STRAWBERRY DOLLAR PLAN
PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK
2000 and Succeeding Crop Years
THIS HANDBOOK CONTAINS THE OFFICIAL FCIC-APPROVED LOSS ADJUSTMENT STANDARDS FOR THIS CROP FOR THE 2000 AND SUCCEEDING CROP YEARS. IN THE ABSENCE OF INDUSTRY-DEVELOPED, FCIC-APPROVED PROCEDURE FOR THIS CROP FOR 2000 AND SUCCEEDING CROP YEARS, ALL REINSURED COMPANIES WILL UTILIZE THESE STANDARDS FOR BOTH LOSS ADJUSTMENT AND LOSS TRAINING.

SUMMARY OF CHANGES/CONTROL CHART

This handbook contains policy provisions contained in the Strawberry Pilot Crop Provisions (00-110) and the Catastrophic Risk Protection Endorsement (99-CAT).

Added at the end of the handbook are blank copies of the Strawberry Appraisal Worksheet, and Summary of Harvested Production (Strawberries) which can be copied and used until the forms are issued by the insurance provider.

1. INTRODUCTION

This handbook identifies the crop-specific procedural requirements for adjusting Multiple Peril Crop Insurance (MPCI) losses in a uniform and timely manner. These procedures, which include crop appraisal methods and claims completion instructions, supplement the general (not crop-specific) procedures, forms, and manuals for loss adjustment identified in the Loss Adjustment Manual (LAM).

2. SPECIAL INSTRUCTIONS

This handbook remains in effect until superseded by reissuance of either the entire handbook or selected portions (through amendments or bulletins). If slipsheets have been issued for a handbook, the original handbook as amended by slipsheet pages shall constitute the handbook. A bulletin can supersede either the original handbook or subsequent slipsheets.

A. DISTRIBUTION

The following is the minimum distribution of forms completed by the adjuster for the loss adjustment inspection:

One legible copy to the insured. The original and all remaining copies as instructed by the insurance provider.

NOTE: It is the insurance providers’ responsibility to maintain original insurance documents relative to policyholder servicing as designated in their approved plan of operations.

B. TERMS, ABBREVIATIONS, AND DEFINITIONS

(1) Terms, abbreviations, and definitions that are general (not crop specific) to loss adjustment are identified in the LAM.

(2) Terms, abbreviations, and definitions specific to strawberry loss adjustment and this handbook, which are not defined in this section, are defined as they appear in the text.

(3) Abbreviations:

SPOI Special Provisions of Insurance

(4) Definitions:

Adjusted The dollar amount per pound that results from subtracting allowable cost from Average the average price received.

Value
Expected Remaining Production
The amount of expected remaining strawberry production after the appraisal date during each week or month of harvest as provided in the Special Provisions, based on county-average yields per acre and historic weekly deliveries to shippers and processors.

Handling Charges
Costs shown on handler receipts that are typically deducted from the revenue received by the grower, such as charges for picking containers, materials, cooling, commissions, and assessments.

Marketable Production
Strawberries that meet or exceed the grading standards specified in the Special Provisions, or would be accepted by a packer, processor, or other handler even if failing to meet grading standards.

Penhooker
One who removes strawberries from the field that would normally not be harvested.

3. INSURANCE CONTRACT INFORMATION

The insurance provider is to determine that the insured has complied with all policy provisions of the insurance contract. Crop provisions which are to be considered in this determination include (but are not limited to):

A. INSURABILITY

(1) The crop insured will be all the strawberries in the county in which the insured has a share, for which a premium rate is provided by the actuarial documents and:

(a) That are of varieties adapted to the area;

(b) That are grown as an annual;

(c) That are transplanted;

(d) That are grown in accordance with any cultural requirements that may be specified in the Special Provisions;

(e) That are irrigated;

   NOTE: Refer to the LAM, the Basic Provisions, and the Special Provisions for the definition of irrigated practice.

(f) That are grown for commercial sale; and

(g) That are grown by a person, who in at least one of the three previous crop years, produced strawberries or managed a farm that produced the minimum amount of strawberries specified in the Special Provisions for commercial sale.
(2) Acreage planted before the beginning of the insurance period will not be insurable, unless the insurance provider inspects the acreage and determines that it meets the insurability requirements specified in the policy and the Special Provisions.

(3) Acreage planted prior to the earliest planting date and/or after the final planting date specified in the Special Provisions is not insurable.

(4) Acreage damaged before the final planting date, to the extent that a majority of producers in the area would normally not further care for the crop, must be replanted unless the insurance provider agrees that it is not practical to replant. It will not be considered practical to replant if transplants are not available.

B. PROVISIONS NOT APPLICABLE TO CAT COVERAGE

(1) Optional units.
(2) Written agreements.
(3) Hail and Fire Exclusion provisions (also not applicable to limited coverage).
(4) Modified Minimum Value Option.

C. UNIT DIVISION

See the insurance contract for unit provisions. NOTE: Unless limited by the Crop or Special Provisions, a basic unit, as defined in the Basic Provisions and the Crop Provisions, may also be established by type (winter or summer planting) and may be divided into optional units if, for each optional unit, all the conditions stated in the applicable provisions are met (see Special Provisions for limitations to optional units).

D. NOTICE OF DAMAGE OR LOSS

Applicability - Within the policy provisions is a requirement that an insured file a “notice of damage or loss” unless the insurance period has ended prior to each of the following events:

(1) Within three days of the date that harvest of the damaged crop should have started if the crop will not be harvested.

(2) At least five days before any production from any unit will be sold by direct marketing.

NOTE: If the insured fails to give timely notice of intent to direct market strawberry production, apply an appraised amount of production that is not less than the amount of insurance per acre, if such failure results in the inability of the insurance provider to make a required inspection or appraisal. If timely notice has been given and acceptable records are not available see subsection 5 D.

(3) Immediately, if damage occurs during harvest, and the insured does not intend to complete harvesting the crop.
(4) In accordance with section 14 of the Basic Provisions, if the insured intends to claim an indemnity on any unit, notice must be given at least five days prior to the beginning of harvest of the damaged crop so that the insurance provider may inspect the damaged production.

(5) If the insured fails to meet the requirements listed above and such failure results in the insurance provider’s inability to inspect the damaged production, all such production is to be considered undamaged and included as production to count.

E. MODIFIED MINIMUM VALUE OPTION

If Option I or Option II is elected, the total value of harvested production will be determined as follows:

(1) For sold production, the dollar amount obtained by subtracting the allowable cost (in the Special Provisions) from the average price received for all pounds of strawberries sold (this result may not be less than the minimum value option price chosen by the insured and contained in the Special Provisions), and multiplying this result by the number of pounds of strawberries sold.

(2) For marketable production that is harvested, but not sold, the dollar amount obtained by multiplying the pounds of such strawberries on the unit by the minimum value (from the Special Provisions) that applies without regard to the choice of the modified minimum value option. Harvested production that is damaged or defective due to insurable causes and is not marketable will not be counted as production.

4. STRAWBERRY APPRAISALS

A. GENERAL INFORMATION

(1) Potential production will be appraised in accordance with the procedures specified in this handbook and the LAM.

(2) Specifically for strawberries, circumstances that require an appraisal include (but are not limited to):

(a) When the acreage will not be harvested or the insured intends to remove or abandon a planting before the end of insurance and intends to file a claim for indemnity;

(b) Prior to the end of the insurance period, when the insured intends to file a claim for indemnity but does not intend to pick any more strawberries (partially harvested) even though potential production remains on the plants;

(c) If production will be direct marketed (roadside markets, U-pick, etc.) and the insurance provider wishes to conduct pre-harvest and post-harvest appraisals.
B. **TIMING OF APPRAISALS**

(1) During the period of harvest, plants are picked typically twice a week for a period lasting from two to six months. If the producer wishes to abandon or put the acreage to another use, any appraisal should be delayed until five days after the last picking, where possible. This will provide enough time for the plants to produce marketable strawberries and to determine any remaining potential production.

(2) Post-harvest inspections or appraisals should be made on a field and/or unit when a loss is probable. Post-harvest inspections or appraisals should be made no more than five days after final picking of the field and/or unit. Because of the rapid deterioration of mature strawberries, this will allow for the most accurate appraisal of strawberries remaining after the final harvest.

(3) Pre-acceptance inspections or appraisals should not be made until after 21 days from the date the plants were initially transplanted. This will allow the transplants sufficient time to recover from transplanting, develop new roots, and leaves.

(4) Plants damaged by hail, freeze, etc. may require as much as 30 days (depending upon severity of damage and weather conditions) to recover and again produce marketable strawberries. Appraisals should be delayed until the plants have recovered sufficiently to allow an accurate determination of appraised production to count.

C. **SELECTING REPRESENTATIVE SAMPLES FOR APPRAISALS**

(1) Determine the number of required samples for a field or subfield by the field size (see TABLE A in Section 9), the average stage of growth, age (size), general capabilities of the plants, variability of potential production, and plant damage within a field or subfield.

(2) Split the field into subfields when:
   
   (a) variable damage causes the crop potential to appear to be significantly different within the same field; or

   (b) some areas within the field have recently been picked while other areas have not; or

   (c) the insured wishes to destroy a portion of a field.

(3) Each field or subfield must be appraised separately.

(4) Take not less than the minimum number (count) of representative samples required in TABLE A.

D. **MEASURING ROW WIDTH FOR SAMPLE SELECTION**

Use these instructions for all appraisal methods.

(1) Use a measuring tape marked in tenths of a foot (or convert a tape marked in inches to tenths of a foot, to measure row width (see the LAM for conversion table). Row widths are rounded to the nearest tenth of a foot.
(2) Apply the row width to determine the length of row required for the sample as shown in section 9 TABLE B.

(3) Typical planting patterns on raised beds covered with plastic mulch:

Example 1

Row 1  Row 2  Row 3  Row 4

Example 2

Row 1  Row 2

[................. 6 Foot Raised Bed .................]

[................. 4 Foot Raised Bed .................]

EXAMPLE 1: 6 foot raised bed width with 4 rows = 1.5 foot row width.

EXAMPLE 2: 4 foot raised bed width with 2 rows = 2.0 foot row width.

E. DETERMINING PLANTS PER ACRE

Use the following formula to determine plants/acre:

Square feet/acre ÷ row width (in feet to tenths) ÷ plant spacing (in feet to tenths) = plants per acre (single row).

EXAMPLE: 43,560 sq. ft./acre ÷ 2.0 foot row width = 21,780 linear feet of row per acre. 21,780 linear feet ÷ 1.0 foot plant spacing (or 12 inches) = 21,780 plants per acre.
5. APPRAISAL METHODS

A. GENERAL INFORMATION

These instructions provide information on appraisal methods for:

<table>
<thead>
<tr>
<th>Appraisal Method...</th>
<th>Use...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potential Production Method and Stand Reduction Method</td>
<td>From planting until end of insurance; When strawberry plants will be removed or harvest ends before the end of the insurance period and a claim will be filed; and For strawberries sold through commercial and direct marketing outlets, when timely notice of direct marketing has been provided and acceptable production records are available, and a claim will be filed.</td>
</tr>
<tr>
<td>Potential Production Method</td>
<td>When timely notice of direct marketing has been provided, acceptable records of production are NOT available, and a claim will be filed.</td>
</tr>
</tbody>
</table>

B. DETERMINING POTENTIAL PRODUCTION FOR COMMERCIAL ACREAGE OR FOR DIRECT MARKETED ACREAGE WITH ACCEPTABLE RECORDS

(1) Use Part I of the Strawberry Appraisal Worksheet (Potential Production) to adjust the expected potential production for a period of time in which the insured did not harvest. Use Part II of the Strawberry Appraisal Worksheet (Stand Reduction) to determine the per acre potential production.

(2) For acreage with production sold through commercial outlets or direct marketed, if TIMELY NOTICE of intent to direct market has been provided and acceptable production records are furnished, determine the potential production by multiplying the remaining potential production for the date harvest ceased as shown in TABLE C (after adjusting the remaining potential production shown in TABLE C to reflect the date harvest stopped) by the percent of surviving plants.

EXAMPLE: If winter planted strawberries in Ventura County, California, were damaged by insurable causes on April 16, and the planting will be removed, use TABLE C to determine the remaining potential production for the month of May (27,300 lbs per acre). Determine the remaining potential production from April 17 to April 30 by dividing the number of days remaining in the month (14) by the picking factor (4) shown in the Special Provisions. Round the result to the nearest hundredth (14 ÷ 4 = 3.50 estimated remaining number of pickings for the period of time from April 17 to April 30). Multiply the estimated pounds per acre of strawberries to be picked for each picking as specified in the Special Provisions (2,400) by the calculated estimated remaining number of pickings (3.50) to determine the remaining production per acre to be picked (2,400 X 3.50 = 8,400 lbs). Add the calculated expected number of pounds per acre of potential production for the period from April 17 to April 30 to the remaining potential production for the month of May.
(8,400 + 27,300 = 35,700 lbs per acre) to determine the remaining potential production from April 16 to the end of the insurance period.

(3) Transfer the total pounds per acre remaining potential production from Part I item 18 of the appraisal worksheet to Part II item 26 of the appraisal worksheet.

(4) If the plants are damaged (e.g., by freeze, hail, etc.) to the extent that the plants will require a period of time to recover before the plants will again produce marketable strawberries, determine potential production based on the date the next harvest would be expected to occur under normal growing conditions (see Section 4 B).

EXAMPLE: If freeze damage occurs on March 5 in California and the plants require 30 days before marketable strawberries are produced, use the potential production for April shown in TABLE C (March 5 adjusted for the 30-day recovery period to April 4) to determine the expected potential production.

C. STAND REDUCTION METHOD

(1) For acreage with production sold through commercial outlets or direct marketed, if TIMELY NOTICE of intent to direct market has been provided and acceptable production records are furnished, use Part II to determine the percent of stand reduction. This method is based on the number of surviving plants in a designated sample row length. (Refer to TABLE B for determination of sample row length.).

(2) Surviving plant counts are converted to a percent potential remaining in the field by dividing the total number of surviving plants by the total number of original plants.

EXAMPLE: For winter planted strawberries in Ventura County, California, the original plant stand was 28,000 and the surviving plant stand was 11,480. Adjust for the percent of surviving plants by Divide 11,480 surviving plants per acre by 28,000 original plant stand = 41 percent remaining stand.

(3) Multiply the potential production (taken from Part I item 18 of the appraisal worksheet) by the percent remaining stand to determine the adjusted potential production remaining.

EXAMPLE: Potential production 35,700 pounds times 41 percent remaining stand = 14,637 lbs per acre adjusted potential production remaining.

(4) If there are ripe strawberries, pick and weigh, in pounds to thousandths, all ripe strawberries from each sample row. The average sample weight is determined and multiplied by the fraction of an acre sample size to determine the pounds per acre for all samples.

NOTE: Ripe strawberries are individual berries that show 50% or more of the fruit surface has turned pink or red.

(5) The pounds per acre for all samples are added to the adjusted potential production per acre to determine the total pounds of appraised production per acre for each field in the unit. Total the remaining potential production for the unit to determine total pounds per acre potential production.
EXAMPLE: If the average sample weight from all sample rows was 1 pound and 4 ounces, convert the ounces to pounds to thousandths by dividing 4 ounces by 16 = .250. The total sample weight in pounds to thousandths is 1.250 (1 lb + .250 lb). Multiply 1.250 average sample weight by 1000 (for 1/1000 sample size) = 1,250 lbs per acre for all samples. If the potential production was appraised at 14,637 lbs add 1,250 lbs to determine the total of 15,887 lbs per acre.

NOTE: If the insured agrees, harvested strawberries (from representative samples jointly selected by the adjuster and insured) (harvest-appraisal) may be used to determine the sample weight. An adjuster must be present when the representative samples are harvested.

D. DETERMINING DIRECT MARKETED PRODUCTION WITHOUT ACCEPTABLE RECORDS

If TIMELY NOTICE of direct marketing has been given and acceptable records (see Special Provisions for acceptable records) of production are NOT provided, use Part I of the Strawberry Appraisal Worksheet (Potential Production) to determine the per acre expected potential production to count (see the Strawberry Appraisal Worksheet example).

1. Divide the number of days counted from the date of first harvest through the date of final harvest by the picking factor (number of days between pickings or picking interval) shown in the Special Provisions to determine the number of pickings for direct marketing. Round the result to the nearest hundredth. If the strawberry plants are damaged (e.g., by freeze, hail, etc.) to the extent that the plants require a period of time to recover before the plants will again produce marketable strawberries (assuming normal growing conditions), subtract the number of days required for plant recovery from the total number of days calculated from the date of first harvest to the date of final harvest. Calculate the number of pickings separately for each time period (or portion thereof) shown on the Special Provisions.

2. Multiply the estimated pounds per acre of strawberries to be picked for each picking as specified in the Special Provisions by the calculated number of pickings to determine the total number of pounds per acre that could be picked for the specified time period. The estimated pounds of strawberries to be picked for each picking may vary by week, month, or planting pattern (See the Special Provisions).

3. Make no adjustments to the expected potential production in Part II (Stand Reduction) of the appraisal worksheet. Transfer the total expected potential production per acre from Part I to Section I, item “J” of the Production Worksheet.

NOTE: Under the terms of the policy, the insured is to provide the pounds of direct marketed, U-pick, and penhooker production harvested from ALL insurable acreage. Without acceptable records of direct marketed production (where timely notice of intent to direct market has been provided), use the calculated value of direct marketed production as the total value of production to count. The amount of production sold without acceptable records is ignored and the calculated amount of direct marketed production is used as the production to count.
6. APPRAISAL DEVIATIONS AND MODIFICATIONS

A. DEVIATIONS

Deviations in appraisal methods require FCIC written authorization (as described in the LAM) prior to implementation.

B. MODIFICATIONS

There are no pre-established modifications in this handbook. See the LAM for additional information.

7. APPRAISAL WORKSHEET ENTRIES AND COMPLETION PROCEDURES

A. GENERAL INFORMATION

(1) Include the insurance provider’s name in the appraisal worksheet title if not preprinted on the insurance provider’s worksheet or when a worksheet entry is not provided.

(2) Include the claim number on the appraisal worksheet (when required by the insurance provider), when a worksheet entry is not provided.

(3) Separate appraisal worksheets are required for each unit appraised. Refer to section 4 for sampling instructions.

(4) Separate appraisal worksheets are required for Part I if direct marketed production was sold from more than one field or subfield within a unit.

NOTE: Standard appraisal worksheet items are numbered consecutively in subsection B. Examples of appraisal worksheets are also provided to illustrate how to complete entries.
B. WORKSHEET ENTRIES AND COMPLETION INFORMATION

STAND REDUCTION

Verify or make the following entries:

<table>
<thead>
<tr>
<th>Item No.</th>
<th>Information Required</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Company Name:</strong> Name of insurance provider, if not preprinted on the worksheet (Company Name).</td>
</tr>
<tr>
<td></td>
<td><strong>Claim No.:</strong> Claim number as assigned by the insurance provider, if required.</td>
</tr>
<tr>
<td>1.</td>
<td><strong>Insured’s Name:</strong> Name of insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.</td>
</tr>
<tr>
<td>2.</td>
<td><strong>Policy No.:</strong> Insured’s assigned policy number.</td>
</tr>
<tr>
<td>3.</td>
<td><strong>Unit No.:</strong> Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).</td>
</tr>
<tr>
<td>4.</td>
<td><strong>Crop Year:</strong> Crop year, as defined in the policy, for which the claim has been filed.</td>
</tr>
<tr>
<td>5.</td>
<td><strong>Type/Variety:</strong> Three-digit code number, entered exactly as specified on the actuarial documents, for the type grown by the insured. If “No Type Specified,” enter appropriate 3-digit code number from the actuarial documents.</td>
</tr>
<tr>
<td>6.</td>
<td><strong>Bed Width:</strong> Width of the raised planting bed, rounded to the nearest whole foot.</td>
</tr>
<tr>
<td>7.</td>
<td><strong>Number of Rows:</strong> Number of rows planted per bed.</td>
</tr>
<tr>
<td>8.</td>
<td><strong>Row Width:</strong> Row width, rounded to the nearest tenth of a foot.</td>
</tr>
<tr>
<td>9.</td>
<td><strong>Plant Spacing:</strong> Plant spacing within the row in feet to tenths (e.g., 18 inches entered as 1.5 feet).</td>
</tr>
<tr>
<td>10.</td>
<td><strong>Fraction of An Acre:</strong> Enter the fraction of an acre for the sample sized used (e.g., “1/1000” for 1/1000 of an acre sample). See <strong>TABLE B</strong> for determining sample row length.</td>
</tr>
</tbody>
</table>

PART I: POTENTIAL PRODUCTION

Items 11 through 18.

11. **Field ID:** Field or sub-field identification symbol. For Part I, use a separate appraisal worksheet for each field or sub-field being appraised.
12. Calendar Dates for Harvest Period:

a. For production sold through commercial or through direct marketing outlets WITH acceptable records (and with timely notice of intent to direct market), enter the month(s) and calendar date(s) for the period of time for which the insured did NOT harvest, starting with the first day after harvest ended. Use a separate line for each applicable time period identified in TABLE C. Account for the entire period of time for which the insured did not or will not harvest the acreage (e.g., if harvest ended April 16, enter “April 17 - 30” on line one and “May - July,” the end of the normal harvest period, on line two).

b. For direct marketed production WITHOUT acceptable records (and with timely notice of intent to direct market), enter the month(s) and calendar date(s) for the period of time for the actual dates of harvest as shown in the Special Provisions (e.g., if harvest began on January 5 and ended on July 31 enter “Jan 5 - 31” on line one and “Feb - July” on line two).

c. To account for plant recovery time from hail or freeze damage, etc., refer to subsections 5 B and C. Enter in “Remarks” the date the damage occurred and the number of days allowed for plant recovery (e.g., if harvest ended on January 5 and hail occurred on January 6, count forward the number of days needed for plant recovery and enter the time period as “Feb 10 - 28”. See the Special Provisions or TABLE C.)

13. Number of Days:

a. For production sold through commercial or direct marketing outlets WITH acceptable records, where the time interval is less than the time period identified in TABLE C, enter the calculated number of days for the line, (e.g., if the time period identified on TABLE C is the month of January and harvest ended on January 5, the remaining time period in which harvest could have occurred is January 6-31, count the remaining days and enter “26.” If harvest ended on January 31, the time period in which harvest could have occurred is Feb - July, MAKE NO ENTRY). If the actual time period remaining for harvest for this line entry is equal to that shown on TABLE C, MAKE NO ENTRY and skip to item 17.

b. For direct marketed production WITHOUT acceptable records, where the time interval is less than the time period shown in the Special Provisions, enter the calculated number of days for the line (e.g., if the harvest period identified on the Special Provisions is the month of January and the dates of actual harvest are January 5-31, count the days and enter “27”).

14. Picking Interval: If an entry was made in item 13, enter the picking factor (or picking interval) in days, as shown on the Special Provisions for the respective time period identified in item 12, otherwise MAKE NO ENTRY.

15. Calculated No. of Pickings: If an entries were made in items 13 and 14 enter the result of dividing item 13 by item 14, round the result to the nearest hundredth, otherwise MAKE NO ENTRY.

16. Lbs. Per Acre Per Picking: If an entry was made in items 15, enter the pounds per picking as shown on the Special Provisions for the respective time period, otherwise MAKE NO ENTRY.
17. **Total Lbs. Per Acre:** If an entry was made in item 16, enter the result of multiplying item 15 times item 16 in whole pounds. If an entry does NOT appear in item 16, enter from **TABLE C**, the pounds per acre for the earliest month identified by the time period in item 12 (e.g., if the entry in item 12 is “May - July,” use the month of May and enter “27,300” pounds per acre from **TABLE C**).

18. **Total Lbs. Per Acre Expected Production:** Total of all item 17 entries, entered in whole pounds. For direct marketed acreage:
   a. WITH acceptable records of production, transfer the entry in item 18 to item 27.
   b. WITHOUT acceptable records of production, transfer the entry in item 18 to Section I, item “J” of the Production Worksheet.

**PART II: STAND REDUCTION**

**NOTE:** For direct marketed acreage WITHOUT acceptable production records, MAKE NO ENTRY in Part II (Stand Reduction).

19. **Field ID:** Field or sub-field identification symbol. For Part II, more than one field or sub-field may be appraised on the same appraisal worksheet.

20. **Acres:** Number of determined acres, to tenths, in field or subfield being appraised.

21. **Number of Surviving Plants Per Sample:** Number of surviving plants in the sample.

22. **Number of Original Plants Per Sample:** Number of original plants in the sample.

23. **Surviving:** Total number of plants surviving in all samples (total of all item 21 entries).

24. **Original:** Total number of original plants in all samples (total of all item 22 entries).

25. **%:** (Percent Stand Remaining) Result of dividing item 23 by item 24, rounded to the nearest two place decimal.

26. **Expected Potential Prod.:** The pounds per acre of strawberries that typically have yet to be picked in the county by the date harvest ceased, entered from Part I of the Strawberry Appraisal Worksheet, item 18. To account for plant recovery from hail or freeze damage, etc., refer to section 5.

27. **Adjusted Potential Prod.:** Result of multiplying item 25 by item 26. Round the result to the nearest whole pound.

28. **Avg. Sample Weight:** Pick and weigh all ripe strawberries from the sample rows. If there are no ripe fruit enter “0.” Record the individual weights, in pounds to thousandths (or convert from pounds and ounces to pounds to thousandths), from each sample row in the Remarks (item 32) and divide by the number of samples used to determine the average weight in pounds to thousandth.
NOTE: Samples weighed in pounds and ounces are to be converted to pounds to thousandths (e.g., 12 ounces is converted to thousandths of a pound by dividing 12 by 16 = .750 pounds).

29. **Factor:** Enter the appropriate factor for the sample size used (e.g., “1000” for 1/1000 sample size or “100” for 1/100 sample size).

30. **Sample Lbs. Per Acre:** Result of multiplying the average weight of strawberries from the sample rows (item 28) by the sample size factor (item 29) rounded to the nearest whole pound. If there are no fruit, enter zero.

31. **Total Lbs. Per Acre:** Add item 27 and item 30. All entries are recorded to the nearest whole pound. Transfer this entry to Section I, item “J,” of the Production Worksheet.

32. **Remarks:** Remarks pertinent to the appraisal (e.g., show calculations for determining average sample weight of strawberries, “25 days allowed for plant recovery due to hail damage,” and “5 pickings completed before harvest ended”).

33. **Adjuster’s Signature and Code No., Date:** Signature of adjuster, code number, and date signed after the insured (or insured’s authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks/Narrative section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the Production Worksheet.

34. **Insured’s Signature and Date:** Insured's (or insured’s authorized representative’s) signature and date. BEFORE obtaining insured’s signature, REVIEW ALL ENTRIES on the Appraisal Worksheet WITH THE INSURED, particularly explaining codes, etc., which may not be readily understood.

35. **Page:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

C. SUMMARY OF HARVESTED PRODUCTION WORKSHEET ENTRIES AND COMPLETION INFORMATION

(1) Use this worksheet to record harvested marketable production. Use separate Summary of Harvested Production Worksheets for:

   (a) Harvested production sold directly to consumers (direct marketed) from roadside stands or farmers’ markets, U-Pick production, and harvested unsold production.

   (b) Each shipper, processor, or other handler.

(2) Allowable costs of harvested production as shown in the Special Provisions include labor for picking and supervising in the field, picking containers, and hauling and handling charges (such as packing materials, cooling, commissions, and assessments). Allowable costs are to be deducted for production actually packed.

NOTE: This worksheet is used to determine average value per pound actually received for harvested production. Actual value according to the crop provisions or the Modified Minimum Value Option I or Option II, if applicable, is recorded on the production worksheet.

(3) MAKE NO ENTRY for harvested production that is damaged or defective due to insurable causes, and such production is NOT marketable.

Verify or make the following entries:

<table>
<thead>
<tr>
<th>Item No.</th>
<th>Information Required</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>0.</strong></td>
<td><strong>Company Name:</strong> Name of insurance provider, if not preprinted on the worksheet (Company Name).</td>
</tr>
<tr>
<td><strong>1.</strong></td>
<td><strong>Claim No.:</strong> Claim number as assigned by the insurance provider, if required.</td>
</tr>
<tr>
<td><strong>2.</strong></td>
<td><strong>Insured’s Name:</strong> Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.</td>
</tr>
<tr>
<td><strong>3.</strong></td>
<td><strong>Crop Year:</strong> Crop year, as defined in the policy, for which the claim is filed.</td>
</tr>
<tr>
<td><strong>4.</strong></td>
<td><strong>Policy Number:</strong> Insured’s assigned policy number.</td>
</tr>
<tr>
<td><strong>5.</strong></td>
<td><strong>Unit Number:</strong> Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).</td>
</tr>
<tr>
<td><strong>6.</strong></td>
<td><strong>Type/Variety:</strong> Type defined as the planting system used (winter or summer planting) and strawberry variety planted (optional) represented by this Summary of Harvested Production form.</td>
</tr>
</tbody>
</table>
6. **Name, Address, and Phone Number of Buyer/Packer:** Name, address and telephone number of the processor, shipper, location of harvested unsold production, U-pick field, roadside stand, or name and location of farmers’ market. Use separate forms for each buyer and strawberry type.

**PART I - PRODUCTION**

Items 7 through 14.

7. **Date:** Date the load was sold, delivered or the date from a season summary. Enter “unsold” for harvested unsold production.

8. **Load, Lot, or Summary:** Ticket number of the load, lot number in which the load was sold, or the grower identification number from a season summary. Enter “U-pick” for U-pick production.

9. **Container Description:** Describe the container in which the strawberries were delivered to the buyer (e.g., 1-pint mesh, 1-pound clam shell, flat, or freezer bin). Make separate line entries for each type of container that holds a different weight of strawberries.

10. **Number of Containers:** Number of containers for each type of container.

11. **Pounds Per Container:** Approximate number of pounds of production held by each container. Refer to **TABLE D**. If a container is not listed in **TABLE D**, determine the approximate number of pounds of production the container would hold using producer/buyer records or, if possible, filling a sample container several times with marketable strawberries and determining the average weight. Document in Remarks how the weight of the unlisted container was determined.

12. **Pounds Delivered:** The pounds of production in each type of container. Result of multiplying item 10 by item 11, rounded to whole pounds.

**NOTE:** If the insured cannot provide the pounds harvested from U-pick acreage, but can provide the total dollars received for that production (based on acceptable records) divide the gross dollars received (item 13) by the minimum value shown in the Special Provisions to obtain the pounds of production.

13. **Gross Dollars Received:** Value per load, lot, or summary account number listed in item 8, before any adjustments or deductions, in dollars and cents. MAKE NO ENTRY for harvested unsold production.

14. **Totals:** Total columns for Pounds Delivered (item 12) and Gross Dollars Received (item 13), in dollars and cents. MAKE NO ENTRY for harvested unsold production for total Gross Dollars Received (item 13).
PART II - WEIGHTED VALUE

Items 15 through 23, complete only on the last page of the Summary of Harvested Production.

15. **Total Pounds:** Sum of all page totals (item 14) for Pounds Delivered (item 12) entries, in whole pounds.

16. **Total Dollars Received:** Sum of all page totals (item 14) for Gross Dollars Received (item 13) entries, in dollars and cents. MAKE NO ENTRY for harvested unsold production.

17. **Net Price Received:** The average dollar amount per pound received by the insured for all strawberries. Result of dividing item 16 by item 15, round to dollars and cents. MAKE NO ENTRY for harvested unsold production.

18. **Allowable Cost:** The allowable cost per pound for harvesting and handling as listed in the Special Provisions. For U-pick production, enter “0.00,” unless an allowable cost is shown on the Special Provisions for such production. MAKE NO ENTRY for harvested unsold production.

19. **Adjusted Average Value:** Net Price Received (item 17) minus Allowable Cost (item 18) in dollars and cents. For harvested unsold production, enter “0.00.”

20. **Remarks:** If applicable, identify the Modified Minimum Value Option selected. Enter any pertinent information such as the reason harvested production is not sold.

21. **Adjuster’s Signature and Code No. and Date:** Signature of adjuster, code number, and date signed after the insured (or insured’s authorized representative) has signed. Sign and date on only the last page of the Summary of Harvested Production worksheet.

22. **Insured’s Signature and Date:** Insured’s (or insured’s authorized representative’s) signature and date. BEFORE obtaining insured’s signature, REVIEW ALL ENTRIES on the Summary of Harvested Production WITH THE INSURED, particularly explaining codes, etc., which may not be readily understood. Obtain the insured’s signature on only the last page of the worksheet.

23. **Page:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.)

FCIC-25780 (STRAWBERRY)  
JANUARY 2000
8. CLAIM FORM ENTRIES AND COMPLETION PROCEDURES

A. GENERAL INFORMATION

(1) The claim form (hereafter referred to as “Production Worksheet”) is a progressive form containing all notices of damage for all preliminary and final inspections on a unit.

(2) If a Production Worksheet has been prepared on a prior inspection, verify each entry and enter additional information as needed. If a change or correction is necessary, strike out all entries on the line and re-enter correct entries on a new line. The adjuster and insured should initial any line deletions.

(3) Refer to the LAM for instructions regarding the following:

(a) Acreage report errors.
(b) Delayed notices and delayed claims.
(c) Corrected claims or fire losses (double coverage) and cases involving uninsured causes of loss, unusual situations, controversial claims, concealment, or misrepresentation.
(d) Claims involving a Certification Form (when all the acreage on the unit has been appraised to be put to another use or other reasons described in the LAM).
(e) “No Indemnity Due” claims (which must be verified by an APPRAISAL or NOTIFICATION from the insured that the production exceeded the guarantee).

(4) The adjuster is responsible for determining if any of the insured’s requirements under the notice and claim provisions of the policy have not been met. If any have not, the adjuster should contact the insurance provider.

(5) Instructions labeled “PRELIMINARY” apply to preliminary inspections only. Instructions labeled “FINAL” apply to final inspections only. Instructions not labeled apply to ALL inspections.
B. **FORM ENTRIES AND COMPLETION INFORMATION**

Verify or make the following entries:

<table>
<thead>
<tr>
<th>Item No.</th>
<th>Information Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td><strong>Crop/Code #:</strong> “Strawberries” (0110).</td>
</tr>
<tr>
<td>2.</td>
<td><strong>Unit #:</strong> Five digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).</td>
</tr>
<tr>
<td>3.</td>
<td><strong>Legal Description:</strong> Section, township, and range number, FSA farm serial number, or other legal description that identifies the location of the unit.</td>
</tr>
<tr>
<td>4.</td>
<td><strong>Date of Damage:</strong> First three letters of the month during which MOST of the insured damage (including progressive damage) occurred for each inspection. Include the SPECIFIC DATE where applicable as in the case of rain damage (e.g., MAR 30).</td>
</tr>
<tr>
<td>5.</td>
<td><strong>Cause of Damage:</strong> Name of insured cause of loss for <strong>this crop</strong> as listed in the LAM. If it is evident that no indemnity is due, enter “NONE.” If an insured cause of loss is coded as “Other,” explain in the “Narrative.”</td>
</tr>
</tbody>
</table>

**NOTE:** See the Basic Provisions and the crop provisions for this crop for information pertaining to insured and uninsured causes of loss.

<table>
<thead>
<tr>
<th>Item No.</th>
<th>Information Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.</td>
<td><strong>Primary Cause %:</strong></td>
</tr>
</tbody>
</table>

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Percent of damage for the cause of damage listed in item 5 above that is determined to be the primary cause of damage, to the nearest whole percent. The primary cause of damage must exceed 50 percent (e.g., 51%). Enter an “X” in the major secondary cause of damage.

<table>
<thead>
<tr>
<th>Item No.</th>
<th>Information Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.</td>
<td><strong>Company/Agency:</strong> Name of the company and agency servicing the contract.</td>
</tr>
<tr>
<td>8.</td>
<td><strong>Name of Insured:</strong> Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.</td>
</tr>
<tr>
<td>9.</td>
<td><strong>Claim #:</strong> Claim number as assigned by the insurance provider.</td>
</tr>
<tr>
<td>10.</td>
<td><strong>Policy #:</strong> Insured’s assigned policy number.</td>
</tr>
<tr>
<td>11.</td>
<td><strong>Crop Year:</strong> Crop year, as defined in the policy, for which the claim is filed.</td>
</tr>
</tbody>
</table>
12. Additional Units:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Unit number(s) for ALL non-loss units for the crop at the time of final inspection. A non-loss unit is any unit for which a Production Worksheet has not been completed. Additional non-loss units may be entered on a single Production Worksheet.

NOTE: If more spaces are needed for non-loss units, enter the unit numbers and identify as “Non-Loss Units” in the narrative or on an attached Special Report.

13. Est. Prod. Per Acre:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Estimated yield per acre, in whole pounds, of all non-loss units for the crop at the time of final inspection.

14. Date(s) Notice of Loss:

PRELIMINARY:

a. Date the notice of damage was given for the unit in item 2.

b. A third preliminary inspection (if needed) requires an additional set of Production Worksheets. Enter the date of notice for a third preliminary inspection in the 1st space of item 14 on the second set.

c. Reserve the “Final” space on the first page of the first set of Production Worksheets for the date of notice for the final inspection.

d. If the inspection is initiated by the insurance provider, enter “Company Insp” instead of the date.

FINAL: Transfer the last date in the 1st or 2nd space to the FINAL space if a final inspection should be made as a result of the notice. Always enter the complete date of notice (month, day, year) for the FINAL inspection in the FINAL space on the first page of the first set of Production Worksheets. For a delayed notice of loss or delayed claim, refer to the LAM.

15. Companion Policy(s):

a. If no other person has a share in the unit (insured has 100 percent share), MAKE NO ENTRY.

b. In all cases where the insured has LESS than a 100 percent share of a loss-affected unit, ask the insured if the OTHER person sharing in the unit has a multiple-peril crop insurance contract (i.e., not crop-hail, fire, etc.). If the other person does not, enter “NONE.”
(1) If the other person has a multiple-peril crop insurance contract and it can be determined that the SAME insurance provider services it, enter the contract number. Handle these companion policies according to insurance provider instructions.

(2) If the OTHER person has a multiple-peril crop insurance contract and a DIFFERENT insurance provider or agent services it, enter the name of the insurance provider and/or agent (and contract number) if known.

(3) If unable to verify the existence of a companion contract, enter “Unknown,” and contact the insurance provider for further instructions.

NOTE: See the LAM for further information regarding companion contracts.

SECTION I - ACREAGE APPRAISED, PRODUCTION AND ADJUSTMENTS

Make separate line entries for varying:

(1) Rate classes, types, or farming practices;
(2) Appraisals;
(3) Stages or intended use(s) of acreage;
(4) Shares (e.g., 50 percent and 75 percent shares on the same unit); or
(5) Appraisals for damage due to hail or fire if Hail and Fire Exclusion is in effect.

Verify or make the following entries:

<table>
<thead>
<tr>
<th>Item No.</th>
<th>Information Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>A.</td>
<td>Field ID: The field identification symbol from a sketch map or an aerial photo. See the narrative. In the margin (or in a separate column), enter the date of inspection for the last line entry of each inspection.</td>
</tr>
<tr>
<td>B.</td>
<td>Preliminary Acres:</td>
</tr>
</tbody>
</table>

PRELIMINARY: The number of acres, to tenths, (include “E” if estimated), for which consent for other use has been given. Determine actual acreage, to tenths, when the boundaries of the appraised acreage may not be determined later.

FINAL: MAKE NO ENTRY.
C. **Final Acres:** See the LAM for definition of acceptable determined acres used herein. Determined acres to tenths (include “E” if estimated) for which consent is given for other use and/or:

   a. Put to other use without consent.
   b. Abandoned.
   c. Damaged by uninsured causes.
   d. For which the insured failed to provide acceptable records of production.
   e. From which production was sold by direct marketing if the insured failed to meet the requirements contained in the crop provisions.

**FINAL:** Determined acres to tenths.

**NOTE:** Acreage breakdowns WITHIN a unit may be estimated (enter “E” in front of the acres) if a determination is impractical AND if authorization was received from the insurance provider. Document authorization in the Narrative.

ACCOUNT FOR ALL ACREAGE IN THE UNIT. In the event of over reported acres, handle in accordance with individual insurance provider’s instructions. In the event of under-reported acres, draw a diagonal line in Column “C” as shown.

\[
\begin{array}{c}
C_1 \\
C_2
\end{array}
\]

C₁ Enter the ACTUAL acres for the field or subfield.  
C₂ Enter the REPORTED acres for the field or subfield

D. **Interest or Share:** Insured’s interest in crop to three decimal places as determined at the time of inspection. If shares vary on the same UNIT, use separate line entries.

E. **Risk:** The correct rate class from the actuarial documents. Verify with the Summary of Coverage, and if the rate class is found to be incorrect, revise according to insurance provider’s instructions. See the LAM.

F. **Practice:** Three-digit code number, entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If “No Practice Specified,” enter appropriate 3-digit code number from the actuarial documents.

G. **Type/Class/Variety:** Three-digit code number, entered exactly as specified on the actuarial documents, for the type grown by the insured. If “No Type Specified,” enter appropriate 3-digit code number from the actuarial documents.

H. **Stage:**

**PRELIMINARY:** MAKE NO ENTRY.
FINAL: Stage abbreviation as shown below.

<table>
<thead>
<tr>
<th>STAGE</th>
<th>EXPLANATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>“P”</td>
<td>Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, for which the insured failed to provide records of production which are acceptable to the insurance provider, or from which production was sold by direct marketing if the insured failed to meet the requirements contained in the crop provisions.</td>
</tr>
<tr>
<td>“H”</td>
<td>Harvested.</td>
</tr>
<tr>
<td>“UH”</td>
<td>Unharvested or put to other use with consent.</td>
</tr>
</tbody>
</table>

**GLEANED ACREAGE:** See Bulletin No. MGR-99-023, dated June 28, 1999, and Bulletin No. MGR-99-023.1, dated October 6, 1999, (or the LAM after bulletins have been incorporated) for more information on gleaning.

**I. Intended or Final Use:** Use of Acreage. Use the following “Intended Use” abbreviations.

<table>
<thead>
<tr>
<th>USE</th>

</tbody>
</table>

Verify any “Intended Use” entry. If the final use of the acreage was not as indicated, strike out the original line and initial it. Enter all data on a new line showing the correct “Final Use.”

**GLEANED ACREAGE:** See Bulletin No. MGR-99-023, dated June 28, 1999, and Bulletin No. MGR-99-023.1, dated October 6, 1999, (or the LAM after bulletins have been incorporated) for more information on gleaning.

**J. Appraised Potential:** Per acre appraisal in whole pounds of POTENTIAL production for the acreage appraised. See appraisal methods for additional instructions.

**NOTE:** If there is no potential on UH acreage, enter “0.”

**K.** MAKE NO ENTRY.

**L. Shell and/or Quality Factor:** Line out the heading and enter “Value.” For appraised production enter the greater of:

a. Actual value per pound, in dollars and cents, determined from a sample provided to a buyer in the local market area; or
b. Minimum value per pound, in dollars and cents, shown in the Special Provisions.

M. **Uninsured Cause:** EXPLAIN IN THE NARRATIVE.

a. Hail and Fire exclusion NOT in effect.

(1) Enter NOT LESS than the insured’s amount of insurance per acre in whole dollars for any “P” stage acreage, including acreage from which production is direct marketed without a timely notice of intent to direct market.

**NOTE:** On preliminary inspections, advise the insured to keep the harvested production from any acreage damaged SOLELY by uninsured causes separate from other production.

(2) For acreage that is damaged PARTLY by uninsured causes, enter the APPRAISED UNINSURED loss of production per acre in dollars and cents for any such acreage.

b. Refer to the LAM when a Hail and Fire Exclusion is in effect and damage is from hail or fire.

c. Enter the result of adding uninsured cause appraisals to Hail and Fire Exclusion appraisals.

**NOTE:** For fire losses, if the insured also has other fire insurance (double coverage), refer to the LAM.

N. **Adjusted Potential:** The result of Column “J” times Column “L,” plus Column “M” rounded to dollars and cents.

O. **Total to Count:** Column “C” or “C₁” (actual acres) times Column “N,” rounded to whole dollars.

**NOTE:** For CAT policies multiply result times .55, unless otherwise instructed by the insurance provider because adjustment will be made by other manual or automated computation process.

P. **Per Acre:** Per Acre Amount of Insurance - Enter the per acre Amount of Insurance from the insured’s policy, rounded to whole dollars.

Q. **Total:** Column “C₂” (reported acres; “C” if acreage is not under-reported) times Column “P” to whole dollars.

16. **Total Acres:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Total Actual Acres [Column “C” (or “C₁” if there are under-reported acres)], to tenths.

**NOTE:** FOR ITEM 17. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER’S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.
17. **Totals:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Total of Column “O” and Total of Column “Q.”

**NARRATIVE:**

If more space is needed, document on a Special Report, and enter “See Special Report.” Attach the Special Report to the Production Worksheet.

a. If no acreage is released on the unit, enter “No acreage released,” adjuster’s initials, and date.

b. If notice of damage was given and “No Inspection” is necessary, enter the unit number(s), “No Inspection,” date, and adjuster’s initials. The insured's signature is not required.

c. Explain any uninsured causes, unusual, or controversial cases.

d. If there is an appraisal in Section I, item “M” for uninsured causes due to a Hail and Fire Exclusion, show the original hail/fire liability per acre and the hail/fire indemnity per acre.

e. Document the actual appraisal date if an appraisal was performed prior to the adjuster’s signature date on the appraisal worksheet, and the date of the appraisal is not recorded on the appraisal worksheet.

f. State that there is “No other fire insurance” when fire damages or destroys the insured crop and it is determined that the insured has no other fire insurance. Also see the LAM.

g. Explain any errors found on the Summary of Coverage.

h. Explain any commingled production. See the LAM.

I. Explain any entry for “Production Not to Count” in Section II, item “O,” and/or any production not included in Section II, item “I” or item “B” - “E” entries (e.g., harvested production from uninsured acreage that can be identified separately from the insured acreage in the unit).

j. Explain a “NO” checked in item 19.

k. Attach an aerial photograph for field ID’s to identify the total unit:

   (1) If consent is or has been given to put part of the unit to another use or to replant;
   (2) If uninsured causes are present; or
   (3) or unusual or controversial cases.

**NOTE:** Indicate on the Planting Record Plat Map or aerial photo, the disposition of acreage destroyed or put to other use with or without consent.
l. Explain any difference between date of inspection and signature dates. For an ABSENTEE insured, enter the date of the inspection AND the date of mailing the Production Worksheet for signature.

m. When any other adjuster or supervisor accompanied the adjuster on the inspection, enter the code number of the other adjuster or supervisor and date of inspection.

n. Explain the reason for a “No Indemnity Due” claim. “No Indemnity Due” claims are to be distributed in accordance with the insurance provider instructions.

o. Explain any delayed notices or delayed claims as instructed in the LAM.

p. Document any authorized estimated acres shown in Section I, item “C” as follows: ‘Line 3 ‘E’ acres authorized by insurance provider MM/DD/YYYY.”

q. Document the method and calculation used to determine acres for the unit. See the LAM.

r. Specify the type of insects or disease when the insured cause of damage or loss is listed as insects or disease. Explain why control measures did not work.

s. Explain any “0” potential (plants with no berries).

t. Document the name and address of the charitable organization when gleaned acreage is applicable. See Bulletin No. MGR-99-023, dated June 28, 1999, and Bulletin No. MGR-99-023.1, dated October 6, 1999, (or the LAM after bulletins have been incorporated) for more information on gleaning.

u. Document any other pertinent information, including any data to support any factors used to calculate the production. If on an attachment, enter “See attachment.”

SECTION II - HARVESTED PRODUCTION

GENERAL INFORMATION:

(1) Account for ALL HARVESTED PRODUCTION (for ALL ENTITIES sharing in the crop).

(2) Separate line entries for each buyer are not required. Buyers are reported separately on the Summary of Harvested Production Worksheets and combined in Part II Weighted Value on the last page of the summaries. Total Pounds (item 15) and Adjusted Average Value (item 19) of the Summary of Harvested Production are used to calculate the value of all harvested production.

(3) The insured must maintain satisfactory records of ALL production sold. Verify any packing house or processor records. If acceptable sales records are not available, refer to the LAM.
(4) If additional lines are necessary, the data may be entered on a continuation sheet. USE SEPARATE LINES FOR:

(a) Harvested fruit of any type that failed to meet the applicable grade (quality) requirements because of INSURED damage.

(b) Varying shares; e.g., 50 percent and 75 percent shares on the same unit.

(c) Varying determinations of production (varying value, etc.).

(5) There will generally be no harvested production entries in items “A1” through “S” for preliminary inspections.

Verify or make the following entries:

<table>
<thead>
<tr>
<th>Item No.</th>
<th>Information Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>18.</td>
<td>Date Harvest Completed: (Used to determine if there is a delayed notice or a delayed claim. See the LAM.)</td>
</tr>
</tbody>
</table>

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:**

a. The earlier of the date the ENTIRE acreage on the unit was (1) harvested, (2) totally destroyed, (3) put to other use, (4) a combination of harvested, destroyed, put to other use, or (5) the calendar date for the end of the insurance period;

b. If at the time of final inspection (if prior to the end of the insurance period), there is any insured unharvested insured acreage remaining on the unit that the insured does not intend to harvest; enter “Incomplete.”

c. If at the time of final inspection (if prior to the end of the insurance period), none of the insured acreage on the unit has been harvested, and the insured does not intend to harvest such acreage, enter “No Harvest.”

d. If the case involves a Certification Form, enter the date from the Certification Form when the entire unit is put to another use, replanting is complete for the unit, etc. See the LAM.

19. Similar Damage:

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Check “Yes” or “No.” Check “Yes” if amount and cause of damage due to insurable causes is similar to the experience of other farms in the area. If “No” is checked, explain in the narrative.
20. **Assignment of Indemnity:** Check “Yes” only if an assignment of indemnity is in effect for the crop year; otherwise, check “No.” Refer to the LAM.

21. **Transfer of Right to Indemnity:** Check “Yes” only if a transfer of right to indemnity is in effect for the unit for the crop year; otherwise, check “No.” Refer to the LAM.

A1. **Share:** RECORD ONLY VARYING SHARES on SAME unit to three decimal places.

A2. **Field ID:** If only one practice and/or type of harvested production is listed in Section I, MAKE NO ENTRY.

If more than one practice and/or type of harvested production is listed in Section I, indicate for each practice/type the corresponding Field ID (from Section I, item “A”).

B. - E. **Length or Diameter, Width, Depth, Deductions:** Enter the buyer’s name and address, if applicable, for:

a. Production sold to a shipper, handler, broker, or processor (see subsection 7 C Summary of Harvested Production).

b. Unsold production enter “UNSOLD.”

c. U-pick production sold from insurable acreage, enter “U-PICK.”

d. Production direct marketed (excluding U-pick) from insurable acreage, enter “DIRECT MARKETED.”

F. - H. MAKE NO ENTRY.

I. **Bu., Ton, Lbs., Cwt.:**

b. Total production in whole pounds, delivered to the buyer or processor (from item 15, Summary of Harvested Production).

J. - M. MAKE NO ENTRY.

N. **Adjusted Production:** Enter whole pounds from Column “I.”

O. **Prod. Not to Count:**

a. Number of pounds from harvested acreage damaged solely by uninsured causes.

b. If production records are NOT available from acreage damaged solely by uninsured causes, MAKE NO ENTRY.
NOTE: THIS ENTRY MUST NEVER EXCEED PRODUCTION SHOWN ON THE SAME LINE. EXPLAIN ANY “PRODUCTION NOT TO COUNT” IN THE NARRATIVE.

P. Production: Result of subtracting the entry in Column “O” from Column “N.”

Q. Value: Enter the minimum value per pound for strawberries that were harvested and sold, and for unsold marketable strawberries.

a. The value per pound for SOLD production will be the applicable of (1), (2), or (3) below:

   (1) The minimum value per pound shown in the Special Provisions, if a minimum value option is NOT in effect;

   (2) The Modified Minimum Value Option I value per pound shown in the Special Provisions, if the Modified Minimum Value Option I is in effect; or

   (3) The Modified Minimum Value Option II value per pound shown in the Special Provisions, if the Modified Minimum Value Option II is in effect.

b. For UNSOLD, MARKETABLE harvested production, enter not less than the minimum value per pound as listed in the Special Provisions, without regard to the selection of Modified Minimum Value Options.

Q. Mkt. Price: Enter the adjusted average value per pound (not less than zero) of sold or unsold harvested production from item 19 of the Summary of Harvested Production. If such production has no value, enter “0.00.”

R. Quality Factor: Enter the greater of (Column “Q.1”) or (Column “Q.2”).

S. Production to Count: Production from Column “P” times Column “R,” rounded to whole dollars.

NOTE: For CAT policies, multiply result by .55, unless otherwise instructed by the insurance provider because adjustment will be made by other manual or automated computation process.

NOTE: FOR ITEMS 22-24. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER’S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

22. Section II Total:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of Column “S,” in whole dollars.
23. **Section I Total:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Enter figure from Section I, Column “O” total, in whole dollars.

24. **Unit Total:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Total of 22 and 23, in whole dollars.

25. **Adjuster’s Signature, Code #, and Date:** Signature of adjuster, code number, and date signed after the insured (or insured’s authorized representative) has signed. For an absentee insured, enter adjuster’s code number ONLY. The signature and date will be entered AFTER the absentee has signed and returned the Production Worksheet.

**NOTE:** Final indemnity inspections should be signed on the bottom line.

26. **Insured’s Signature and Date:** Insured’s (or insured’s authorized representative’s) signature and date. BEFORE obtaining insured’s signature, REVIEW ALL ENTRIES on the Production Worksheet WITH THE INSURED, particularly explaining codes, etc., that may not be readily understood.

**NOTE:** Final indemnity inspections should be signed on the bottom line.

27. **Page Numbers:**

**PRELIMINARY:** Page numbers - “1,” “2,” etc., at the time of inspection.

**FINAL:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

One acre is equal to 43,560 square feet. Linear feet of row per acre equals 43,560 square feet divided by the row width in feet to tenths. Divide the result by 1000 to obtain the 1/1000 per acre sample row length (rounded to tenths).

**EXAMPLE:** 43,560 sq. ft./acre ÷ 3.3 (or 40 inches) foot row width = 13,200 linear feet of row per acre. 13,200 linear feet ÷ 1000 = 13.2 foot row length for a 1/1000 acre sample.

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT)
To the extent that the information requested herein relates to your individual capacity as opposed to your business capacity, the following statements are made in accordance
with the Privacy Act of 1974, as amended (5 U.S.C. 552a). The authority for requesting information to be furnished on this form is the Federal Crop Insurance Act, (7 U.S.C.
1501 et seq.) and the Federal crop insurance regulations contained in 7 C.F.R. chapter IV.

Collection of the social security account number (SSN) or the employer identification number (EIN) is authorized by section 506 of the Federal Crop Insurance Act (7 U.S.C.
1506), and is required as a condition of eligibility for participation in the Federal crop insurance program. The primary use of the SSN or EIN is to correctly identify you, and
any other person with an interest in you or your entity of 10 percent or more, as a policyholder within the systems maintained by the Federal Crop Insurance Corporation
(FCIC). Furnishing the SSN or EIN is voluntary; however, failure to furnish that number will result in denial of program participation and benefits.

The balance of the information requested is necessary for the insurance company and FCIC to process this form to: provide insurance; provide reinsurance; determine
eligibility; determine the correct parties to the agreement; determine and collect premiums or other monetary amounts (including administrative fees and over payments);
and pay benefits. The information furnished on this form will be used by Federal agencies, FCIC employees, insurance companies, and contractors who require such
information in the performance of their duties. The information may be furnished to: FCIC contract agencies, employees and loss adjusters; reinsured companies; other
agencies within the United States Department of Agriculture; The Department of Treasury including the Internal Revenue Service; the Department of Justice, or other Federal
or State law enforcement agencies; credit reporting agencies and collection agencies; other Federal agencies as requested in computer matching programs; and in response
to judicial orders in the course of litigation. The information may also be furnished to congressional representatives and senators making inquiries on your behalf. Furnishing
the information required by this form is voluntary; however, failure to report the correct and complete information requested may result in rejection of this form; rejection of
any claim for indemnity, replanting payment, or other benefit; ineligibility for insurance; and a unilateral determination of any monetary amounts due.

PAPERWORK REDUCTION ACT
In accordance with the Paperwork Reduction Act, public reporting burden for the collection of information is estimated to average 60 minutes per response, including the time
for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send
comments regarding this burden estimate, or any other aspect of this collection information, including suggestions for reducing this burden to the Department of Agriculture,
Clearance Officer, OIRM (OMB No. 0563-0053), Stop 7630, Washington, D.C. 20250-7630.

NONDISCRIMINATION STATEMENT
The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability,
political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for
communication of program information (Braille, large print, audiotape, etc.) should contact USDA’s TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-
9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
