGE LEVELS, AND CALCULATION OF AN INDEMNITY

51 Policy Documents

The policy consists of the application for insurance, Basic Provisions (11BR or successor document), Machine Harvested Pickling Cucumber Crop Provisions, Special Provisions, Actuarial Documents, and, if elected by the producer, the Catastrophic Risk Protection Endorsement (09-CAT or successor document).

52 Insurability, And Production Contract Requirements

A. Insurability

Pickling cucumber acreage may be insured only if they are produced in accordance with a production contract executed on or before the acreage reporting date, and meet all other policy insurability requirements. A copy of the production contract must be provided to the AIP on or before the acreage reporting date.

B. Contract Requirements

At a minimum, the production contract must contain:

- (1) The producer's commitment to plant and grow cucumbers and to deliver the production to the green shipper or processor;
- (2) The green shipper's or processor's commitment to purchase all the production stated in the production contract; and
- (3) A base contract price for each cucumber size and grade stipulated in the production contract.

53 Coverage Levels

Insureds may select coverage from the catastrophic (CAT) levels through 75 percent of the approved yield.

54 Indemnity Calculation

Indemnity Example Data

Approved Yield per Acre	193
Coverage Level	75%
Insured Acres	125.0
Price Election	\$ 5.79
Prod. To Count & Base Cont. Price	
1,150 bu. 2A	\$6.00
2,300 bu. 2B	\$6.50
4,000 bu. 3A	\$6.50
3,400 bu. 3B	\$4.70
Share	1.000

54 Indemnity Calculation (Continued)

Indemnity Calculation Example

Line	Variable		Formula
1	Insured Acres	125.0	
2	Coverage Level	75%	
3	Approved Yield per Acre	193	
4	Production Guarantee per Acre	144.8	L3 x L2
5	Production Guarantee	18,100.0	L1 x L4
6	Price Election	\$5.79	
7	Value of Production Guarantee	\$104,799	L5 x L6
8	Production to Count 2A	1,150	
9	Production to Count 2B	2,300	
10	Production to count 3A	4,000	
11	Production to count 3B	3,400	
12	Base Contract Price 2A	\$6.00	
13	Base Contract Price 2B	\$6.50	
14	Base Contract Price 3A	\$6.50	
15	Base Contract Price 3B	\$4.70	
16	Value of Production to Count	\$63,830	(L8 x L12) + (L9 x L13) + (L10 x L14) + (L11 x L15)
17	Value of Prod. Guarantee Minus Value of Production to Count	\$40,969	L7 - L16
18	Share	1.000	
19	Indemnity	\$40,969	L17 x L18

55-60 (Reserved)

PART 6 PILOT STATES AND COUNTIES

61 Insurance Availability

Machine harvested pickling cucumber crop insurance is available as provided in the actuarial documents.

62-70 (Reserved)

Acronyms and Abbreviations
