PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK

FCIC-25680 (11-2010)

2011 and Succeeding Crop Years

UNITED STATES DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C. 20250

FEDERAL CROP INSURANCE HANDBOOK		NUMBER: 25680 (11-2007)	
SUBJECT: PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK 2011 AND SUCCEEDING CROP YEARS	OPI: Product Administration & Standards Division		
	Approved:		Date:
	/S/ <i>Tim B. Witt</i> Deputy Administrator, Product Management		<i>November 19, 2010</i>

THIS HANDBOOK CONTAINS THE OFFICIAL FCIC-ISSUED LOSS ADJUSTMENT STANDARDS FOR THIS CROP FOR THE 2011 AND SUCCEEDING CROP YEARS. ALL REINSURED COMPANIES WILL UTILIZE THESE STANDARDS FOR BOTH LOSS ADJUSTMENT AND LOSS TRAINING.

SUMMARY OF CHANGES/CONTROL CHART

The following list contains significant changes to this handbook, as determined by us. It may not represent all changes made. All changes made to this handbook are applicable regardless of whether or not listed.

Major Changes: See changes or additions in text, which have been **highlighted**. Three stars (***) identify where information has been removed.

Changes for Crop Year 2011 (FCIC 25680) issued **November 2010**:

- A. Throughout handbook: Made editorial and syntax changes so handbook text tracks with current RMA-approved handbook formatting, and updated examples and forms as needed.
- B. Throughout the handbook: Comments that pertained to grammar, punctuation, deleting unneeded words, rewording to make a sentence flow better, corrections of reference numbers, formatting, etc. were incorporated if accepted, but are not listed.
- C. **Subsection 2 B (3)** – Added abbreviation for “Basic Provisions” (BP), “Crop Provisions” (CP), and “Special Provisions” (SP).
- D. **Subsection 8 C** – Inserted new production worksheet and completion instructions.
- E. **Subsection 8 C** – Incorporated revised production worksheet example to reflect the new production worksheet.

1. INTRODUCTION

THIS HANDBOOK MUST BE USED IN CONJUNCTION WITH THE LOSS ADJUSTMENT MANUAL (LAM) STANDARDS HANDBOOK, FCIC-25010.

The FCIC-issued loss adjustment standards for this crop are the official standard requirements for adjusting losses in a uniform and timely manner. The FCIC-issued standards for this crop and crop year are in effect as of the signature date for this crop handbook at www.rma.usda.gov/handbooks/25000/index.html. All **Approved Insurance Providers (AIPS)** will utilize these standards for both loss adjustment and loss **adjustment** training for the applicable crop year. These standards, which include crop appraisal methods, claims completion instructions, and form standards, supplement the general (not crop-specific) loss adjustment standards identified in the LAM.

2. SPECIAL INSTRUCTIONS

This handbook remains in effect until superseded by reissuance of **either** the entire handbook **or** selected portions (through slipsheets or bulletins). If slipsheets have been issued for a handbook, the original handbook as amended by slipsheet pages shall constitute the handbook. A bulletin can supersede either the original handbook or subsequent slipsheets.

A. DISTRIBUTION

- (1) The following is the minimum distribution of forms completed by the adjuster and signed by the insured (or the insured's authorized representative) for the loss adjustment inspection.
- (2) One legible copy to the insured. The original and all remaining copies as instructed by the AIP. It is the AIP's responsibility to maintain original insurance documents relative to policyholder servicing as designated in their approved plan of operations.

B. TERMS, ABBREVIATIONS, AND DEFINITIONS

- (1) Terms, abbreviations, and definitions **general** (not crop specific) to loss adjustment are identified in the LAM.
- (2) Terms, abbreviations, and definitions **specific** to processing chile pepper loss adjustment and this handbook, which are not defined in this section, are defined as they appear in the text.
- (3) Abbreviations:

BP	Basic Provisions
CAT	Catastrophic Risk Protection
CIH	Crop Insurance Handbook
CP	Crop Provisions

(4) Definition(s):

Allowable Cost	The dollar amount per pound for harvesting and hauling that is shown in the SP .
Base Contract Price	The price stipulated on the processor contract without regard to discounts or incentives that may apply.
Fruit Set	The reproductive stage of the plant at which 30 percent of the plants have produced at least one pod that has reached a minimum of one half inch in length.
Harvest	The removal of pods from the plant either by hand or machine.
Mature Chile Pepper	A chile pepper is considered to be mature when it is ready for harvesting and/or processing.
Processor	Any business enterprise regularly engaged in processing chile peppers into products for human consumption/use, that possesses all licenses and permits for processing chile peppers required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process the contracted chile peppers within a reasonable amount of time after harvest.
Processor Contract	<p>A written contract between the producer and the processor, containing at a minimum:</p> <ul style="list-style-type: none">(a) The producer's commitment to plant and grow chile peppers, and to deliver the chile pepper production to the processor;(b) The processor's commitment to purchase all the production from a specified number of acres or the specified quantity of production stated in the processor contract; and(c) A base contract price or formula for a price that will be paid to the producer for the production stated in the contract.
Thinning	A process to reduce emerged seedlings to groups of 1 to 3 seedlings every 10-12 inches.

3. INSURANCE CONTRACT INFORMATION

The AIP is to determine that the insured has complied with all policy provisions of the insurance contract. **CP**, which are to be considered in this determination include (but are not limited to):

A. INSURABILITY

The following may not be a complete list of insurability requirements. Refer to the **BP**, **CP**, and **SP** for a complete list.

- (1) The crop insured will be all the chile peppers in the county, in which the insured has a share, for which premium rates are provided by the actuarial documents; and

- (a) That are planted to be harvested and processed for human consumption/use.
 - (b) That are grown under an irrigated practice.

Refer to the LAM and the **BP** for the definition of an irrigated practice.

- (c) That are grown by a person who in at least one of the three previous crop years:

- 1 Grew chile peppers for commercial sale to a processor; or
 - 2 Managed a chile pepper farming operation that contracted with a processor.

- (d) That are grown under and in accordance with the requirements of a processor contract executed before the acreage reporting date and is not excluded from the processor contract at any time during the crop year;

- 1 Insured acreage is limited to the amount specified in the processor contract;
 - 2 If a specific number of acres are not specified in the processor contract, all planted acres will be insured and the liability will be limited to the value of the contracted production minus allowable cost.

- (e) That are not:

- 1 Interplanted with another crop;
 - 2 Planted into an established grass or legume; or
 - 3 Grown for direct marketing.

- (2) A chile pepper producer who is also a processor may establish an insurable interest, if the following requirements are met:
 - (a) The processor must comply with the Processing Chile Pepper Pilot Crop Provisions;
 - (b) Prior to the sales closing date, the Board of Directors or officers of the processor must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and
 - (c) An inspection performed by the AIP reveals that the processing facilities comply with the definition of a processor contained in the **CP**.

B. INSURABLE ACREAGE

Refer to the LAM for information on Insurable Acreage and Acreage Under Contract With a Processor.

- (1) Insurance coverage is not provided on any acreage on which:
 - (a) Chile peppers, tomatoes, beets, cucurbits, eggplant, spinach, or beans have been grown in either of the two previous crop years, or on which cotton was grown the previous crop year, unless otherwise provided by the **SP**; or
 - (b) Chile peppers are not placed in rows far enough apart to permit mechanical cultivation, unless otherwise provided by the **SP**.
- (2) Any acreage of chile peppers damaged before the final planting date whenever less than 50% of plant stand remains and it is practical to replant, must be replanted. In addition to the definition contained in the **BP**, it will not be considered practical to replant unless production from the replanted acreage can be delivered under the terms of the chile pepper processor contract, or the processor agrees in writing that it will accept the production from the replanted acreage.

C. GUIDELINES RELATIVE TO “BYPASSED” CHILE PEPPER ACREAGE

Refer to the LAM for guidelines relative to “Bypassed Acreage.”

D. PROVISIONS AND PROCEDURES NOT APPLICABLE TO CAT COVERAGE

Refer to the CIH and LAM for provisions and procedures not applicable to CAT.

E. UNIT DIVISION

Refer to the insurance contract for unit provisions. Unless limited by the **CP** or **SP**, a basic unit, as defined in the **BP**, may be divided into optional units if, for each optional unit, all the conditions stated in the applicable provisions are met.

- (1) For processor contracts that stipulate the amount of acreage to be planted, refer to the **BP**. In addition to, or instead of, establishing optional units by section, section equivalent or FSA farm serial number, optional units may be established based on the type designated on the **SP**.
- (2) For processor contracts that stipulate the amount of production to be delivered, refer to the **CP**.
 - (a) In lieu of the definition contained in the **BP**, a basic unit will consist of all acreage planted to the insured crop in the county that will be used to fulfill contracts with each processor. There will be no more than one basic unit for all production contracted under each processor contract; and
 - (b) Provisions in the **BP** that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable.
 - (c) Optional units may only be established based on the types designated on the **SP**.

F. QUALITY ADJUSTMENT

There is no quality adjustment for processing chile peppers.

4. REPLANTING PAYMENT PROCEDURES

There is currently no replanting payment available for processing chile peppers. Refer to the **BP** and the **CP** for replanting requirements prior to the final planting date.

5. PROCESSING CHILE PEPPER APPRAISALS

A. GENERAL INFORMATION

Potential production for all types of inspections will be appraised in accordance with procedures specified in this handbook and the LAM.

B. SELECTING REPRESENTATIVE SAMPLES FOR APPRAISALS

- (1) Determine the minimum number of required samples for a field or subfield by the field size, the average stage of growth, age (size) and general capabilities of the plants, and variability of potential production and plant damage within the field or subfield.
- (2) Split the field into subfields when:
 - (a) variable damage causes the crop potential to appear to be significantly different within the same field; or
 - (b) the insured wishes to destroy a portion of a field.
- (3) Each field or subfield must be appraised separately.
- (4) Take not less than the minimum number (count) of representative samples required in **TABLE A** for each field or subfield.

C. MEASURING ROW WIDTH FOR SAMPLE SELECTION

Use these instructions for all appraisal methods that require row width determinations, except stand reduction.

- (1) Use a measuring tape marked in inches or convert a tape marked in tenths, to inches, to measure row width (refer to the LAM for conversion table).
- (2) Measure across **THREE OR MORE** row spaces, from the center of the first row to the center of the fourth row (or as many rows as needed), and divide the result by the number of row spaces measured across, to determine an average row width in whole inches.

EXAMPLE:

$$120 \text{ inches} \div 3 \text{ row spaces} = 40 \text{ inches average row width}$$

D. DETERMINING SAMPLE ROW LENGTH FOR 1/1000 ACRE

- (1) Apply the average row width (refer to **TABLE C**) to determine the length of sample row required for a 1/1000 of an acre sample.

- (2) For row widths other than those in **TABLE C**, determine the sample row length as follows:
 - (a) Divide row width in inches (nearest one-half inch) by 12 in./ft. and round to the nearest thousandth.
 - (b) Divide 43,560 sq. ft./acre by the determined row width in item (a) above and round to the nearest thousandth. Divide the result by 1000 (for 1/1000 acre) and round to the nearest tenth.

EXAMPLE: Measured row width in the field is 25 in. $25 \text{ in.} \div 12 \text{ in./ft.} = 2.083 \text{ ft.}$
 $43,560 \text{ sq. ft./acre} \div 2.083 \text{ ft.} = 20,912.146.$ $20,912.146 \div 1000 = 20.9 \text{ ft. row length.}$

E. CHILE PEPPER STAGES OF INSURANCE

- (1) These instructions provide stage information for use when appraising potential production during various stages.
- (2) The stage determination is based on the length of time between specified stages, depending on whether plants are direct-seeded or transplanted. Fields should be split into subfields to reflect distinctly different stages from different parts of the field.

Stage	Amount of Insurance	Description of Stage
1	75%	For seeded acreage until thinning.
2	85%	From thinning or transplanting to fruit set.
3	100%	From fruit set until harvest or end of insurance.

F. DETERMINING THE STAGE AMOUNT OF INSURANCE PER ACRE

Any acreage of chile peppers damaged in the first, second, or third stage to the extent that the majority of producers in the area would not normally further care for the crop must be **destroyed** prior to a claim being finalized. The amount of insurance payable for such acreage will be based on the stage the plants had achieved when the damage occurred.

EXAMPLE: The insured selected \$922 per acre amount of insurance and the crop was determined to be in stage 1 when the damage occurred. The table in section 5E above shows stage 1 Amount of Insurance percentage to be 75%.

Multiply \$922 by 75% = \$691 (rounded to nearest whole dollar) to obtain the stage 1 per acre amount of insurance.

G. CHILE PEPPER GROWTH STAGES

(1) VEGETATIVE STAGES

- (a) Plants are classified as being in the “V” (vegetative) stages until a bud appears in the crown; thereafter, the plant will be classified as “R” (reproductive) stage.
- (b) Stages of growth should be determined by node identification, not by leaf identification. Many leaflets will be sloughed and correct staging may become impossible.
- (c) Stage identification begins by identifying the cotyledonary nodes. They are the first two nodes on the plant located opposite each other on the main stem.
- (d) For each stage of growth, with the exception of VC stage, there will always be three nodes per stage. All stages are based on 50% of the plants at or beyond a given phase of development.

“V” STAGE DESCRIPTION

- VC Plants 1 inch to 1 3/4 inch in height; plant remains in this stage for approximately 5 days from emergence.
- V1 Internodes above cotyledonary nodes have elongated 1/2 inch or more; first true leaf approaching full size, second and third leaves developing rapidly and approaching full size near the end of period. Time interval is approximately 15 days.
- V2 Fourth, fifth and sixth internodes have elongated 1/2 inch or more. Time interval is approximately 15 days.
- V3 Seventh, eighth and ninth internodes have elongated 1/2 inch or more. Time interval is approximately 15 days.
- V4 Tenth, eleventh and twelfth internodes have elongated 1/2 inch or more. Time interval is approximately 15 days.
- V5 From thirteenth internode to the crown has elongated 1/2 inch or more. Time interval is approximately 15 days.

(2) REPRODUCTIVE STAGES

Plants are classified as being in the “R” (reproductive) stages when the first bud is visible. The first bud normally appears when the crown limbs are beginning to form. The crown limbs normally begin to form above the 14th or 15th node.

“R” STAGE DESCRIPTION

Refer to next page for diagram of “R” stage illustrations.

- R1 The plant is approximately 76 days from emergence to this stage. The first bud (bloom) will appear on the plant when the crown limbs are beginning to develop. This may be as low as the 14th node or as high as the 17th node. The first bud may have aborted but the scar will remain visible. The crown limbs have elongated approximately 1 1/2 inches. Time interval is approximately 9-10 days.
 - R2 The first set of blooms are developing and the crown limbs are beginning to branch. The crown limbs have elongated to the third node from the crown. Time interval is approximately 30 days.
 - R3 The plant is blooming and podding freely. Mature pods will appear at the first and second nodes of the crown limbs. This stage begins above the third node from the crown. Time interval is approximately 21 days.
 - R4 The plant has now set all pods that will contribute to the ultimate yield. Any pods less than 1 inch will not contribute to the ultimate yield and should not be considered.
- (3) For hail damage the stage of growth at the time of damage can be determined by inspecting the plant to determine the portions (nodes, pods, etc.) exposed at the time of the storm. In the absence of hail, and as verification, the stage can be determined by counting back from the date of adjustment by the time intervals between stages.

Do not attempt to go from reproductive to vegetative stages using time intervals.

6. APPRAISAL METHODS

A. GENERAL INFORMATION

These instructions provide information on appraisal methods for:

Appraisal Method...	Use...
Stand Reduction Method (Vegetative Stages)	for planted acreage with no emerged seed and on plants from thinning through the V5 stage of growth.
Plant Damage Method – Hail (Vegetative Stages)	on plants from thinning through the V5 stage of growth for hail damage.
Stand Reduction Method (Reproductive Stages)	from the R1 through the R3 stage of growth.
Plant Damage Method – Hail (Reproductive Stages)	from the R1 stage of growth through the R3 stage of growth for hail damage.
Chile Pepper Count Method	from the R4 stage of growth until the chile peppers are mature and sufficient in size to weigh.
Chile Pepper Weight Method	for mature unharvested chile peppers sufficient in size to weigh.

If the reduction in stand is solely due to non-emerged seed due to insufficient soil moisture, do not complete appraisals prior to the time specified in the LAM. Refer to the subsection in the LAM regarding deferred appraisals and non-emerged seed.

B. DEFERMENT OF CHILE PEPPER APPRAISALS BEFORE PODDING

Accurate determination of chile pepper production is very difficult until pods have developed. Field inspections that show both destroyed (dead, missing, non-emerged, or incapable of producing chile peppers), partially destroyed plants, heavy stalk bruising or extensive leaf defoliation in the sample would justify a deferment. The recovery capabilities of the chile pepper plant are primarily determined on the basis of weather conditions for the remainder of the growing season.

- (1) If practical, and the insured will agree, defer the appraisal for chile peppers until pods have developed and then use chile pepper count or weight method, whichever is applicable.

If there is no production potential, enter “0” appraised potential in the applicable item on the Claim Form and complete the claim.

- (2) Complete the preliminary inspection with special attention to the type of damage and its severity.
- (3) If acreage will be released to go to another use:
 - (a) Look at all fields or subfields thoroughly within the unit. It is important to note the acreage that is not damaged.
 - (b) Explain to the insured that a more accurate determination of the amount of loss can be made closer to harvest time.
 - (c) Mark the areas as instructed in the LAM for deferred appraisals.
 - (d) Advise the insured that if the crop is destroyed, the samples that you specified must be preserved and cared for.
- (4) Refer to the LAM for additional instructions regarding deferred appraisals.
- (5) If not practical or the insured will not agree to defer the appraisal until pods have developed, use the stand reduction method as outlined below.

C. STAND REDUCTION METHOD - VEGETATIVE STAGES (from thinning through V5 stage)

- (1) VEGETATIVE STAGE – DESTROYED: The following procedure is applicable for original stands of up to 240 plants per 100 feet of row after thinning.

If original stand EXCEEDS 240 plants per 100 feet of row, use (2) below.

- (a) Determine the minimum number of required representative samples. Refer to **TABLE A**.
- (b) Determine the stage of growth at the date of damage. (Refer to section 5G.)
- (c) Determine the stage of growth at the date of adjustment. (Refer to section 5G.)
- (d) Count the number of live and destroyed (dead, missing, non-emerged, or incapable of producing chile peppers) plants per 100 feet of row. Round the number of plants to the nearest ten plants (i.e., 225 plants equals 230 plants).
- (e) Count the number of destroyed plants in each 100-foot row sample. Round the result to the nearest ten plants (i.e., 82 plants equal 80 plants).
- (f) Using the numbers in (d) and (e) above, refer to **TABLE B** to obtain the V-Stage Stand Reduction percent loss.
- (g) If the loss is from destroyed plants, only total the V-Stage Stand Reduction percent losses and divide by the number of samples to obtain the sample average damage.

- (h) Subtract the sample average damage from 100 percent to obtain the percent potential.
- (i) Multiply the percent potential times the reference maximum dollar amount (as shown on the actuarial documents) adjusted by the applicable stage percentage to obtain the appraisal in dollars and cents per acre.
- (j) Refer to EXAMPLE 1: STAND REDUCTION – VEGETATIVE STAGES – DESTROYED PLANTS, Chile Pepper Appraisal Worksheet for additional illustration.

If there is plant damage due to hail, follow the instructions in section 6D, PLANT DAMAGE METHOD – HAIL – VEGETATIVE STAGES, and complete computations as described.

- (2) The following procedure is applicable for loss from plants destroyed in V-stages of growth when original stand EXCEEDS 240 plants (after thinning) in 100 feet of row.
 - (a) Reduce the destroyed plants by the number of plants in original stand in excess of 240 and apply to the chart FOR ORIGINAL STAND OF 240.

EXAMPLE:

310 plants in original stand (after thinning)
 130 plants destroyed
 (310 exceeds 240 by 70 plants)
 130 minus 70 = 60 (modified plants destroyed)
 Apply chart at 240 original plants
 Apply chart at 60 plants destroyed
 Stand Reduction Loss = 3%

- (b) On the Stand Reduction and Vegetative Stage Plant Damage appraisal worksheet under item 15, draw a diagonal line. Enter the number of original plants above the diagonal line and 240 below the diagonal line. Draw a diagonal line under item 16, and enter the number of plants destroyed above the diagonal line and the modified number of plants destroyed below the diagonal line.

- (c) Complete the remainder of the appraisal as outlined in section 6C above.

D. PLANT DAMAGE METHOD – HAIL – VEGETATIVE STAGES

- (1) **VEGETATIVE STAGE – PARTIALLY DESTROYED:** The Plant Damage Method is used in conjunction with the Stand Reduction Method to determine loss of production from damage due to hail, **only**.

- (a) Individually evaluate each plant in 10 feet of row within the 100-foot sample used to determine stand reduction.
 - (b) Determine the node at which each plant has been cut off.
 - (c) Using the Chile Pepper Field notes for cut-off plants (bottom half of the appraisal worksheet – Vegetative Stage), enter the number of cut-off plants at the appropriate node, and multiply by the appropriate factor from **TABLE D**.
 - (d) Total the results from all samples.
 - (e) Count the total number of live plants (including plants with and without damage) in the 10-foot sample.
 - (f) Divide the total cut-offs by the total number of live plants in the sample to obtain the percent loss and round the result to tenths of a percent.
 - (g) Multiply the percent loss by the percent crop remaining to obtain the net damage.
 - (h) Add the percent loss from any stand reduction to the net damage to obtain the total percent damage.
 - (i) Add the total percent damage from all samples and divide by the number of samples to obtain the sample average damage.
 - (j) Subtract the sample average damage from 100 percent to obtain the percent potential.
 - (k) Multiply the percent potential times the reference maximum dollar amount (as shown on the actuarial documents) adjusted by the applicable stage percentage to obtain the appraisal in dollars and cents per acre.
- (2) Refer to **EXAMPLE 2: STAND REDUCTION AND HAIL DAMAGE – VEGETATIVE STAGES**, Chile Pepper Appraisal Worksheet for additional illustration.

E. STAND REDUCTION METHOD - REPRODUCTIVE STAGES (from R1 through R3 stage)

- (1) Stand Reduction adjustment in the reproductive stage consists of plants destroyed (i.e. cut-off below the cotyledonary nodes), including plants damaged to the extent that they cannot recover and contribute to the ultimate yield.
- (2) Information for plants destroyed, etc., should be entered in Part II of the Chile Pepper Appraisal Worksheet/Reproductive Stage Stand Reduction and Plant Damage Method and transferred to the appropriate items in Part I.

REPRODUCTIVE STAGES - DESTROYED

- (a) Determine the minimum number of required representative samples. Refer to **TABLE A**.
- (b) Determine the stage of growth at the date of damage (Refer to section 5G), and enter in Part I.
- (c) Determine the stage of growth at the date of adjustment (Refer to subsection 5 G), and enter in Part I.
- (d) Determine the original number of plants per 10 feet of row by counting the number of live, missing, and dead plants.
- (e) Count the number of plants destroyed in each 10-foot sample.
- (f) Complete Part II, items 31 through 34 of the Chile Pepper Appraisal Worksheet/Reproductive Stage Stand Reduction and Plant Damage Method, and transfer the result in item 34 to Part I, item 15 of the appraisal worksheet.

Do not refer to **TABLE B** to obtain the percent plants destroyed. Stand reduction in the reproductive stage is on a 1-for-1 basis.

- (g) If the loss is from destroyed plants only, total the percent of plants from all samples in Part I, item 24, and divide by the number of samples to obtain the average damage.
- (h) Subtract the average damage from 100 percent to obtain the percent potential.
- (i) Multiply the percent potential times the reference maximum dollar amount (as shown on the actuarial documents) adjusted by the applicable stage percentage to obtain the appraisal in dollars and cents per acre.
- (j) Refer to **EXAMPLE 3: STAND REDUCTION – REPRODUCTIVE STAGES – DESTROYED PLANTS**, Chile Pepper Appraisal Worksheet for additional illustration.

If there is plant damage, follow the instructions in subsection 6 F, **PLANT DAMAGE METHOD – HAIL – REPRODUCTIVE STAGES**, and complete computations as described.

F. PLANT DAMAGE METHOD - HAIL - REPRODUCTIVE STAGES

- (1) Plant Damage adjustment in the reproductive stage consists of plants destroyed (i.e. cut-off below the cotyledonary nodes), including plants damaged to the extent that they cannot recover and contribute to the ultimate yield, partially destroyed plants, crown limbs destroyed and small/large pods destroyed for damage due to hail, **only**.
- (2) Loss for plants destroyed, partially destroyed, crown limbs destroyed, or pod damage are

entered in the Part II of the Chile Pepper Appraisal Worksheet/Reproductive Stage Stand Reduction and Plant Damage Method.

- (3) For plants destroyed or partially destroyed, use 10 feet of row within the 100-foot sample used for stand reduction.

(a) **REPRODUCTIVE STAGES – DESTROYED AND PARTIALLY DESTROYED**

- 1 Count the number of live, destroyed, and partially destroyed plants to determine the total number of plants in the representative 10-foot sample.
- 2 Count the number of destroyed plants in the representative 10-foot sample.
- 3 Divide the number destroyed plants by the total number of plants in the sample to obtain the percent plants destroyed.
- 4 Multiply the number of plants partially destroyed times the applicable factor from **TABLE D**.

EXAMPLE:

Stage of Growth on DOD: R3

2 plants partially destroyed, (1 at C9-C11, 1 at C12-C15)

Refer to TABLE D:	(1 plant @ C9-C11) X 90 factor	= 90
	(1 plant @ C12- C15) X 80 factor	= 80
	Total	170

- 5 Divide the factored plants destroyed by the number of plants in the sample. Enter the result in Part II, item 37 and Part I, item 16, rounded to tenths.

(b) **LIMBS AND PODS DESTROYED:**

For limbs and pods destroyed, use every 4th plant in the 10 feet of row for a total of 5 plants. If 5 plants cannot be selected within the 10 feet of row, continue in the same row by pulling every 4th plant until 5 plants are selected.

- 1 Count the total number of crown limbs destroyed in the 5-plant sample.

For partially destroyed crown limbs, total the percentage of each crown limb destroyed in the 5-plant sample and divide by 100 to obtain the equivalent number of whole limbs destroyed.

EXAMPLE:

R3 Stage Plant	% Crown Limb Destroyed	+	% Crown Limb Destroyed	+	% Crown Limb Destroyed	=	Total % Crown Limbs Destroyed
#1	20%	+	100%	+	60%	=	180%
#2	40%	+	40%	+	50%	=	130%
#3	70%	+	20%	+		=	90%
#4	100%	+	50%	+	50%	=	200%
#5	100%	+	70%	+	30%	=	200%
							800%
800% divided by 100 = 8 whole limbs destroyed.							

- 2 Multiply the number of crown limbs destroyed by the factor for the applicable stage from **TABLE E**. Enter the result in Part II, item 42 and Part I, item 19, rounded to tenths.

(c) FOR PODS DESTROYED:

- 1 Count the total number of pods for the 5-plant sample selected.
- 2 Count the number of pods destroyed for the 5-plant sample selected
- 3 Divide the number of pods destroyed by the total number of pods in the sample to obtain the percent of pods destroyed. Round the result to the nearest tenth of a percent (i.e., .098 = 9.8%).
- 4 Multiply the percent of pods destroyed by the factor for the applicable stage from **TABLE F** to obtain the gross pod loss percent. Enter the result in Part II, item 48 and Part I, item 22, rounded to tenths.

After completing Part II and transferring the appropriate entries to Part I, complete Part I as outlined for items 12 through 30 in section 8B (Chile Pepper Stand Reduction and Vegetative Stage Plant Damage Appraisal Worksheet Instructions). Refer to **EXAMPLE 4: STAND REDUCTION AND HAIL DAMAGE – REPRODUCTIVE STAGES**, Chile Pepper Appraisal Worksheet for additional illustration.

G. CHILE PEPPER COUNT METHOD

This appraisal method is used to determine the average number of mature (or would be mature by the calendar date for the end of the insurance period specified in the crop provisions for the specific type) chile peppers within a sample row (1/1000 acre); thereby, allowing a pound per-acre appraisal of potential production. Refer to section 5C and D for determination of sample row length. Conduct the appraisal as follows:

- (1) Determine the minimum number of required representative samples. Refer to **TABLE A**.

- (2) Determine the required row width and length of sample row for 1/1000 of an acre. Refer to **TABLE C**.
- (3) Count the number of mature (or would be mature by the calendar date for the end of the insurance period specified in the crop provisions for the specific type) chile peppers in the sample row.
- (4) Divide the total number of chile peppers determined in (3) above by the number of sample plots to determine the average chile peppers per sample.
- (5) Multiply the average chile peppers per sample by the type factor (**TABLE G**) to obtain the potential pounds per sample for the type. Round the result to tenths.
- (6) Multiply the result in section 6G, item (5) by the acre factor (1000) to obtain the pounds per acre.
- (7) Multiply the pounds per acre in subsection 6G, item (6) by the base contract price to obtain the value of the appraised production per acre.

H. CHILE PEPPER WEIGHT METHOD

This appraisal method is used to determine the quantity of chile peppers (by weight) in a sample row to determine the potential production in pounds per acre. Refer to section 5C and D for determination of sample row length. Conduct the appraisal as follows:

- (1) Determine the minimum number of required representative samples. Refer to **TABLE A**.
- (2) Determine the required row width and length of sample row for 1/1000 of an acre. Refer to **TABLE C**.
- (3) Harvest and weigh the chile peppers in each sample plot.
- (4) Add all sample plot weights together, and divide by the total number of sample plots to determine an average sample weight.
- (5) Multiply the result in section 6H, item (4) by the acre factor (1000) to obtain the pounds per acre.
- (6) Multiply the pounds per acre in section 6H, item (5) by the base contract price to obtain the value of the appraised production per acre.

7. APPRAISAL DEVIATIONS AND MODIFICATIONS

A. DEVIATIONS

Deviations in appraisal methods require FCIC written authorization (as described in the LAM) prior to implementation.

B. MODIFICATIONS

There are no pre-established modifications contained in this handbook. Refer to the LAM for additional information.

8. APPRAISAL WORKSHEET ENTRIES AND COMPLETION PROCEDURES

A. APPRAISAL WORKSHEET FORM STANDARDS

- (1) The entry items in section 8C are the minimum requirements for the Processing Chile Pepper Appraisal Worksheets. All of these entry items are “Substantive,” (i.e., they are required.)
- (2) Appraisal worksheet completion instructions. The completion instructions for the required entry items on the appraisal worksheet in the following subsections are “Substantive,” (i.e., they are required.)
- (3) The Privacy Act and Non-Discrimination statements are required statements that must be printed on the form or provided to the insured as a separate document. These statements are not shown on the example form in this section. The current Non-Discrimination Statement and Privacy Act Statement can be found on the RMA website at <http://www.rma.usda.gov/regs/required.html> or successor website.
- (4) Refer to the DSSH for other crop insurance form requirements (e.g., font point size, etc.)

B. GENERAL INFORMATION FOR WORKSHEET ENTRIES AND COMPLETION INSTRUCTIONS

- (1) Include the AIP’s name in the appraisal worksheet title if not preprinted on the AIP’s worksheet or when a worksheet entry is not provided.
- (2) Include the claim number on the appraisal worksheet (when required by the AIP), when a worksheet entry is not provided.

- (3) For Chile Pepper Count Method and Chile Pepper Weight Method appraisals, separate appraisal worksheets must be completed for each unit appraised (applicable to preliminary and final claims). Refer to section 5, herein, for sampling requirements.
- (4) For all other appraisals, separate appraisal worksheets must be completed for each unit appraised, and for each field or subfield (applicable to preliminary and final claims). Refer to Section 5, "Processing Chile Pepper Appraisals" for sampling requirements.
- (5) Standard appraisal worksheet items are numbered consecutively in sections 8C below. Example appraisal worksheets are provided to illustrate how to complete all entries, except the last three items on the respective appraisal worksheets.

C. WORKSHEET ENTRIES AND COMPLETION INFORMATION

CHILE PEPPER VEGETATIVE STAGE STAND REDUCTION AND PLANT DAMAGE METHOD

Verify or make the following entries:

<u>Item No.</u>	<u>Information Required</u>
---------------------	-----------------------------

Company: Name of AIP, if not preprinted on the worksheet (Company Name).

Claim Number: Claim number as assigned by the AIP.

1. **Insured's Name:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.

2. **Policy No.:** Insured's assigned policy number.

3. **Crop Year:** Four-digit crop year, as defined in the policy, for which the claim is filed.

***4. **Unit No.:** Unit number from the Summary of Coverage after it is verified to be correct.

5. **Field ID:** Field identification symbol.

6. **Practice:** Three-digit code number entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If "No Practice Specified," enter appropriate 3-digit code number from the actuarial documents.

7. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.

8. **Acres:** Number of determined acres, to tenths, in field or sub-field being appraised.

9. **Row Width:** Row width to nearest inch. Refer to subsection 5 C for row width determination information.
10. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include SPECIFIC DATE where applicable, as in the case of hail damage (e.g., Aug. 11).
11. **Cause of Damage:** Name of insured cause of loss for **this crop** as listed in the LAM. If an insured cause of loss is coded as “Other,” explain in the Remarks (Item 35).

DIRECT DAMAGE

12. **Sample No.:** If the appraisal requires more samples than the form allows, (refer to **TABLE A** for minimum representative sample requirements) use additional pages, and number the samples 5, 6, 7, etc.
13. **DOD:** Stage of growth on date of damage. (Refer to subsection 5 G.)
14. **DOA:** Stage of growth on date of appraisal. (Refer to subsection 5 G.)
15. **Original (100 Feet):** Original stand (live and destroyed plants) in 100 feet of row.
16. **Destroyed (100 Feet):** Number of destroyed plants in 100 foot of row.
17. **V-Stage Stand Reduction % Loss:** V-stage stand reduction percent loss determined from the V-stage Stand Reduction Percent Loss Chart (**TABLE B**).
18. **% Crop Remaining:** Enter the result of subtracting the V-stage stand reduction percent loss (item 17) from 100%. If there is no direct damage, enter 100. If there is no plant damage due to hail (item 34) leave blank.

PLANT DAMAGE (HAIL)

19. **Gross:** If there is plant damage in the sample due to hail, complete the field notes, and enter the item 34 entry for the same sample.
20. **Net:** Multiply the % crop remaining (item 18) times the gross (item 19) (nearest tenth percent) if there is an entry in item 19.

TOTAL DAMAGE

21. **Total % Damage:** Enter the total direct and plant damage (V-stage stand reduction % loss (item 17) plus net (item 20), to nearest tenth percent).
22. **Total:** Total the total % damage entries (item 21) to nearest tenth percent. If there are more samples than form allows, enter accumulated total on last page.
23. **No. of Samples:** Enter the total number of samples taken for the appraisal.

COMPUTATIONS

24. **Average Damage:** Divide the total (item 22) by the number of samples (item 23) from all pages, to nearest tenth percent.
25. **% Potential Remaining:** Subtract the sample average damage (item 24) from 100% to nearest tenth percent.
26. **Dollar Amount of Insurance Per Acre:**
- a. For stage 3 appraisals: Enter the reference maximum dollar amount as shown on the actuarial documents.
 - b. For stage 2 appraisals: Enter the dollar amount of insurance per acre obtained by multiplying the reference maximum dollar amount by .85.
 - c. For stage 1 appraisals: Enter the dollar amount of insurance per acre obtained by multiplying the reference maximum dollar amount by .75.
 - d. Document calculations in the Remarks section of the appraisal worksheet.
27. **Appraisal (Dollars/Acre):** Convert the entry in % Potential Remaining (item 25) to a 3-place decimal (e.g., 13.3 % = .133) and multiply times the Dollar Amount of Insurance Per Acre (item 26). Enter the appraisal in dollars and cents per acre on the appraisal worksheet and in column 31 of the Production Worksheet.

CHILE PEPPER FIELD NOTES (PLANT DAMAGE DUE TO HAIL)

Complete the field notes on a representative 10-foot sample from within the sample area used for stand reduction if stand reduction has occurred. If not, select a representative 10-foot sample.

Verify or make the following entries:

- | Item No. | <u>Information Required</u> |
|-----------------|--|
| 28. | Cut-Off Symbol: MAKE NO ENTRY. Symbol pre-printed on appraisal worksheet. |
| 29. | Number Cut-Off: Enter the number of cut-off plants in the appropriate node span (i.e. - Cut-offs: 1 plant at C3 node, 2 plants at C5 node = 3 Cut-off plants in C3 - C5 node span). |
| 30. | Factor: MAKE NO ENTRY. Factor pre-printed on appraisal worksheet. |
| 31. | Result: Enter the result of multiplying the number cut-off (item 29) times the factor (item 30), to whole numbers. |
| 32. | Total (Column 31): Total of all the results (item 31 entries). |

33. **Total Live Plants in Sample:** Total number of live plants in the representative 10-foot sample (including plants with and without plant damage).
34. **% Loss:** Divide the column 31 total (item 32), by the total live plants in sample (item 33). Round the results to tenths. Enter this result in item 19.
35. **Remarks:** Remarks pertinent to the appraisal, sampling, and conditions in general (e.g. - very hot and dry), etc.

The following required entries are not illustrated on the Appraisal Worksheet example below.

36. **Insured's Signature and Date:** Insured's (or insured's authorized representative) signature and date. BEFORE obtaining the signature, REVIEW ALL ENTRIES on the Appraisal Worksheet WITH THE INSURED (or insured's authorized representative), particularly explaining codes, etc., which may not be readily understood.
37. **Adjuster's Signature, Code No., and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the "Narrative" of the Production Worksheet.
38. **Page:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

CHILE PEPPER REPRODUCTIVE STAGE STAND REDUCTION AND PLANT DAMAGE METHOD

Complete the appraisal worksheet in the following order:

- (1) Heading information
- (2) Part II
- (3) Part I

Verify or make the following entries:

**Item
No.**

Information Required

Company: Name of AIP, if not preprinted on the worksheet (Company Name).

Claim Number: Claim number as assigned by the AIP.

1. **Insured's Name:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
2. **Policy Number:** Insured's assigned policy number.
3. **Crop Year:** Four-digit crop year, as defined in the policy, for which the claim **is** filed.
- ***4. **Unit No.:** Unit number from the Summary of Coverage after it is verified to be correct.
5. **Field ID:** Field identification symbol.
6. **Practice:** Three-digit code number entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If "No Practice Specified," enter appropriate 3-digit code number from the actuarial documents.
7. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.
8. **Acres:** Number of determined acres, to tenths, in field or subfield being appraised.
9. **Row Width:** Row width to nearest inch.
10. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include SPECIFIC DATE where applicable, as in the case of hail damage (e.g., Aug. 11).

11. **Cause of Damage:** Name of insured cause(s) of loss for **this crop** as listed in the LAM. If an insured cause of loss is coded as “Other,” explain in the Notes (Item 38 or 49).

PART I (COMPLETE PART II BEFORE COMPLETING PART I)

12. **Sample No.:** If the appraisal requires more samples than the form allows, (refer to **TABLE A** for minimum representative sample requirements) use additional pages, and number the samples 6, 7, 8, etc.
13. **DOD:** Stage of growth on date of damage. (Refer to subsection 5 G.)
14. **DOA:** Stage of growth on date of appraisal. (Refer to subsection 5 G.)

PLANTS DESTROYED %

15. **% Plants Destroyed:** Percent of plants destroyed in 10-foot sample, apply sample entry from item 34.
16. **% Partially Destroyed:** Percent of plants partially destroyed in 10-foot sample, apply sample entry from item 37.
17. **Totally Destroyed:** Enter the result of % plants destroyed (item 15) plus the % partially destroyed (item 16), to tenths.
18. **% Crop Remaining:** Enter the result of subtracting the Totally Destroyed (item 17) from 100%. If there are no plants destroyed, enter 100. If there are no limbs and pods destroyed, (items 19 and 22) leave blank.

LIMBS DESTROYED %

19. **Gross Limb Loss %:** Percent of gross limbs lost, apply sample entry from item 42.
20. **Net Limb Loss %:** Multiply % crop remaining (item 18) times the gross limb loss % (item 19), if there is an entry in item 19. Percent rounded to nearest tenth (e.g. - .098 = 9.8).
21. **% Crop Remaining:** Enter the result of subtracting the net limb loss % (item 20) from % crop remaining (item 18).

PODS DESTROYED

22. **Gross Pod Loss %:** Percent of gross pods lost, applicable sample entry from item 48.
23. **Net Pod Loss %:** Multiply the % crop remaining (item 21) times the gross pod loss % (item 22), if there is an entry in item 22. Percent rounded to nearest tenth (e.g. - .098 = 9.8).

COMPUTATIONS

24. **Total Damage (Item 17 + Item 20 + Item 23):** Enter the result of adding Totally Destroyed (item 17) plus the net limb loss % (item 20) plus the net pod loss % (item 23), to tenths.
25. **Total:** Total of the total damage (item 24 entries). If more than five samples, enter accumulated total on last page.
26. **No. of Samples:** Enter the total number of samples taken for the appraisal.
27. **Average Damage:** Divide the total (item 25) by the number of samples (item 26). Round to the nearest tenth percent.
28. **% Potential Remaining:** Subtract the average damage (item 27) from 100%. Round to nearest tenth percent.
29. **Dollar Amount of Insurance Per Acre:**
- a. For stage 3 appraisals: Enter the reference maximum dollar amount as shown on the actuarial documents.
 - b. For stage 2 appraisals: Enter the dollar amount of insurance per acre obtained by multiplying the reference maximum dollar amount by .85.
 - c. For stage 1 appraisals: Enter the dollar amount of insurance per acre obtained by multiplying the reference maximum dollar amount by .75.
30. **Appraisal (Dollars/Acre):** Convert the entry in % Potential Remaining (item 28) to a 3-place decimal (e.g., 13.3 % = .133) and multiply times the Dollar Amount of Insurance per acre (item 29). Enter the appraisal in dollars and cents per acre on the appraisal worksheet and in column 31 of the Production Worksheet.

PART II

Verify or make the following entries:

Item No.	<u>Information Required</u>
---------------------	------------------------------------

PLANTS DESTROYED

DESTROYED

31. **Sample No.:** Match the sample with the same numbered sample used in item 12. If the appraisal requires more samples than the form allows, use additional pages, and number the samples 6, 7, 8, etc.

32. **No. of Plants in Sample:** Enter the number of live and destroyed plants counted in the 10-foot representative sample.
33. **Destroyed Plants:** Total number of destroyed plants in the representative 10-foot sample.
34. **% Plants Destroyed:** Divide the destroyed plants (item 33) by the number of plants in the sample (item 32). Percent rounded to nearest tenths (i.e., .098 = 9.8).

PARTIALLY DESTROYED

35. **Sample No:** Match the sample with the same numbered sample used in item 12. If the appraisal requires more samples than the form allows, use additional pages, and number the samples 5, 6, 7, etc.
36. **Factored Plants Destroyed:** Enter the sum of all results of multiplying the number of plants partially destroyed times the applicable factor from **TABLE D**.

EXAMPLE:

Stage of Growth on DOD: R3
2 plants partially destroyed, (1 at C9-C11, 1 at C12-C15)

Refer to **TABLE D:** (1 plant @ C9-C11) X 90 factor = 90
(1 plant @ C12- C15) X 80 factor = 80
Total 170

37. **% Partially Destroyed:** Divide the factored Plants Destroyed (item 36) by the number of plants in sample (item 32). Round to the nearest tenth of percent.
38. **Plants Destroyed/Partially Destroyed Notes:** Enter the calculations for determining the number of factored plants destroyed and any remarks pertinent to the appraisal. If additional space is needed, enter on a Special Report.

LIMBS DESTROYED

39. **Sample No.:** Match the sample with the same numbered sample used in item 12. If the appraisal requires more samples than the form allows, use additional pages, and number the samples 5, 6, 7, etc.
40. **No. of Crown Limbs Destroyed:** Total number of whole crown limbs destroyed. For partially destroyed crown limbs, total the percentage of each crown limb destroyed in the 5 plant sample, and divide by 100 to arrive at the equivalent number of whole limbs destroyed.

EXAMPLE:

R3 Stage Plant	% Crown Limb Destroyed	+	% Crown Limb Destroyed	+	% Crown Limb Destroyed	=	Total % Crown Limbs Destroyed
#1	20%	+	100%	+	60%	=	180%
#2	40%	+	40%	+	50%	=	130%
#3	70%	+	20%	+		=	90%
#4	100%	+	50%	+	50%	=	200%
#5	100%	+	70%	+	30%	=	200%
							800%
800% divided by 100 = 8 whole limbs destroyed.							

41. **Limb Factor:** Enter factor from **TABLE E** for the applicable stage.
42. **Gross Limb Loss %:** Multiply the number of crown limbs destroyed (item 40) by the limb factor (item 41). Round to nearest tenth percent (i.e. - .098 = 9.8).

PODS DESTROYED

43. **Sample No.:** Match the sample with the same numbered sample used in item 12. If the appraisal requires more samples than the form allows, use additional pages, and number the samples 5, 6, 7, etc.
44. **Total Pods:** Total number of pods counted for the 5 plants selected.
45. **Pods Destroyed:** Total number of pods destroyed for the 5 plants selected.
46. **% Pods Destroyed:** Divide the pods destroyed (item 45) by the total pods (item 44). Round to the nearest tenth percent (i.e. - .098 = 9.8).
47. **Pod Factor:** Enter factor from **TABLE F** for the applicable stage.
48. **Gross Pod Loss %:** Multiply the % pods destroyed (item 46) by the pod factor (item 47). Round to the nearest tenth percent (i.e. - .098 = 9.8).
49. **Limbs/Pods Destroyed Notes:** Enter the calculations for determining the number of crown limbs destroyed and any remarks pertinent to the appraisal. If additional space is needed, enter on a Special Report.

The following required entries are not illustrated on the Appraisal Worksheet example below.

50. **Insured's Signature and Date:** Insured's (or insured's authorized representative) signature and date. BEFORE obtaining the signature, REVIEW ALL ENTRIES on the Appraisal Worksheet WITH THE INSURED (or insured's authorized representative), particularly explaining codes, etc., which may not be readily understood.
51. **Adjuster's Signature, Code No., and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the "Narrative" of the Production Worksheet.
52. **Page:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

FCIC-25680 (P CHILE PEPPER)

CHILE PEPPER COUNT METHOD AND WEIGHT METHOD

For CHILE PEPPER COUNT METHOD, complete heading items 1 through 6, Part I items 7 through 19 and Part II items 31 through 34.

For CHILE PEPPER WEIGHT METHOD, complete heading items 1 through 6 and Part II, items 20 through 34.

Verify or make the following entries:

**Item
No.**

Information Required

Company: Name of AIP, if not preprinted on the worksheet (Company Name).

Claim Number: Claim number as assigned by the AIP.

1. **Insured's Name:** Name of insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.

2. **Policy Number:** Insured's assigned policy number.

***3. **Unit No.:** Unit number from the Summary of Coverage after it is verified to be correct.

4. **Crop Year:** Four-digit crop year, as defined in the policy, for which the claim **is** filed.

5. **Cause of Damage:** Name of insured cause of loss for **this crop** as listed in the LAM. If an insured cause of loss is coded as "Other," explain in the "Remarks (item 31)"

6. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., AUG 11).

PART I – CHILE PEPPER COUNT METHOD

7. **Field ID:** Field identification symbol.

8. **Acres to Tenths:** Number of determined acres, to tenths, in the field or subfield being appraised.

9. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.

10. **Stage:** The stage determination (1, 2, or 3) based on the length of time between specified stages. Refer to subsection 5 E.

11. **Fraction of Acre:** Enter "1/1000."

12. **Number of Chile Peppers Per Sample Plot:** The number of mature (or would be mature by the calendar dates for the end of the insurance period specified in the crop provisions for the specific type) chile peppers for each sample plot.
13. **Total No. of Chile Peppers:** Total number of chile peppers in all samples.
14. **No. of Sample Plots:** Total number of sample plots included in item 12.
15. **Average Chile Peppers Per Sample:** Divide the total number of chile peppers (item 13) by the number of sample plots (item 14). Round the result to tenths.
16. **Type Factor:** Factor for the type of chile peppers from **TABLE G**.
17. **Pounds Per Sample:** Multiply the average chile peppers per sample (item 15) by the type factor (item 16). Round the result to tenths.
18. **Acre Factor:** Enter "1000."
19. **Pounds Per Acre:** Multiply the pounds per sample (item 17) by the acre factor (item 18). Round the results to whole pounds.

PART II – CHILE PEPPER WEIGHT METHOD

20. **Field ID:** Field identification symbol.
21. **Acres to Tenths:** Number of determined acres, to tenths, in the field or subfield being appraised.
22. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.
23. **Stage:** The stage determination (1, 2, or 3) based on the length of time between specified stages. Refer to subsection 5 E.
24. **Fraction of Acre:** Enter "1/1000."
25. **Pounds Per Sample Plot:** Weight of chile peppers for each sample plot, recorded in pounds to tenths.
26. **Total Weight All Sample Plots:** Total weight of chile peppers from all sample plots (item 25) in pounds to tenths.
27. **No. of Sample Plots:** Number of sample plots in item 25.

28. **Average Sample Weight:** Divide the total weight all sample plots (item 26) by the number of sample plots (item 27). Round the result to tenths.
29. **Acre Factor:** Enter “1000.”
30. **Pounds Per Acre:** Multiply the average sample weight (item 28) by the acre factor (item 29). Round the result to whole pounds.
31. **Remarks:** Enter the calculation for converting the appraised pounds per acre to dollars and cents per acre:

Chile Pepper Count Method

(i.e., Pounds Per Acre (item 19) times the base contract price equals appraisal in dollars and cents.). **EXAMPLE:** 3,400 lbs. X \$ 0.14 = \$476.00. Transfer this dollar amount to column **31** of the Production Worksheet.

Chile Pepper Weight Method

(i.e., Pounds Per Acre (item 30) times the base contract price equals appraisal in dollars and cents.). **EXAMPLE:** 2,200 lbs. X \$ 0.14 = \$308.00. Transfer this dollar amount to column **31** of the Production Worksheet.

The following required entries are not illustrated on the Appraisal Worksheet example below.

32. **Insured’s Signature and Date:** Insured’s (or insured’s authorized representative) signature and date. Before obtaining the signature, **REVIEW ALL ENTRIES** on the Appraisal Worksheet **WITH THE INSURED** (or insured’s authorized representative), particularly explaining codes, etc., which may not be readily understood.
33. **Adjuster’s Signature, Code Number, and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured’s authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the “Narrative” of the Production Worksheet.
34. **Page:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.)

31. REMARKS
 2,200 X \$0.14 = \$308.00

Refer to the Above Appraisal Worksheet instructions for required statements and signature entries.

9. CLAIM FORM ENTRIES AND COMPLETION PROCEDURES

A. CLAIM FORM STANDARDS

- (1) The entry items in section 9C are the minimum Claim Form (hereafter referred to as “Production Worksheet”) requirements. All of these entry items are considered “Substantive,” (i.e., they are required.)
- (2) **Production Worksheet completion instructions.** The completion instructions for the required entry items on the Production Worksheet in the following sections are “Substantive,” (i.e., they are required.)
- (3) The Privacy Act and Non-Discrimination statements are required statements that must be printed on the form or provided **to the insured** as a separate document. These statements are not shown in the example form in this section. The current Non-Discrimination Statement and **Privacy Act Statement** can be found **on the RMA website at <http://www.rma.usda.gov/regs/required.html> or successor website.**
- (4) The certification statement required by the current DSSH must be included on the form directly above the insured’s signature block and immediately followed by the statement below.

“I understand the certified information on this Production Worksheet will be used to determine my loss, if any, to the above unit. The AIP may audit and approve this information and supporting documentation. The Federal Crop Insurance Corporation, an agency of the United States, subsidizes and reinsures this crop insurance.”
- (5) Refer to the DSSH for other crop insurance form requirements (e.g., point size of font, etc.)

B. GENERAL INFORMATION FOR **WORKSHEET ENTRIES AND COMPLETION INSTRUCTIONS**

- (1) The Production Worksheet is a progressive form containing all notices of damage for all preliminary and final inspections, **including “No Indemnity Due” claims,** on a unit.
- (2) If a Production Worksheet has been prepared on a prior inspection, verify each entry and enter additional information as needed. If a change or correction is necessary, strike out all entries on the line and re-enter correct entries on a new line. The adjuster and insured should initial any line deletions.
- (3) Refer to the LAM for instructions regarding the following:
 - (a) Acreage report errors.
 - (b) Delayed notices and delayed claims.

- (c) Corrected claims or fire losses (double coverage) and cases involving uninsured causes of loss, unusual situations, controversial claims, concealment, or misrepresentation.
 - (d) Claims involving a Certification Form (when all the acreage on the unit has been appraised to be put to another use or other reasons described in the LAM).
 - (e) “No Indemnity Due” claims (which must be verified by an APPRAISAL or NOTIFICATION from the insured that the production exceeded the guarantee).
- (4) The adjuster is responsible for determining if any of the insured’s requirements under the notice and claim provisions of the policy have not been met. If any have not, the adjuster should contact the AIP.
- (5) Instructions labeled “**PRELIMINARY**” apply to preliminary inspections only. Instructions labeled “**FINAL**” apply to final inspections only. Instructions not labeled apply to ALL inspections.
- (6) If the AIP determines the claim is to be DENIED, refer to paragraph 67K of the LAM for Production Worksheet completion instructions.

C. FORM ENTRIES AND COMPLETION INFORMATION

Verify or make the following entries:

<u>Item No.</u>	<u>Information Required</u>
1.	Crop/Code #: “Chile Peppers” (0045).
***2.	Unit #: Unit number from the Summary of Coverage after it is verified to be correct.
3.	Location Description: Land location that identifies the legal description, if available, and the location of the unit (e.g., section, township, and range; FSA Farm Numbers; FSA Common Land Units (CLU) and tract numbers; GPS identifications; or Grid identifications) as applicable for the crop.
4.	Date(s) of Damage: First three letters of the month(s) during which the determined insured damage occurred for the inspection and cause(s) of loss listed in item 5 below. If no entry in item 5 below, MAKE NO ENTRY. For progressive damage, enter in chronological order the month that identifies when the majority of the insured damage occurred. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., Aug 11). Enter additional dates of damage in the extra spaces, as needed. If more space is needed, document the additional dates of damage in the “Narrative” (or on a Special Report). Refer to the illustration in item 6 below.

If there is no insurable cause of loss and a no indemnity due claim will be completed, MAKE NO ENTRY.

5. **Cause(s) of Damage:** Name of the determined insured cause(s) of damage for this crop as listed in the LAM for the date of damage listed in item 4 above for this inspection. If an insured cause(s) of damage is coded as “Other,” explain in the “Narrative.” Enter additional causes of damage in the extra spaces, as needed. If more space is needed, document the additional determined insured causes of damage in the “Narrative” (or on a Special Report). Refer to the illustration in item 6 below.

If it is evident that no indemnity is due, enter “NO INDEMNITY DUE” across the columns in Item 5 (refer to the LAM for more information on no indemnity due claims).

6. **Insured Cause %:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Whole percent of damage for the insured cause of damage listed in item 5 above for this inspection. Enter additional “Insured Cause %” in the extra spaces, as needed. If additional space is needed, enter the additional determined “Insured Cause %” in the “Narrative” (or on a Special Report). The total of all “Insured Cause %” including those entered in the “Narrative” must equal 100%.

If there is no insurable cause of loss, and a no indemnity due claim will be completed, MAKE NO ENTRY.

Example entries for items 4-6 and the “Narrative,” reflecting entries for multiple dates of damage, the corresponding insured causes of damage and insured cause percents:

4. Date(s) of Damage	MAY 15	JUN 10	JUL
5. Cause(s) of Damage	EX PRECIP	HAIL	HAIL
6. Insured Cause %	30	15	15
Narrative: Additional date of damage – JUL 31; Cause of Damage – Fire; Insured cause percent - 40%.			

7. **Company/Agency:** Name of company and agency servicing the contract.
8. **Name of Insured:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
9. **Claim #:** Claim number as assigned by the AIP.
10. **Policy #:** Insured’s assigned policy number.
11. **Crop Year:** Four-digit crop year, as defined in the policy, for which the claim is filed.

12. **Additional Units:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Unit number(s) for ALL non-loss units for the crop at the time of final inspection. A non-loss unit is any unit for which a Production Worksheet has not been completed. Additional non-loss units may be entered on a single Production Worksheet.

If more spaces are needed for non-loss units, enter the unit numbers, identified as “Non-Loss Units,” in the “Narrative” or on an attached Special Report.

13. **Est. Prod. Per Acre:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Estimated yield per acre, in whole pounds, of all non-loss units for the crop at the time of final inspection.

14. **Date(s) Notice of Loss:**

PRELIMINARY:

- a. Date the first or second notice of damage or loss was given for the unit in item 2, in the 1st or 2nd space, as applicable. Enter the complete date (MM/DD/YYYY) for each notice.
- b. A notice of damage or loss for a third preliminary inspection (if needed) requires an additional set of Production Worksheets. Enter the date of notice for a third preliminary inspection in the 1st space of item 14 on the second set of Production Worksheets.
- c. Reserve the “Final” space on the first page of the first set of Production Worksheets for the date of notice for the final inspection.
- d. If the inspection is initiated by the AIP, enter “Company Insp.” instead of the date.
- e. If the notice does not require an inspection, document as directed in the “Narrative” instructions.

FINAL: Transfer the last date (in the 1st or 2nd space from the first or second set of Production Worksheets) to the FINAL space on the first page of the first set of Production Worksheets) if a final inspection should be made as a result of the notice. Always enter the complete date of notice (MM/DD/YYYY) for the “FINAL” inspection in the final space on the first set of production worksheets. For a delayed notice of loss or delayed claim, refer to the LAM.

15. **Companion Policy(s):**

- a. If no other person has a share in the unit (insured has 100 percent share), MAKE NO ENTRY.
- b. In all cases where the insured has LESS than a 100 percent share of a loss-affected unit, ask the insured if the OTHER person sharing in the unit has a multiple-peril crop insurance contract (i.e., not crop-hail, fire, etc.). If the other person does not, enter "NONE."
 - (1) If the other person has a multiple-peril crop insurance contract and it can be determined that the SAME AIP services it, enter the contract number. Handle these companion policies according to AIP instructions.
 - (2) If the OTHER person has a multiple-peril crop insurance contract and a DIFFERENT AIP or agent services it, enter the name of the AIP and/or agent (and contract number) if known.
 - (3) If unable to verify the existence of a companion contract, enter "Unknown," and contact the AIP for further instructions.
- c. Refer to the LAM for further information regarding companion contracts.

SECTION I – DETERMINED ACREAGE APPRAISED, PRODUCTION AND ADJUSTMENTS

Make separate line entries for varying:

- (1) Rate classes, types, class, sub-class, intended use, irrigated practice, cropping practice, or organic practices, as applicable;
- (2) Appraisals;
- (3) Stages or intended use(s) of acreage;
- (4) Shares (e.g., 50 percent and 75 percent shares on the same unit); or
- (5) Appraisals for damage due to hail or fire if Hail and Fire Exclusion is in effect.

Verify or make the following entries:

**Item
No.**

Information Required

***16. **Field ID:** The field or subfield identification symbol from a sketch map or an aerial photo. Refer to the "Narrative" instructions.

17. **Multi-Crop Code:**

PRELIMINARY AND FINAL: The applicable two-digit code for first crop and second crop. REFER TO THE LAM FOR INSTRUCTIONS REGARDING ENTRY OF FIRST CROP AND SECOND CROP CODES.

***18. **Reported Acres:** In the event of over-reported acres, handle in accordance with the individual AIP's instructions. In the event of under-reported acres, enter the reported acres to tenths for the field or sub field. If there are no under-reported acres MAKE NO ENTRY.

***19. **Determined Acres:** Refer to the LAM for definition of acceptable determined acres used herein. Enter the determined acres to tenths for the field or subfield for which consent is given for other use and/or:

- a. Put to other use without consent;
- b. Abandoned;
- c. Damaged by uninsured causes;
- d. For which the insured failed to provide acceptable records of production.

Refer to the LAM for procedures regarding when estimated acres are allowed and documentation requirements.

PRELIMINARY AND FINAL: Determined acres to tenths. Acreage breakdowns WITHIN a unit or field may be estimated (refer to the LAM) if a determination is impractical.

ACCOUNT FOR ALL PLANTED ACREAGE IN THE UNIT.

20. **Interest or Share:** Insured's interest in the crop to three decimal places as determined at the time of inspection. If shares vary on the same UNIT, use separate line entries.

21. **Risk:** Three-digit code for the correct "Rate" specified on the actuarial document **maps**. If a "Rate" or "High Risk Area" is not specified on the actuarial document **maps**, make no entry. Verify with the Summary of Coverage and if the "Rate" is found to be incorrect, revise according to the AIP's instructions. Refer to the LAM.

Unrated land is uninsurable without a written agreement.

22. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type grown by the insured. If "No Type Specified" is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a type is not specified on the actuarial documents, MAKE NO ENTRY.

23. **Class:** Three-digit code number, entered exactly as specified on the actuarial documents for the class grown by the insured. If "No Class Specified" is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a class is not specified on the actuarial documents, MAKE NO ENTRY.

24. **Sub-Class:** Three-digit code number, entered exactly as specified on the actuarial documents for the sub-class grown by the insured. If "No Sub-Class Specified," is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a sub-class is not specified on the actuarial documents, MAKE NO ENTRY.

25. **Intended Use:** Three-digit code number, entered exactly as specified on the actuarial documents for the intended use of the crop grown by the insured. If “No Intended Use Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If an intended use is not specified on the actuarial documents, MAKE NO ENTRY.
26. **Irr. Practice:** Three-digit code number, entered exactly as specified on the actuarial documents for the irrigated practice carried out by the insured. If “No Irrigated Practice Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If an irrigated practice is not specified on the actuarial documents, MAKE NO ENTRY.
27. **Cropping Practice:** Three-digit code number, entered exactly as specified on the actuarial documents for the cropping practice (or practice) carried out by the insured. If “No Cropping Practice Specified” or “No Practice Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If a cropping practice (or practice) is not specified on the actuarial documents, MAKE NO ENTRY.
28. **Organic Practice:** Three-digit code number, entered exactly as specified on the actuarial documents for the organic practice carried out by the insured. If “No Organic Practice Specified” is shown in the actuarial documents, enter the appropriate three-digit code number from the actuarial documents (e.g., 997). If an organic practice is not specified on the actuarial documents, MAKE NO ENTRY.

29. **Stage:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Stage abbreviation as shown below.

STAGE

EXPLANATION

“P”	Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, for which the insured failed to provide acceptable records of production, which are acceptable to the AIP, or from which production was sold by direct marketing.
“1,” “2,” or “3”	Stage as defined in the Crop Provisions. (Refer to subsection 5 E and F).
“UB”	Bypassed (insured causes)
“PB”	Bypassed (uninsured causes)

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

30. **Use of Acreage:** the following “Intended Use” abbreviations.

<u>USE</u>	<u>EXPLANATION</u>
“To Cucumbers,” etc.	Other use made of the acreage
“WOC”	Other use without consent
“SU”	Solely uninsured
“ABA”	Abandoned without consent
“H”	Harvested
“UH”	Unharvested
“Bypassed”	Bypassed by processor

Verify any **preliminary** “Intended Use” entry. If the final use of the acreage was not as indicated, strike out the original line and initial it. Enter all data on a new line showing the correct “Final Use.”

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

31. **Appraised Potential:** Per-acre appraisal in dollars and cents of POTENTIAL production for the acreage appraised from the appraisal worksheet. Refer to section 5, “Processing Chile Pepper Appraisals” and section 6, “Appraisal Methods” for additional instructions.

If there is no potential on UH acreage, enter “0.00.” **Refer to paragraph 85 in the LAM for procedures for documenting zero yield appraisals.**

- (a) For unharvested acreage that is bypassed by the processor due to INSURED causes of loss; the potential production per acre shown on the Production Worksheet in column **31** will be **zero (0.00)**.
- (b) For unharvested acreage, and/or acreage that is bypassed when NO insured cause of loss prevented the processor from harvesting, the value of potential production must be appraised and counted as production against the amount of insurance.

32a.-33. **MAKE NO ENTRY.**

34. **Production Pre QA:**

PRELIMINARY AND FINAL: Result of multiplying column 31 times column 19, rounded to whole dollars. If no entry in column 31, **MAKE NO ENTRY.**

35. **Quality Factor: MAKE NO ENTRY**

36. **Production Post QA:** Transfer entry from column 34.

37. Uninsured Causes: EXPLAIN IN THE NARRATIVE.

PRELIMINARY AND FINAL: Result of per acre appraisal for uninsured causes (taken from appraisal worksheet or other documentation) multiplied by column 19, rounded in whole dollars. Refer to the LAM for information on how to determine uninsured cause appraisals. If no uninsured causes, MAKE NO ENTRY.

- a. Hail and Fire exclusion NOT in effect.
 - (1) Enter the result of multiplying column 19 entry by NOT LESS than the insured's amount of insurance per acre in whole dollars for the line, for any "P" stage acreage.
 - (2) On preliminary inspections, advise the insured to keep the harvested production from any acreage damaged SOLELY by uninsured causes separate from other production.
 - (3) For acreage that is damaged PARTLY by uninsured causes, enter the result of multiplying the APPRAISED UNINSURED loss of production per acre, whole dollars, by column 19 entry for any such acreage.
- b. Refer to the LAM when a Hail and Fire Exclusion is in effect and damage is from hail or fire.
- c. Enter the result of adding uninsured cause appraisals to hail and fire exclusion appraisals.
- d. For fire losses, if the insured also has other fire insurance (double coverage), refer to the LAM.

38. Total to Count:

PRELIMINARY AND FINAL: Result of adding item 36 and item 37, rounded to whole dollars.

39. Total:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total determined acres (column 19), to tenths.

40. Quality: Check "None."

41. Mycotoxins exceed FDA, State, or other health organization maximum limits? MAKE NO ENTRY.

42. **Totals:** Total of entries in columns 34, 36, 37 and 38. If a column has no entries, MAKE NO ENTRY.

NARRATIVE:

If more space is needed, document on a Special Report, and enter “Refer to the Special Report.” Attach the Special Report to the Production Worksheet.

- a. If no acreage is released on the unit, enter “No acreage released,” adjuster’s initials, and date.
- b. If notice of damage was given and “No Inspection” is required, enter “No Inspection,” the unit number(s), date, and adjuster’s initials (do not enter the unit numbers for which notice has not been given). The insured’s signature is not required.
- c. Explain any uninsured causes, unusual, or controversial cases.
- d. If there is an appraisal in Section I, column 37 for uninsured causes due to hail/fire exclusion, show the original hail/fire liability per acre and the hail/fire indemnity per acre.
- e. Document the actual appraisal date if an appraisal was performed prior to the adjuster’s signature date on the appraisal worksheet, and the date of the appraisal is not recorded on the appraisal worksheet.
- f. State that there is “No other fire insurance” when fire damages or destroys the insured crop and it is determined that the insured has no other fire insurance. Also, refer to the LAM.
- g. Explain any errors found on the Summary of Coverage.
- h. Explain any commingled production. Refer to the LAM.
- i. Explain any entry for “Production Not to Count” in Section II, column 62 and/or any production not included in Section II, column 56 or columns 49 through 52 entries (e.g., harvested production from uninsured acreage that can be identified separately from the insured acreage in the unit).
- j. Explain a “NO” checked in item 44, “Damage Similar to Other Farms in the Area?”
- k. Attach a sketch map or aerial photo to identify the total unit:
 - (1) If consent is or has been given to put part of the unit to another use;
 - (2) If uninsured causes are present; or
 - (3) For unusual or controversial cases.

Indicate on the sketch map or aerial photo, the disposition of acreage destroyed or put to other use with or without consent.

- l. Explain any difference between date of inspection and signature dates. For an ABSENTEE insured, enter the date of the inspection AND the date of mailing the Production Worksheet for signature.
- m. When any other adjuster or supervisor accompanied the adjuster on the inspection, enter the code number of the other adjuster or supervisor and date of inspection.
- n. Explain the reason for a “No Indemnity Due” claim. “No Indemnity Due” claims are to be distributed in accordance with the AIP’s instructions.
- o Explain any delayed notices or delayed claims as instructed in the LAM.
- ***p. Document any authorized estimated acres, as instructed in the LAM, shown in Section I, column 19.
- q. Document the method and calculation used to determine acres for the unit. Refer to the LAM.
- r. Document in the “Narrative” or on a Special Report, the calculation used to determine the stage guarantee per acre.
- s. Specify the type of insects or disease when the insured cause of damage or loss is listed as insects or disease. Explain why control measures did not work or if unavailable.
- t. Document the name and address of the charitable organization when gleaned acreage is applicable. Refer to the LAM for more information on gleaning.
- u. Explain any “0” potential (chile pepper plants with no production).
- v. Document any other pertinent information, including any data to support any factors used to calculate the production. If on an attachment, enter “See attachment.”
- w. Document any unsold, unmarketable harvested production that is damaged or defective due to insurable causes.

SECTION II – DETERMINED HARVESTED PRODUCTION

GENERAL INFORMATION:

- (1) Account for ALL HARVESTED PRODUCTION (for ALL ENTITIES sharing in the crop) except production appraised BEFORE harvest and shown in Section I because the quantity cannot be determined later (e.g., released for other uses, etc.).
- (2) For production commercially stored, sold, etc., enter the name and address of storage facility or buyer or processor as applicable in columns 49 through 52.

- (3) If additional lines are necessary, the data may be entered on a continuation sheet.
USE SEPARATE LINES FOR:
- (a) Different FIRST handlers (buyers or processors). The insured must have maintained satisfactory records of ALL production sold or stored. Verify any buyer or processor records.
 - (b) Separate storage facilities.
 - (c) If the first handler was not a processor (In all localities), the adjuster will determine production on the basis of available records.
 - (d) Varying shares; e.g., 50 percent and 75 percent shares on the same unit.
- (4) There will generally be no harvested production entries in columns 47 through 66 for preliminary inspections.

Verify or make the following entries:

**Item
No.**

Information Required

43. Date Harvest Completed: (Used to determine if there is a delayed notice or a delayed claim. Refer to the LAM.)

PRELIMINARY: MAKE NO ENTRY.

FINAL:

- a. The earlier of the date the ENTIRE acreage on the unit was (1) harvested (sufficient production to fulfill the processor contract, if contract stipulates a specific amount to be delivered), (2) destroyed, (3) put to other use, (4) a combination of harvested, destroyed, put to other use, or (5) the calendar date for the end of the insurance period.
- b. If at the time of final inspection (if prior to the end of the insurance period), there is any unharvested insured acreage remaining on the unit that the insured does not intend to harvest, enter “**Incomplete.**”
- c. If at the time of final inspection (if prior to the end of the insurance period), **none** of the insured acreage on the unit has been harvested, and the insured does not intend to harvest such acreage, enter “**No Harvest.**”
- d. If the case involves a Certification Form, enter the date from the Certification Form when the entire unit is put to another use, etc. Refer to the LAM.

44. Damage Similar to Other Farms in the Area?:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Check “Yes” or “No.” Check “Yes” if the amount and cause of damage due to insurable causes is similar to the experience of other farms in the area. If “No” is checked, explain in the “Narrative.”

45. Assignment of Indemnity?: Check “Yes” **only** if an assignment of indemnity is in effect for the crop year; otherwise, check “No.” Refer to the LAM.

46. Transfer of Right to Indemnity?: Check “Yes” **only** if a transfer of right to indemnity is in effect for the unit for the crop year; otherwise, check “No.” Refer to the LAM.

47a. Share: RECORD ONLY VARYING SHARES on SAME unit to three decimal places.

47b. Field ID:

- a. If only one practice and/or type of harvested production is listed in Section I, MAKE NO ENTRY.
- b. If more than one practice and/or type of harvested production is listed in Section I, indicate for each practice/type the corresponding Field ID (from Section I, column 16).

48. Multi-Crop Code: The applicable two-digit code for first crop and second crop. REFER TO THE LAM FOR INSTRUCTIONS REGARDING ENTRY OF FIRST CROP AND SECOND CROP CODES.

49-55. Length or Diameter, Width, Depth, Deductions, Net Cubic Feet, Conversion Factor, and Gross Prod.:

- a. For production sold, enter the name and address of the buyer or processor etc., as applicable. For production otherwise disposed of, indicate the disposition.
- b. For unsold production, enter “UNSOLD.” Make a separate line entry for marketable and unmarketable production.

56. Bu., Ton, Lbs., Cwt.: Make separate line entries for sold and unsold production.

- a. Circle “Lbs.” in column heading.
- b. Total harvested production in whole pounds. Account for and include production harvested but not delivered to a processor.

57.-60. MAKE NO ENTRY.

61. Adjusted Production: Enter pounds from column **56**.

62. Production Not to Count:

- a. Enter the net production NOT to count, in whole pounds, WHEN ACCEPTABLE RECORDS IDENTIFYING SUCH PRODUCTION ARE AVAILABLE, from harvested acreage that has been assessed an appraisal of not less than the amount of insurance, or from other sources (e.g., other units or uninsured acreage).
- b. If production records are NOT available from acreage damaged solely by uninsured causes, MAKE NO ENTRY.

THIS ENTRY MUST NEVER EXCEED PRODUCTION SHOWN ON THE SAME LINE. EXPLAIN ANY "PRODUCTION NOT TO COUNT" IN THE NARRATIVE.

63. Production Pre-QA: Result of subtracting column **62** from column **61** to whole pounds.

64a. Value:

- a. For SOLD production, enter the price per pound obtained by subtracting the allowable costs shown in the **SP** from the base contract price received.
- b. For UNSOLD production damaged by insurable causes, which the processor rejects and such production is destroyed, enter "0.00." Refer to the LAM.
- c. For UNSOLD production, which the insured is waiting to sell, the claim will remain open until such time as the final disposition of production is known. Refer to the LAM.

64b.-65. MAKE NO ENTRY.

66. Production to Count: Enter result from multiplying column **63** times column **64a**, rounded to whole dollars.

67. Total of column **63**. If no entry in column **63**, MAKE NO ENTRY.

68. Section II Total:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of column **66** in whole dollars.

69.

Section I Total:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Enter figure from Section I, column 38 in whole dollars.

70.

Unit Total:

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of item 68 and item 69 in whole dollars.

For CAT policies, multiply result by .55, unless otherwise instructed by the AIP that adjustment will be made by another manual or automated computation process.

71.

Allocated Prod: Refer to paragraphs 126 C (1-3) and 127 of the LAM for instructions for determining allocated production. Enter the total production in whole pounds, allocated to this unit that is included in Section I or II of the Production Worksheet. Document how allocated production was determined and record supporting calculations in the "Narrative" or on a Special Report.

72.

Total APH Prod: MAKE NO ENTRY

The following required entries are not illustrated on the Production Worksheet example below.

73.

Insured's Signature and Date: Insured's (or insured's authorized representative) signature and date. BEFORE obtaining the signature, REVIEW ALL ENTRIES on the Production Worksheet WITH THE INSURED (or the insured's authorized representative), particularly explaining codes, etc., that may not be readily understood.

Final indemnity inspections should be signed on bottom line.

74.

Adjuster's Signature, Code #, and Date: Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. For an absentee insured, enter adjuster's code number ONLY. The signature and date will be entered AFTER the absentee has signed and returned the Production Worksheet.

Final indemnity inspections should be signed on the bottom line.

75.

Page:

PRELIMINARY: Page numbers - "1," "2," etc., at the time of inspection.

FINAL: Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

PRODUCTION WORKSHEET

1. Crop/Code # CHILE PEPPERS 0045	2. Unit # 0001-0001-BU	3. Location Description S1/2 - 5 - 50 - 20	7. Company Agency ANY COMPANY ANY AGENCY	8. Name of Insured I.M. INSURED

TABLE C - ROW WIDTHS AND LENGTHS FOR 1/1000 ACRE

ROW WIDTH (INCHES)	SAMPLE ROW LENGTH (FEET)	ROW WIDTH (INCHES)	SAMPLE ROW LENGTH (FEET)
	1/1000 ACRE		1/1000 ACRE
12	43.6	28	18.7
14	37.3	30	17.4
16	32.7	32	16.3
18	29.0	34	15.4
20	26.1	36	14.5
22	23.8	38	13.8
24	21.8	40	13.1
26	20.1	42	12.4

TABLE D - FACTORS FOR PLANTS CUT-OFF BELOW CROWN LIMBS

(When loss falls in shaded area, adjustment should be deferred)

	CUT - OFF SYMBOL				
	CC - C2	C3 - C5	C6 - C8	C9 - C11	C12 - C15
V STAGES	50	40	30	20	10
R1	60	60	60	60	50
R2	90	90	90	80	70
R3	100	100	100	90	80

TABLE E - LIMB FACTORS

STAGE OF GROWTH	FACTOR
R1	.45
R2	2.35
R3	4.40

TABLE F - POD FACTORS

STAGE OF GROWTH	FACTOR
R1	0
R2	.15
R3	.50

TABLE G - TYPE FACTORS

TYPE	FACTOR
Long Green New Mexican (201)	.175
Long Red New Mexican (202)	.125
Cayenne (203)	.069
Jalapeno (204)	.050
